

Teaching Guide				
Identifying Data				2015/16
Subject (*)	Fisioloxía vexetal: Fisioloxía vexetal I	Code	610G02027	
Study programme	Grao en Bioloxía			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	1st four-month period	Second	Obligatoria	6
Language	Spanish			
Teaching method	Face-to-face			
Prerequisites				
Department	Bioloxía Animal, Bioloxía Vexetal e Ecoloxía			
Coordinador	Silvar Pereiro, Cristina	E-mail	c.silvar@udc.es	
Lecturers	Bernal Pita da Veiga, angeles Diaz Varela, Jose Pomar Barbeito, Federico Silvar Pereiro, Cristina Veloso Freire, Javier	E-mail	angeles.bernal@udc.es jose.diaz.varela@udc.es federico.pomar@udc.es c.silvar@udc.es javier.veloso@udc.es	
Web				
General description	Entre las disciplinas en las que el biólogo puede ejercer su profesión está la Fisiología Vegetal, la ciencia que estudia como funcionan las plantas. Esta asignatura pretende proporcionar conocimientos y habilidades relativos a esta ciencia, así como una actitud positiva ante ella.			

Study programme competences / results	
Code	Study programme competences / results
A8	Illar, analizar e identificar biomoléculas.
A18	Levar a cabo estudos de produción e mellora animal e vexetal.
A26	Deseñar experimentos, obter información e interpretar os resultados.
A29	Impartir coñecementos de Bioloxía.
A30	Manexar adecuadamente instrumentación científica.
A31	Desenvolverse con seguridade nun laboratorio.
B1	Aprender a aprender.
B2	Resolver problemas de forma efectiva.
B3	Aplicar un pensamento crítico, lóxico e creativo.
B5	Traballar en colaboración.
B7	Comunicarse de maneira efectiva nunha contorna de traballo.
B8	Sintetizar a información.
B13	Comportarse con ética e responsabilidade social como cidadán e como profesional.

Learning outcomes			
Learning outcomes		Study programme competences / results	
To be able to prepare and present a topic in the field of Plant Physiology	A18	B1	
	A29	B8	
To have an updated knowledge about the mechanisms regarding how plants work and their regulation	A29		
To be able to carry out basic experiments in the field of Plant Physiology	A8	B2	
	A26		
	A29		
	A30		
	A31		

To have a critical and constructive attitude about Plant Physiology		B3 B13
To be able to work in group to solve questions about Plant Physiology topics.		B1 B2 B5 B7

Contents	
Topic	Sub-topic
I. INTRODUCTION	Topic 1.- INTRODUCTION TO PLANT PHYSIOLOGY. Topic 2.- THE PLANT CELL.
II. WATER BALANCE AND MINERAL NUTRITION	Topic 3.- WATER BALANCE IN THE CELL. Topic 4.- ABSORPTION AND TRANSPORT OF WATER. Topic 5.- TRANSPIRATION. Topic 6.- MINERAL NUTRITION. Topic 7.- ABSORPTION AND TRANSPORT OF MINERAL NUTRIENTS. Topic 8.- NITROGEN METABOLISM (I). Topic 9.- NITROGEN METABOLISM (II). Topic 10.- SULPHUR METABOLISM. Tema 11.- METABOLISMO SECUNDARIO.
III. PHOTOSYNTHESIS	Topic 12.- INTRODUCTION TO PHOTOSYNTHESIS. CLOROPLASTS. Topic 13.- PHOTOSYNTETIC PIGMENTS AND THE LIGHT ABSORBING SYSTEM. Topic 14.- ELECTRON TRANSPORT AND PHOTOPHOSPHORYLATION. Topic 15.- THE CALVIN-BENSON CYCLE. Topic 16.- PHOTORESPIRATION. Topic 17.- OTHER ROUTES FOR ASSIMILATION OF PHOTOSYNTETIC CO2 Topic 18.- TRANSLOCATION IN THE PHLOEM.
Practical work	Lab session 1.-Determination of water potentials Lab session 2.-Induction of nitrate reductase in maize. Lab session 3.-Quantification of photosynthetic pigments. Lab session 4.-Identification of photosynthetic pigments. Lab session 5.- Photosynthesis by isolated chloroplasts.

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A8 A18 A29 B1 B8 B13	28	70	98
Laboratory practice	A8 A26 A30 A31 B2 B3 B5 B7 B13	15	15	30
Seminar	A18 A29 B1 B2 B3 B5 B7 B8 B13	4	10	14
Mixed objective/subjective test	A8 A18 A26 A29 A30 A31	4	0	4
Personalized attention		4	0	4

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description

Guest lecture / keynote speech	Lectures. Oral presentation of topics including Power Point presentations, videos and/or blackboard explanations. During the lecture some questions about the topic can be asked to the student to favour learning.
Laboratory practice	Practical activities in the laboratory.
Seminar	Seminars. Interactive study of one or several topics in a small group (ca. 10 students) tutorial session.
Mixed objective/subjective test	Final written exam with a theoretical and a practical part.

Personalized attention

Methodologies	Description
Seminar	Seminars. Interactive study of one or several topics in a small group (ca. 10 students) tutorial session. Moreover, the students can ask any question about the topics of the course.

Assessment

Methodologies	Competencies / Results	Description	Qualification
Mixed objective/subjective test	A8 A18 A26 A29 A30 A31	Exam about theoretical knowledge (70% of the exam) and the practicals (20% of the exam).	90
Seminar	A18 A29 B1 B2 B3 B5 B7 B8 B13	The activities carried out by the students during the seminar sessions will be assessed continuously by the professor.	10
Others			

Assessment comments

The qualification assessment will have two parts:

1) Theoretical part of the course, including two methodologies:

"Seminario" ("seminar") and the theoretical part of "proba mixta" (final exam).

2) Practical part of "proba mixta" (final exam).

To get a pass a student has to get a minimum of 4 points out of 10 in the Theoretical part of the course and a minimum of 4 points out of 10 in the Practical part. Moreover, a minimum of 4 points out of 10 has to be got in in the theoretical part of the "proba mixta" and also in the practical part of the "proba mixta". Moreover, in order to get the pass, the average/mean of the different parts and methodologies has to be at least 5 points out of 10. If the student got a mean equal or higher than 5 points but he/she got less than 4 points in any of the parts of the assessment and/or "proba mixta" indicated above, the final score will be 4.9 (fail).

In the second opportunity of assessment (July) it is only possible to repeat the "proba mixta", because the score of "Seminario" ("seminar") will be the same as obtained in the first opportunity. If the student has got a fail in the first opportunity, and the score of one of the parts (theoretical or practical) of the "proba mixta" is 5 or higher, such score will be kept in the second opportunity, repeating only the other part of "proba mixta". However, the student can instead repeat the whole "proba mixta", providing he/she tells the professor in advance.

Attendance to practicals is compulsory. If a student does not attend to one or two sessions of the practicals, he/she will have a penalty of one and two points, respectively, to be subtracted from the score of the "proba mixta".

If the student does not attend to three or more sessions of the practicals, he/she will get a fail as the final score in the course.

The students that do not carry out the "proba mixta" will be qualified as "NO PRESENTADO".
