

## Teaching Guide

Identifying Data					2014/15
<b>Subject (*)</b>	Deseño de sistemas de información		<b>Code</b>	614502007	
<b>Study programme</b>	Mestrado Universitario en Enxeñaría Informática (plan 2012)				
Descriptors					
Cycle	Period	Year	Type	Credits	
Official Master's Degree	1st four-month period	First	Obligatoria	6	
<b>Language</b>	GalicianEnglish				
<b>Prerequisites</b>					
<b>Department</b>	Computación				
<b>Coordinador</b>	Sanchez Penas, Juan Jose		<b>E-mail</b>	juan.jose.sanchez.penas@udc.es	
<b>Lecturers</b>	Sanchez Penas, Juan Jose		<b>E-mail</b>	juan.jose.sanchez.penas@udc.es	
<b>Web</b>	campusvirtual.udc.es/moodle/course/view.php?id=60511				
<b>General description</b>	<p>Revisaremos conceptos avanzados relacionados con todos os aspectos do deseño software, incluíndo patróns de deseño e arquitectura, deseño orientado a componentes, calidade no deseño, evolución do software, métricas e complexidade software, ou accesibilidade. O obxectivo será consolidar eses conceptos estudando proxectos do mundo real dende unha perspectiva profesional. O idioma principal da asignatura será o inglés.</p> <p>We will review advanced concepts related to all the aspects of software design, including design and architectural patterns, component-based design, design quality, software evolution, metrics and software complexity or software accessibility. We will focus on consolidating those concepts by studying complex real world projects from a professional perspective.</p>				

## Study programme competences

Code	Study programme competences
A4	Capacidade para modelar, deseñar, definir a arquitectura, implantar, xestionar, operar, administrar e manter aplicacións, redes, sistemas, servizos e contidos informáticos.
A14	Capacidade para conceptualizar, deseñar, desenvolver e avaliar a interacción persoaordenador de produtos, sistemas, aplicacións e servizos informáticos.
B1	Capacidade de resolución de problemas.
B2	Traballo en equipo.
B3	Capacidade de análise e síntese.
B4	Capacidade para organizar e planificar.
B5	Habilidades de xestión da información.
B6	Toma de decisións.
B7	Preocupación pola calidade.
B8	Capacidade de traballar nun equipo interdisciplinar.
B9	Capacidade para xerar novas ideas (creatividade).
B10	Capacidade para proxectar, calcular e deseñar produtos, procesos e instalacións en todos os ámbitos da enxeñaría informática
B13	Capacidade para o modelado matemático, cálculo e simulación en centros tecnolóxicos e de enxeñaría de empresa, particularmente en tarefas de investigación, desenvolvemento e innovación en todos os ámbitos relacionados coa Enxeñaría en Informática
B14	Capacidade para a elaboración, planificación estratéxica, dirección, coordinación e xestión técnica e económica de proxectos en todos os ámbitos da Enxeñaría en Informática seguindo criterios de calidade e ambientais
B17	Capacidade para a aplicación dos coñecementos adquiridos e de resolver problemas en contornas novas ou pouco coñecidos dentro de contextos máis amplos e multidisciplinares, sendo capaces de integrar estes coñecementos
B21	Posuír e comprender coñecementos que acheguen unha base ou oportunidade de ser orixinais no desenvolvemento e/ou aplicación de ideas, a miúdo nun contexto de investigación
B22	Que os estudantes saiban aplicar os coñecementos adquiridos e a súa capacidade de resolución de problemas en contornas novas ou pouco coñecidos dentro de contextos máis amplos (ou multidisciplinares) relacionados coa súa área de estudo

B23	Que os estudantes sexan capaces de integrar coñecementos e enfrontarse á complexidade de formular xuízos a partir dunha información que, sendo incompleta ou limitada, inclúa reflexións sobre as responsabilidades sociais e éticas vinculadas á aplicación dos seus coñecementos e xuízos
B24	Que os estudantes saiban comunicar as súas conclusións, e os coñecementos e razóns últimas que as sustentan, a públicos especializados e non especializados dun modo claro e sen ambigüidades
B25	Que os estudantes posúan as habilidades de aprendizaxe que lles permitan continuar estudando dun modo que haberá de ser en gran medida autodirixido ou autónomo
C1	Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.

