General description	This subject is focused on the mole	cular aspects of plan	t-pathogen in	teraction and, in a	short view, of interactions relate
	to other organisms (herbivores, rhizobioa and mycorrhyzae)				

	Study programme competences
Code	Study programme competences
A4	Skills to apply molecular techniques to the study of the plant cell physiology, its response to external triggers and their biotechnological
	applications.
A5	Skills of understanding the microorganisms' role as pathogenic agents and as biotechnological tools.
A6	Skills of understanding the functioning of cells through the structural organization, biochemistry, gene expression and genetic variability.
A8	Skills of having an integrated view of the previously acquired knowledge about Molecular and Cellular Biology and Genetics, with an
	interdisciplinary approach and experimental work.
В3	Skills of management of the information: that are able to gather and to understand relevant information and results, obtaining conclusions
	and to prepare reasoned reports on scientific and biotechnological questions
B5	Correct oral and written communication on scientific topics in the native language and at least in another International diffusion language.
В9	Skills of preparation, show and defense of a work.

Learning outcomes			
Learning outcomes	Study programme		ımme
	co	mpetend	ces
- To understand the molecular mechanisms of plant-pathogen interaction	AR4		
	AR5		
To know the different mechanisms of the plant response to pathogens.	AR4		
	AR5		
	AR6		
	AR8		
To understand and be able to use the experimental approaches to research in this field.	AR4	BR3	
	AR5	BR5	
Ability for critically reviewing scientific papers related to this subject.	AR5	BR3	
	AR6	BR5	
		BR9	

Contents		
Topic	Sub-topic	

Molecular mechanisms in plant-pathogen interaction.	Recognition of the plant by the pathogen and mechanism to attack the plant.
	Recognition of the pathogen by the plant amnd mechanisms of defense. Pathogen
	Associated Molecular Patterns (PAMPs). Oxidative burst. Salicylates, jasmonates and
	ethylene. Hypersensitive response. Gene-for-gene resistance. Nonhost resistance.
	Induced resistance to pathogens: SAR and ISR. Npr1. Priming. Transcription factors
	involved in resistance.
Other interactions related to plant-pathogen interaction.	Recognition of herbivores, signalling and defense mechanisms. Rhizobium-plant
	interaction. Mycorrhizae.

Methodologies / tests	Competencies	Ordinary class	Student?s personal	Total hours
		hours	work hours	
Guest lecture / keynote speech	A4 A5 A6 A8	12	24	36
Document analysis	A5 A6 B3 B5 B9	4	16	20
Laboratory practice	A4 A5 B3 B5	10	5	15
Objective test	A4 A5 A6 A8	3	0	3
Personalized attention		1	0	1

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

	Methodologies
Methodologies	Description
Guest lecture /	Lectures about main contents of the subject, supported by presentations and videos. Presentation is combined with critical
keynote speech	dialogue with the students about the topics.
Document analysis	Reading and analysis of a primary research paper related to the subject, accompanied by its presentation in the classroom by
	the student and further discussion with the lecturer and the other students.
Laboratory practice	Practicals related to the subject, consisting in experiments, followed by data analysis, discussion and writing of a report.
Objective test	Exam about the topics of the lectures.

	Personalized attention
Methodologies	Description
Document analysis	The students can attend, in the corresponding hours, to the lecturer's office to ask any question about the subject, and
	particularly about the work to do.

		Assessment	
Methodologies	Competencies	Description	Qualification
Guest lecture /	A4 A5 A6 A8	Attendance and participation in the lectures.	10
keynote speech			
Document analysis	A5 A6 B3 B5 B9	Aspects to be assessed: Proper understanding of the paper by the student, the	40
		presentation in the clasroom and the participation in the discussion in the clasroom	
		(including the critical review of the paper).	
Laboratory practice	A4 A5 B3 B5	Attendance and participation in the laboratory, as well as a written report.	20
Objective test	A4 A5 A6 A8	Exam about the topics in the lectures.	30

Assessment comments

The students who pass the subject in the first opportunity, will be prefentially considered to get the highest qualification (with honors).
