|--------------------------|---|--------|--|-----------|
| Identifying Data | | | | 2015/16 |
| Subject (*) | Biotecnoloxía animal | | Code | 610475304 |
| Study programme | Mestrado Universitario en Biotecnoloxía Avanzada | | | |
| Descriptors | | | | |
| Cycle | Period | Year | Type | Credits |
| Official Master's Degree | 2nd four-month period | First | Optativa | 3 |
| Language | Spanish | | | |
| Teaching method | Face-to-face | | | |
| Prerequisites | | | | |
| Department | Bioloxía Celular e Molecular | | | |
| Coordinador | Mendez Felpeto, Josefina | E-mail | josefina.mendez@udc.es | |
| Lecturers | Insua Pombo, Ana María Mendez Felpeto, Josefina | E-mail | ana.insua@udc.es josefina.mendez@udc.es | |
| Web | mba.uvigo.es/ | | | |
| General description | <p>Trátase dunha materia na que se pretende presentar aos alumnos os aspectos básicos de biotecnoloxía animal. Comprender os fundamentos de ferramentas moleculares para o estudo de genomas e como a través de marcadores moleculares poden ser identificadas especies, analizar poboacións desenvolver programas de mellora. Ademais de ferramentas e aplicación de tecnoloxías para o estudo da manipulación cromosómica e fertilización in vitro. Además de las herramientas y aplicación de las tecnologías para el estudio de la manipulación cromosómica y la fertilización in vitro.</p> <p>(Incorporación al POD de Dr Alberto Arias Pérez).</p> | | | |

| Study programme competences | |
|-----------------------------|--|
| Code | Study programme competences |
| A21 | Coñecer os recursos microbianos, vexetais e animais de interese biotecnolóxico así como as súas aplicacións na industria alimentaria e agropecuaria. |
| A24 | Coñecer as estratexias de producción e mellora de alimentos por métodos biotecnolóxicos. |
| B1 | Capacidade de análise e síntese (localización de problemas e identificación das causas e a súa tipoloxía). |
| B2 | Capacidade de organización e planificación de todos os recursos (humanos, materiais, información e infraestruturas). |
| B3 | Capacidade de xestión da información (con apoio de tecnoloxías da información e as comunicacións). |
| B4 | Capacidade de planificación e elaboración de estudios técnicos en biotecnoloxía microbiana, vexetal e animal. |
| B5 | Capacidade de identificar problemas, buscar solucións e aplicalas nun contexto biotecnolóxico profesional ou de investigación. |
| B6 | Capacidade de comunicación oral e escrita dos plans e decisións tomadas. |
| B7 | Capacidade para formular xuízos sobre a problemática ética e social, actual e futura, que propón a Biotecnoloxía. |
| B8 | Capacidade de comunicación eficazmente coa comunidade científica, profesional e académica, así como con outros sectores e medios de comunicación. |
| B9 | Capacidade de Traballo en equipo multidepartamental dentro da empresa. |
| B10 | Capacidade de Traballo nun contexto de sostibilidade, caracterizado por: sensibilidade polo medio ambiente e polos diferentes organismos que o integran así como concienciación polo desenvolvemento sostible. |
| B11 | Racionamento crítico e respecto profundo pola ética e a integridade intelectual. |
| B12 | Adaptación a novas situacións legais, ou novedades tecnolóxicas así como a excepcionalidades asociadas a situacións de urxencia. |
| B13 | Aprendizaxe autónoma. |
| B14 | Liderazgo e capacidade de coordinación. |
| B15 | Sensibilización cara á calidade, o respecto medioambiental e o consumo responsable de recursos e a recuperación de residuos. |

| Learning outcomes | | |
|--|-----------------------------|--|
| Learning outcomes | Study programme competences | |
| Knowing the opportunities offered by the development of animal biotechnology improvement programs .. | AC21 AC24 | |

| | |
|--|-------------------------------------|
| Possess knowledge of ethical and legal issues related to animal biotechnology. | BC7 BC11 BC12 |
| Promoting the ability to manage information (analysis and synthesis) related to animal biotechnology and transmission and effective communication of the same. | BC2 BC3 BC6 BC8 |
| Promoting the ability to identify problems and solutions as well as planning and technical studies within the field of animal biotechnology | BC1 BC4 BC5 |
| Promoting learning ability and adaptation to new situations and respectful work environment in the field of animal biotechnology. | BC9 BC10 BC13 BC14 BC15 |