Learning outcomes			
Subject competencies (Learning outcomes)	Study programme competences		
	Understand and know how to design information systems using patterns and following quality principles	AJ4 AJ14	BJ1 BJ2 BJ3 BJ4 BJ5 BJ6 BJ7 BJ8 BJ9 BJ10 BJ13 BJ14 BJ17 BC1 BC2 BC3 BC4 BC5

Contents	
Topic	Sub-topic
Introduction to advanced software design	Importance of software design Software design and software development processes and methodologies Design and architectural patterns, component-based design Software evolution, design quality, metrics and software complexity Software accessibility Real world examples of complex software design
Advanced concepts of software design	Languages and tools used for software design Design patterns Architectural patterns User interface and User experience patterns Introduction to software refactoring and evolution
Advanced concepts of quality in software design	Software and design quality Metrics and software complexity Evaluation and verification of software systems

Advanced concepts of software accessibility	<p>Importance of software accessibility</p> <p>Software accessibility and software design</p> <p>Software accessibility standards</p> <p>Tools and technologies for software accessibility</p> <p>Case studies of software accessibility</p>
Real world case studies	<p>Overview of some well known, complex software systems</p> <p>Software design in industry-used open source projects</p> <p>In depth analysis of the design, tools, quality and accessibility in several open source projects (e.g. WebKit, GNOME&amp;KDE, Linux, MeeGo/Tizen, etc.)</p>

### Planning

Methodologies / tests	Ordinary class hours	Student?s personal work hours	Total hours
Guest lecture / keynote speech	10	15	25
Case study	10	20	30
Objective test	5	0	5
Workshop	10	20	30
Workbook	0	10	10
Laboratory practice	10	20	30
Events academic / information	0	8	8
Online forum	0	10	10
Personalized attention	2	0	2

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

### Methodologies

Methodologies	Description
Guest lecture / keynote speech	We will invite relevant engineers and managers from the IT industry, in order to give the students guest lectures aligned with the contents of the course.
Case study	We will review real world projects and discuss how the theoretical content that we have studied in the lectures is applied there. We plan to focus mostly on open source projects, as we have full access to the design material and source code.
Objective test	Written exam, where the student will need to show both the theoretical knowledge acquired, and the capacity to resolve practical problems.
Workshop	Practical discussion, analysis and design sessions, with the students organized in groups, supervised by the teacher.
Workbook	The teacher will provide the student with relevant book chapters and articles, related to the theoretical content of the lectures, and the student will need to do a critical read of them, and prepare an executive summary that will be either reviewed by the teacher or by the whole classroom, depending on the case.
Laboratory practice	Practical design and coding exercises, with the students organized in groups, supervised by the teacher.
Events academic / information	We will complement the theoretical and practical lectures with attendance (either onsite or virtually) to conferences related to software design and development.
Online forum	All the topics discussed in lectures, workshops and practical lab time will have a follow up in the virtual forums. We will try to stimulate the discussion there and open new topics proposing links to extra content so that the students can complement their knowledge in the topics they have personal interest in.

### Personalized attention

Methodologies	Description
---------------	-------------

Online forum Workbook Laboratory practice	<p>The personal attention to the students includes, in this case, not only the classical supervision time (tutorship), or the virtual help using the online resources, but also the following actions:</p> <ul style="list-style-type: none"> <li>- We will follow constantly the work of the student in all the supervised tasks that will be proposed along the duration of the subject.</li> <li>- Assessment of the results obtained in the practical assignments developed by the student.</li> <li>- Constant communication with the goal of solving the problems found by the student to understand the contents discussed in the lectures or the difficulties of the tasks proposed by the teacher.</li> </ul>
---	--

Assessment		
Methodologies	Description	Qualification
Objective test	Written exam with 3 parts: short theoretical questions, more practical questions where the students can elaborate a bit more the answers to the problems explained, and a specific complete design challenge.	50
Workshop	<p>The assesment of practical tasks in workshops will be continuous along the course, and will be based on a final presentation to the teacher. We will consider as part of the assesment the following aspects:</p> <ul style="list-style-type: none"> <li>- Capacity to work as part of a group.</li> <li>- Personal capacity to carry out work and explain it.</li> <li>- Capacity to cover all the goals of the task.</li> <li>- Capacity to apply the knowledge acquired during the theoretical lessons.</li> <li>- Critical thinking and capacity to innovate and find solutions to problems.</li> <li>- Capacity to deliver the tasks on time.</li> </ul>	50

Assessment comments
<p>The summary of the qualification distribution is that we will obtain 50% of the marks from the written exam and 50% from a collection of workshops and practical activities that will be carried out during the course.</p> <p>Those students who are attending the course part time, or those who have any circumstance that prevents them from attending all the lectures, should contact the teacher to discuss alternatives for the assesment.</p>
