General description	This is a optional subject within the Specialization in Chemistry Master of Science, Technology and Environmental Management. Its main purpose is to provide students an overview of the latest topics of modern inorganic chemistry. This subject will focus on aspects related to the technological, industrial and medical application of inorganic compounds.					

Study programme competences / results	
Code	Study programme competences / results
A1	Coñecemento das realidades interdisciplinares da Química e do Medio Ambiente, dos temas punteiros nestas disciplinas e das perspectivas de futuro.
A2	Deseño de novas especies químicas e materiais con propiedades determinadas.
A3	Capacitar ao alumno para o desenvolvemento dun traballo de investigación nun campo da Química ou do Medio Ambiente, incluíndo os procesos de caracterización de materiais, o estudo das súas propiedades fisicoquímicas e biolóxicas e dos procesos que poden sufrir no medio natural.
A4	Coñecer en profundidade as características e fundamentos de diversos modelos químicos para o estudo de sistemas orgánicos, inorgánicos e biolóxicos, incluídos os materiais con proxección tecnolóxica.
A8	Coñecer os fundamentos das interaccións intermoleculares e as súas aplicacións no campo da catálise supramolecular, recoñecemento molecular e biocatálise.
A9	Coñecer algunas aplicacións básicas da química computacional e dos programas de cálculo más utilizados nos ámbitos da química e o medio ambiente.
A11	Coñecer as distintas técnicas experimentais e computacionais orientadas á caracterización de mecanismos de reacción.
A20	Coñecemento dos principais tipos de produtos naturais: enzimas, receptores moleculares, etc. Entender a súa participación en procesos de catálise e autoensamblaxe.
A22	Dominar as técnicas instrumentais de análises más típicas no ámbito químico profesional.
B1	Posuir e comprender coñecementos que acheguen unha base ou oportunidade de ser orixinais no desenvolvemento e/ou aplicación de ideas, a miúdo nun contexto de investigación.
B2	Que os estudiantes saibam aplicar os coñecementos adquiridos e a súa capacidade de resolución de problemas en contornas novas ou pouco coñecidos dentro de contextos más amplos (ou multidisciplinares) relacionados coa súa área de estudio.
B3	Que os estudiantes sexan capaces de integrar coñecementos e enfrentarse á complexidade de formular xuízos a partir dunha información que, sendo incompleta ou limitada, inclúa reflexións sobre as responsabilidades sociais e éticas vinculadas á aplicación dos seus coñecementos e suizos.
B5	Que os estudiantes posúan as habilidades de aprendizaxe que lles permitan continuar estudiando dun modo que haberá de ser en gran medida autodirixido ou autónomo.
B6	Ser capaz de analizar datos e situacións, xestionar a información dispoñible e sintetizala, todo iso a un nivel especializado.

B7	Ser capaz de planificar adecuadamente desenvolvimentos experimentais, a un nivel especializado.
C1	Ser capaz de traballar en equipos, especialmente nos interdisciplinares e internacionais.
C3	Ser capaz de adaptarse a situacións novas, mostrando creatividade, iniciativa, espírito emprendedor e capacidade de liderado.
C4	Expresarse correctamente, tanto de forma oral coma escrita, nas lingua s oficiais da comunidade autónoma.
C5	Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro.
C6	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C9	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse.
C11	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.

Learning outcomes			
Learning outcomes		Study programme competences / results	
Understand the main topic of the nanochemistry field, its applications and future prospects for nanomaterials.		AC1 AC2 AC3 AC22 BC5 BC6 BC7	BC1 BC2 BC3 CC4 CC5 CC6 CC11
Understand the relevance of inorganic species and new materials with technological applications, industrial and medical.		AC1 AC2 AC3 AC4 AC9 AC22	BC1 BC2 BC3 CC4 CC5 BC7 CC11
Know the fundamentals of Supramolecular Chemistry.		AC2 AC8 AC20	BC2 BC3 CC3 CC4 CC5 CC11
Know different advanced techniques of characterization and modeling of inorganic species.		AC8 AC9 AC11 AC22	BC3 BC5 BC6 CC5 CC9

Contents	
Topic	Sub-topic
1.- Nanochemistry and nanomaterials	- General introduction. basic principles - Design, preparation and characterization of nanomaterials - Properties of nanomaterials - Applications
2.- Supramolecular chemistry	Supramolecular Chemistry. Molecular recognition and soft-assambly. Hydrogen bond.
3.- Inorganic species and new materials with technological applications, industrial and medical	Overview of different topics of activity in the field of "Advanced Materials": thermoelectric materials, magnetoresistivity, fuel cells, dielectric materials, MOFs, etc.. main applications Sensors photophysical: selective recognition of anions and metabolites. Contrast agents RMI. Selective Extraction.

