## Study programme competences

| Code | Study programme competences   |
|------|---|
| A1   | Aprender de maneira autónoma novos coñecementos e técnicas avanzadas axeitadas para a investigación, o deseño e o desenvolvemento de sistemas e servizos informáticos.          |
| A3   | Concibir e planificar o desenvolvemento de aplicacións informáticas complexas ou con requisitos especiais.  |
| A6   | Avaliar, definir, seleccionar e auditar plataformas hardware e software para a execución e desenvolvemento de aplicacións e servizos informáticos.                              |
| A7   | Saber especificar, deseñar e implementar un sistema de información, empregando bases de datos.  |
| A9   | Dirixir equipos de traballo ligados ao deseño de produtos, procesos, servizos informáticos e outras actividades profesionais.   |
| A10  | Saber especificar, deseñar e implementar unha política de seguridade no sistema.  |
| B1   | Aprender a aprender.  |
| B2   | Resolver problemas de forma efectiva.   |
| B3   | Aplicar un pensamento crítico, lóxico e creativo.   |
| B4   | Aprendizaxe autónoma.   |
| B5   | Traballar de forma colaborativa.  |
| B7   | Comunicarse de maneira efectiva en calquera contorno de traballo.   |
| B8   | Traballar en equipos de carácter interdisciplinar.  |
| B9   | Capacidade para tomar decisións.  |
| B10  | Capacidade de xestión da informática (captación e análises da información).   |
| B11  | Razoamento crítico.   |
| B12  | Capacidade para a análise e a síntese.  |
| B13  | Capacidade de comunicación.   |
| B14  | Coñecemento de idiomas.   |
| B15  | Motivación pola calidade.   |
| C3   | Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida. |
| C6   | Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.   |
| C7   | Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.  |
| C8   | Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.                                   |

## Learning outcomes

| Subject competencies (Learning outcomes) | Study programme competences |
|--|-----------------------------|
|  |                             |

|  |                             |  |                      |
|--|-----------------------------|--|----------------------|
| Knowledge about concepts and techniques of Software Engineering.                                   | A3<br>A7<br>A9              | B2<br>B9<br>B12<br>B15   | C3<br>C6<br>C7<br>C8 |
| Use of design and implementation tools.  | A1<br>A3<br>A6<br>A7<br>A10 | B1<br>B2<br>B3<br>B4<br>B5<br>B7<br>B8<br>B9<br>B10<br>B11<br>B14<br>B15 | C3<br>C6<br>C7<br>C8 |
| Expert use of modeling languages and design patterns.  | A3<br>A7                    | B2<br>B3<br>B7<br>B9<br>B10<br>B11<br>B12<br>B15                         | C3<br>C6<br>C7<br>C8 |
| Knowledge, identification and understanding of the typical situations where design problems arise. | A1<br>A3<br>A6<br>A7        | B1<br>B2<br>B3<br>B4<br>B5<br>B7<br>B8<br>B9<br>B10<br>B11<br>B12<br>B13 | C3<br>C6<br>C7<br>C8 |
| Identification of success experiences.   | A1<br>A3<br>A6<br>A7<br>A9  | B1<br>B3<br>B4<br>B7<br>B9<br>B10<br>B11<br>B12<br>B13<br>B15            | C3<br>C6<br>C7<br>C8 |

| Contents |           |
|----------|-----------|
| Topic    | Sub-topic |

**Planning**

| Methodologies / tests          | Ordinary class hours | Student?s personal work hours | Total hours |
|--------------------------------|----------------------|-------------------------------|-------------|
| Guest lecture / keynote speech | 21                   | 21                            | 42          |
| Seminar                        | 10                   | 15                            | 25          |
| Laboratory practice            | 15                   | 15                            | 30          |
| Objective test                 | 5                    | 0                             | 5           |
| Supervised projects            | 0                    | 24                            | 24          |
| Personalized attention         | 24                   | 0                             | 24          |

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

**Methodologies**

| Methodologies                  | Description   |
|--------------------------------|---|
| Guest lecture / keynote speech | Expositive sessions to present theoretical aspects using different materials: board, slides, electronic notes and resources provided by the teacher using the virtual campus. |
| Seminar                        | Practical seminars in which acquired concepts are developed further, with a practical example as baseline. The teacher conducts the session, involving the students actively. |

|                     |   |
|---------------------|---|
| Laboratory practice | Practical sessions designed by the teacher on the grounds of the concepts that the students are presented with. Students develop practical exercises in small groups, preferably in pairs.  |
| Objective test      | Written test to assess student's knowledge acquisition. Students must develop both their knowledge of theoretical aspects, to be demonstrated by answering questions, and their knowledge of practical aspects, to be demonstrated by solving practical exercises, similar to those they have been previously addressing during practical sessions, seminars, and personal tasks. |
| Supervised projects | Personal tasks proposed by the teacher and developed by the students in an individual fashion, or in group. This tasks can be evaluated via test exams or individually during tutoring hours.   |

### Personalized attention

| Methodologies  | Description   |
|--|---|
| Laboratory practice<br>Objective test<br>Supervised projects | <p>Personalised attention to students involves not only classical tutor hours, either in face-to-face or virtual meetings, for discussion of questions, but also the following:</p> <ul style="list-style-type: none"> <li>- Monitoring of the work related to the proposed personal tasks assigned by the teacher.</li> <li>- Evaluation of the results of the personal work, tasks, and exercises performed by the students.</li> <li>- Discussion to solve the challenges encountered by the students in addressing both theoretical and practical tasks and exercises.</li> </ul> |

### Assessment

| Methodologies       | Description   | Qualification |
|---------------------|---|---------------|
| Laboratory practice | <p>Evaluation of the practical exercises in a continuous manner thorough the course in a final defence. Despite these exercises being solved in groups, there are two components in this evaluation:</p> <ul style="list-style-type: none"> <li>- Evaluation of the group work, in which coordination and collaboration is evaluated.</li> <li>- Personal evaluation, where contribution of each individual is evaluated.</li> </ul> <p>Among the aspects to be evaluated, we find:</p> <ul style="list-style-type: none"> <li>- Rigorousness in achieving the objectives of each exercise, applying the techniques proposed in the subject.</li> <li>- Comprehension of the concepts involved in the exercise.</li> <li>- Originality in the solutions.</li> <li>- Responsibility in finishing the exercises in due time and according to the given instructions, as well as use of given material.</li> </ul> | 30            |
| Objective test      | Written test with three different parts: short questions, short design-and-implement exercises, and design problem with special interest in motivation of design decisions.   | 60            |
| Supervised projects | <p>The following aspects will be taken into account:</p> <ul style="list-style-type: none"> <li>- Knowledge of the contents of the proposed tasks.</li> <li>- Knowledge of the theoretical and practical aspects of the subject.</li> <li>- Participation and/or suitable tracking in the development of the subject.</li> </ul>  | 10            |
| Others              |   |               |
