| General description      |   |        |  |         |

| Study programme competences |   |
|-----------------------------|---|
| Code                        | Study programme competences   |
| A1                          | Set up and conduct tests using the techniques of thermal analysis and rheology most appropriate in each case, within the scope of complex materials   |
| A2                          | Identify and evaluate the different types of complex materials  |
| B2                          | The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or multidisciplinary) contexts related to their field of study |
| B4                          | That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non specialized audience in a clear and unambiguous way             |
| B8                          | Applying a critical, logical and creative way of thinking   |
| B13                         | Analysis-oriented attitude  |
| B21                         | To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society  |
| C2                          | Have a good command of spoken and writing expression and understanding of a foreign language.   |
| C6                          | Critically assessing the knowledge, technology and information available to solve the problems they face with.  |
| C7                          | To assume as a professional and citizen the importance of learning throughout life.   |

| Learning outcomes   |  |                             |   |
|---|--|-----------------------------|---|
| Learning outcomes   |  | Study programme competences |   |
| Determining what type of rheometer is appropriate depending on the material |  | AR2                         | BR2<br>BR8<br>BR13<br>BR21<br>CR6<br>CR7        |
| To distinguish between different viscoelastic behavior.                     |  | AR2                         | BR4<br>BR8<br>BR13<br>BR21<br>CR2<br>CR6<br>CR7 |
| Properly set up the test conditions.  |  | AR1<br>AR2                  | BR2<br>BR8<br>BR13                              |

| Objective test                 | A1 A2 B2 B4 B8 B13<br>C2        | 1                    | 0                             | 1           |
| Personalized attention         |                                 | 5                    | 0                             | 5           |

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies                  |  |
|--------------------------------|--|
| Methodologies                  | Description  |
| Guest lecture / keynote speech | Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical issues.  |
| Laboratory practice            | Performance of practical activities such as demonstrations, exercises, experiments, research, etc..  |
| Supervised projects            | Activities whose purpose is that the students enlarge the study of ther topics pesented in each theme and consolidate their acquired knowledge and capabilities. These activities should aslo help the students learn and improve their capabilities in literature survey. |
| Objective test                 | Exam that will help to evaluate the knowledge and competencies acquired by the students.   |

| Personalized attention   |  |
|--|--|
| Methodologies  | Description  |
| Guest lecture / keynote speech<br>Laboratory practice<br>Supervised projects<br>Objective test | The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours of tutoring of the teacher. |

| Assessment                     |                 |  |               |
|--------------------------------|-----------------|--|---------------|
| Methodologies                  | Competencies    | Description  | Qualification |
| Guest lecture / keynote speech | A1 A2 B21 C6 C7 | Continuous assessment through monitoring of student work in the classroom, laboratory and / or tutorials | 10            |
| Laboratory practice            | A1 B2 B8 B13    | Continuous assessment through monitoring of student work in the classroom, laboratory and / or tutorials | 10            |

|                     |                                 |  |    |
|---------------------|---------------------------------|--|----|
| Supervised projects | A1 A2 B2 B4 B8 B13<br>B21 C2 C6 | Activities whose purpose is that the students enlarge the study of their topics presented in each theme and consolidate their acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in literature survey. | 60 |
| Objective test      | A1 A2 B2 B4 B8 B13<br>C2        | Examination or objective test.   | 20 |