| Contents | |
|---|--|
| Topic | Sub-topic |
| Genomics and its application in the exploitation of natural animal variability. | Structural and functional genomics. Animal genomes. Paradox of Value-C. Genomic regions and their variation. Gene identification. Linkage maps. |
| Breeding and marker-assisted selection | Molecular makers: types, characteristics, development and analysis. Selection of quantitative traits in animals. Detection and analysis of QTLs. Use of identified genes in genetic improvement. Genome-wide association studies. Genomic selection. |
| Control of reproduction and assisted reproductive technologies in animals. | In vitro fertilization and embryo production Micromanipulation of gametes and embryos Determination of sex. |
| Chromosome manipulation in fish and shellfish | Poliploidy. Gynogenesis. Androgenesis. Monosex populations. Production of clones. |

| Planning | | | | |
|--------------------------------|--|----------------------|-------------------------------|-------------|
| Methodologies / tests | Competencies | Ordinary class hours | Student's personal work hours | Total hours |
| Laboratory practice | A21 A24 B9 | 8 | 8 | 16 |
| Objective test | A21 A24 B1 B3 B4 B5 B6 | 0 | 7 | 7 |
| Supervised projects | A21 A24 B1 B2 B3 B6 B7 B8 B9 B10 B13 B14 | 0 | 8.5 | 8.5 |
| Guest lecture / keynote speech | A21 A24 B11 B12 B15 | 17 | 25.5 | 42.5 |
| Personalized attention | | 1 | 0 | 1 |

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies | |
|---------------------|---|
| Methodologies | Description |
| Laboratory practice | Visit a laboratory in which biotechnology tools used on reproduction in animals |
| Objective test | This test will be used to assess learning and knowledge, skills and abilities acquired in this field. |
| Supervised projects | Students perform in groups or individually a paper on some aspect of the matter |

| | |
|--------------------------------|--|
| Guest lecture / keynote speech | Presentations were made by the participants in the course in order to convey a general knowledge of the subject teachers. The exhibitions will be held by videoconference and dialogue between students and teachers will be encouraged. |
|--------------------------------|--|

Personalized attention

| Methodologies | Description |
|---------------------|---|
| Supervised projects | Custom and group tutorials are possible. Physically or via videoconference, for advice on jobs and view any subject matter. |

Assessment

| Methodologies | Competencies | Description | Qualification |
|--------------------------------|--|---|---------------|
| Laboratory practice | A21 A24 B9 B6 | Attendance at practices will be assessed. Students respond to questionnaires on practice-visits they make. Competencias avaliadas: A21, A24, B9 | 10 |
| Objective test | A21 A24 B1 B3 B4 B5 B6 | The objective test will allow the student to demonstrate mastery of the knowledge acquired on basic issues of matter. It will consist of several short questions about the contents explained by teachers. Competencias avaliadas: A21, A24, B6, B7, B8, B10, B12, B15 | 40 |
| Guest lecture / keynote speech | A21 A24 B11 B12 B15 | Attitude attendance and participation in the dialogues promoted by teachers will be evaluated. Competencias avaliadas: B6, B7, B10, B11, B12, B15 | 30 |
| Supervised projects | A21 A24 B1 B2 B3 B6 B7 B8 B9 B10 B13 B14 | Originality, degree of understanding of the subject matter, ability to synthesize and reviewed and consulted literature sources will be evaluated.. Competencias avaliadas: A21, A24, B1, B2, B3, B4, B5, B6, B7, B8, B11, B13, B14 | 20 |

Assessment comments

A realización da proba obxectiva e imprescindible para ser avaliado.

A Matrícula de Honra otorgarase preferentemente entre os alumnos que acaden polo menos 9 na primeira oportunidade.

Complementary

Recommendations

Subjects that it is recommended to have taken before

Enxeñaría xenética e transxénese/610475101

Enxeñaria Celular e Tisular/610475102

Xenómica e Proteómica/610475103

Subjects that are recommended to be taken simultaneously

Organización e xestión: xestión empresarial e xestión eficaz do laboratorio/610475201

Aspectos legais e éticos en Biotecnología/610475203

Análise de alimentos, seguridade alimentaria e trazabilidade/610475302

Subjects that continue the syllabus

Reproducción asistida/610475502

Other comments

It is recommended to have knowledge of English comprehension level of scientific information sources for the proper learning of skills of the subject.

(*)The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