4.- Advanced techniques of characterization and modeling of inorganic species	-Absorption spectroscopy and electron emission in molecular recognition.
Practical program	- Databases and bibliographic resources
1. - Seminar: bibliographic resources.	
2. Synthesis and characterization of nanomaterials	- Synthesis and characterization of magnetic nanoparticles, MOFs, etc
3. - Properties photophysics groups of chromophores and fluorophores in recognition of substrates.	- Determination of the association constant-receptor substrate by spectroscopic methods.
4. - Selective extraction of inorganic salts.	- Conformational study in solution using techniques espectralcópicas.

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student's personal work hours	Total hours
Guest lecture / keynote speech	C4 C6 C11	20	20	40
Case study	A1 A3 A4 A9 A20 B1 B2 B3 B5 B6 C3 C1 C4 C5 C6 C9 C11	10	10	20
Supervised projects	A1 A3 A4 A9 A20 B1 B2 B5 B6 C4 C5 C6 C9 C11	0	20	20
Seminar	A1 A3 A4 A9 A20 B1 B2 B5 B6 C4 C5 C6 C9 C11	8	20	28
Laboratory practice	A1 A2 A3 A4 A8 A9 A11 A22 B1 B2 B5 B6 B7 C9 C11	10	10	20
Objective test	A1 A3 A4 A8 A20 B1 B2 B5 B6 C4 C5 C9 C11	2	18	20
Personalized attention		2	0	2

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	In these lectures the teacher will present the contents of the different themes, emphasizing their main aspects.
Case study	There will be taught in very small groups of students, and they shall be written and developed experiments, calculations or treatment procedures and data analysis, and interpreted the results.
Supervised projects	There will be complement to the lectures and the workshops and seminars. Also, there will be carried out through the use of ICTs.
Seminar	There will be taught in small groups. This methodology is designed to enforcement activities of the theoretical and resolution of issues, discussion sessions and directed discussion, problems, cases, etc..
Laboratory practice	In addition to the lectures sessions will be held practice sessions of laboratory work.
Objective test	This test will be used to assess the degree of acquisition of skills by students as well as to point out those aspects of the subject that present greater difficulty.

Personalized attention	
Methodologies	Description

Guest lecture / keynote speech	There will be tutorial sessions to supervise: case study, supervised project, seminar and laboratory sessions.
Case study	These tutorials are configured as individual interviews to allow a continuation of the work and guidance of students for a clear definition of the objectives and prevent the spread of content thereby ensuring that they achieve the competencies described in the matter.
Supervised projects	
Seminar	
Laboratory practice	

Assessment				
Methodologies	Competencies / Results	Description	Qualification	
Case study	A1 A3 A4 A9 A20 B1 B2 B3 B5 B6 C3 C1 C4 C5 C6 C9 C11	Assessed the degree of the practical work, as well as other reports that students will have to issue. A: 1,3,4,9,20 B: 1,2,5,6 C: 4,5,6,9,11	20	
Supervised projects	A1 A3 A4 A9 A20 B1 B2 B5 B6 C4 C5 C6 C9 C11	Evaluate the work done by students in accordance with the planning section. A: 1,3,4,9,20 B: 1,2,5,6 C: 4,5,6,9,11	20	
Seminar	A1 A3 A4 A9 A20 B1 B2 B5 B6 C4 C5 C6 C9 C11	Evaluate the participation and the level of knowledge demonstrated by students. A: 1,3,4,9,20 B: 1,2,5,6 C: 4,5,6,9,11	10	
Objective test	A1 A3 A4 A8 A20 B1 B2 B5 B6 C4 C5 C9 C11	It will be a test to be held at the end of the semester. This test consists in the development of a case study, related to content covered during the course. A: 1,3,4,8,20 B: 1,2,5,6 C: 4,5,9,11	30	
Laboratory practice	A1 A2 A3 A4 A8 A9 A11 A22 B1 B2 B5 B6 B7 C9 C11	The teacher will evaluate the student's experimental work, in particular with regard to the planning, organization, expertise and analysis of results. A: 1,2,3,4,8,9,11,22 B: 1,2,5,6,7 C: 4,5,9,11	20	

Assessment comments

Para superar a materia o alumnado deberá sumar un mínimo de 50 puntos (sobre un máximo de 100) entre as diferentes actividades availables, así como obter unha cualificación mínima de 15 puntos (sobre 30) na proba obxectiva.

Sources of information

Basic	Posto que se trata dunha materia multidisciplinar e que presentará aspectos relacionados coa Química Inorgánica más actual, non existen libros de texto axeitados. A bibliografía será proporcionado polo profesorado ao principio do curso, e consistirá en publicacións científicas, normalmente en forma de ?reviews?, así como fragmentos escollidos de libros especializados.
Complementary	

Recommendations

Subjects that it is recommended to have taken before

Subjects that are recommended to be taken simultaneously

Subjects that continue the syllabus

Other comments

To address guaranteed the study of this subject is recommended that students possess the knowledge of the chemistry own degree degree in Chemistry.
