

Teaching Guide				
Identifying Data			2015/16	
Subject (*)	Validación y Verificación del Software	Code	614G01053	
Study programme	Grao en Enxeñaría Informática			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	1st four-month period	Fourth	Obligatoria	6
Language	Spanish			
Teaching method	Face-to-face			
Prerequisites				
Department	Computación			
Coordinador	Castro Souto, Laura Milagros	E-mail	laura.milagros.castro.souto@udc.es	
Lecturers	Cabalar Fernandez, Jose Pedro Castro Souto, Laura Milagros Perez Vega, Gilberto	E-mail	pedro.cabalar@udc.es laura.milagros.castro.souto@udc.es gilberto.pvega@udc.es	
Web	moodle.udc.es			
General description	<p>This subject is intended to master the current solutions in Software Engineering for the validation and verification of software. This includes:</p> <ul style="list-style-type: none"> - knowledge of functional and non-functional techniques and tools for software validation at all levels (unit, integration, system); - knowledge of techniques and tools for automatic reasoning; and - knowledge of techniques and tools for formal verification. 			

Study programme competences / results	
Code	Study programme competences / results
A28	Capacidade de identificar e analizar problemas, e deseñar, desenvolver, implementar, verificar e documentar solucións s'oftware sobre a base dun coñecemento adecuado das teorías, modelos e técnicas actuais.
B1	Capacidade de resolución de problemas
B3	Capacidade de análise e síntese
C2	Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.
C7	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.
C8	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.

Learning outcomes																		
Learning outcomes			Study programme competences / results															
Ability to identify and analyse problems, and to design, develop, implement, validate and document software solutions on the basis of an deep understanding and knowledge of modern theories, models and techniques.			<table border="1"> <tr> <td>A28</td> <td>B1</td> <td>C2</td> </tr> <tr> <td></td> <td>B3</td> <td>C3</td> </tr> <tr> <td></td> <td></td> <td>C6</td> </tr> <tr> <td></td> <td></td> <td>C7</td> </tr> <tr> <td></td> <td></td> <td>C8</td> </tr> </table>	A28	B1	C2		B3	C3			C6			C7			C8
A28	B1	C2																
	B3	C3																
		C6																
		C7																
		C8																

Contents	
Topic	Sub-topic

Part I: Software Validation	<p>I.1 Test specification, design and execution</p> <p>I1.1. Levels and types of tests</p> <p>I1.2. Properties and traceability of requirements</p> <p>I.2 Test management: planning, assessment, metrics and reviews</p>
Part II: Formal methods and automatic reasoning	<p>II.1 Introduction: natural deduction and calculus of sequences</p> <p>II.2 Automatic proofs using PVS</p> <p>II.3 What is a theorem prover and what is it used for?</p> <p>II.4 PVS specification language: types, expressions, theories, subtyping</p> <p>II.5 PVS prover: tactics, recursion, equational reasoning</p>
Part III: Model checking	<p>III.1 Introduction to modal temporal logic</p> <p>III.2 Properties specification: deadlocks, safety, liveness, fairness</p> <p>III.3 How a model checker works</p> <p>III.4 Introduction to the use of a model checking tool</p>

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student's personal work hours	Total hours
Guest lecture / keynote speech	B3 C2 C7 C8	21	26.25	47.25
Laboratory practice	A28 B1 B3 C2 C3 C6	14	35	49
Supervised projects	A28 B1 B3 C2 C3 C6	7	7	14
Objective test	B1 B3 C6	3	31.5	34.5
Personalized attention		5.25	0	5.25

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Master class where the theoretical contents of the study programme are presented.
Laboratory practice	Hands-on work sessions in the lab.
Supervised projects	Student assignments to be done during reduced-group classes.
Objective test	Written test.

Personalized attention	
Methodologies	Description
Objective test Supervised projects Guest lecture / keynote speech Laboratory practice	Questions/answers about the theoretical/practical aspects of the subjects, during the corresponding office hours of each teacher.

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Objective test	B1 B3 C6	Written test, up to a maximum of 4 points in the final score. A minimum of 2 points is required to pass.	40
Supervised projects	A28 B1 B3 C2 C3 C6	Presentation and participation in student assignments, performed during reduced-group classes, up to a maximum of 2 points in the final score. These are not compulsory to pass.	20
Laboratory practice	A28 B1 B3 C2 C3 C6	Hand in and presentation of hands-on student assignments, up to a maximum of 4 points in the final score. These are not compulsory to pass.	40

Assessment comments

Those students who do not reach the minimum in the objective test, will be qualified with the qualification they obtain in that objective test.

In the second opportunity, the objective test may include a specific evaluation of the laboratory practice.

In compliance with the academic rules at UDC that apply to part-time students, physical presence in the classroom/laboratory will not be regarded as qualification element. That is to say, students may officially apply to be dismissed from attending lectures and laboratory practices. All in all, part-time students will still need to comply with deadlines established for supervised projects and laboratory projects.
