

Teaching Guide

Identifying Data				2015/16
Subject (*)	Evolución do Sistema Nervioso	Code	610490022	
Study programme	Mestrado Universitario en Neurociencia (Plan 2011)			
Descriptors				
Cycle	Period	Year	Type	Credits
Official Master's Degree	2nd four-month period	First	Optativa	3
Language	Spanish			
Teaching method	Face-to-face			
Prerequisites				
Department	Biología Celular e Molecular			
Coordinador	Castro Castro, Antonio Manuel	E-mail	antonio.castro@udc.es	
Lecturers	Castro Castro, Antonio Manuel Folgueira Otero, Mónica Manso Revilla, Maria Jesus Yañez Sanchez, Julian	E-mail	antonio.castro@udc.es m.folgueira@udc.es maria.jesus.manso@udc.es julian.yanez@udc.es	
Web	http://www.usc.es/gl/titulacions/masters_oficiais/neurosci/			
General description	Optional subject focused on the adaptive changes experienced by the nervous system and sensory organs during evolution.			

Study programme competences / results

Code	Study programme competences / results
A3	Explicar o proceso de cambio adaptativo do sistema nervioso dentro do marco evolutivo.
B4	Saiban ler e obter información relevante de publicacións científicas.
C1	Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.

Learning outcomes

Learning outcomes	Study programme competences / results		
To introduce students to the adaptive changes experienced by the nervous system during the course of evolution.	AR3	BR4	CR1 CR3
To introduce students to the adaptive changes experienced by sensory organs during evolution.	AR3	BR4	CR1 CR3

Contents

Topic	Sub-topic
Introduction.	1. Concept of evolution. 2. Considerations about evolution: phylogeny, ontogeny, analogy, homology. 3. Levels of organization. Design patterns in animals.
Evolution of the nervous system: from invertebrates to vertebrates.	4. Evolution of neurons. 5. Models of nervous systems. 6. Evolutionary changes of the basic structural units of the central nervous system. 7. Evolutionary changes of the functional circuits of the nervous system in vertebrates.
Evolution of sensory organs: from invertebrates to vertebrates.	8. Photoreception: Evolution of the visual system. 9. Chemoreception: Evolution of taste and olfactory systems. 10. Mechanoreception: Evolution of the ear and lateral line

Practicals	Students will observe under the microscope histological preparations of nervous system and sense organs from different species of vertebrates and invertebrates
------------	---

Planning

Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student's personal work hours	Total hours
Guest lecture / keynote speech	A3	20	30	50
Seminar	A3 B4 C1 C3	5	7	12
Laboratory practice	A3	5	5	10
Mixed objective/subjective test	A3 C1	2	0	2
Personalized attention		1	0	1

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

Methodologies	Description
Guest lecture / keynote speech	Teacher will present the main contents of the subject.
Seminar	During these sessions, students (individually or in pairs) will present the work they have carried out under the supervision of the professor. For preparing the seminars, students will use recent scientific reviews and other sources.
Laboratory practice	Students will observe under the microscope various histological preparations of nervous system and sense organs from different species of vertebrates and invertebrates.
Mixed objective/subjective test	Take a written and/or oral test will account for 50% of the final grade.

Personalized attention

Methodologies	Description
Seminar	Students (in person or online) can do any questions regarding the work they must carry out in the seminars or relating to the rest of the methodologies used.

Assessment

Methodologies	Competencies / Results	Description	Qualification
Seminar	A3 B4 C1 C3	Students must carry out and present a work in relation with the contents of the program.	45
Guest lecture / keynote speech	A3	In order to be evaluated, students must attend regularly throughout the course.	5
Mixed objective/subjective test	A3 C1	Take a written (test questions and/or short-answer questions) and/or oral test about the contents of the program.	50
