General description	This course is an introduction to tead	ching the fundamentals of f	low and deformation of co	omplex fluids (eg, structured fluid
	materials at different scales). The co	ourse objective is to develop	p an understanding of the	physics of the rheology of
	complex fluids by teaching important	t conceptual issues, experi	mental practices and basi	c data analysis.

	Study programme competences
Code	Study programme competences
A1	Set up and conduct tests using the techniques of thermal analysis and rheology most appropriate in each case, within the scope of complex materials
A3	Knowing the different types of thermal and rheological behaviors of the materials
B1	Knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often in a research context
B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or multidisciplinary) contexts related to their field of study
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non specialized audience in a clear and unambiguous way
B8	Applying a critical, logical and creative way of thinking
B12	Communicate effectively in the work environment
B13	Analysis-oriented attitude
B14	Ability to find and manage the information
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C4	Developing for the exercise of an open, educated, critical, committed, democratic and solidary citicenship, able to analyze reality, diagnose problems, formulate and implement solutions based on knowledge and oriented to the common good.
C6	Critically assessing the knowledge, technology and information available to solve the problems they face with.
C7	To assume as a professional and citizen the importance of learning throughout life.

		BR14		

Contents	
Topic	Sub-topic Sub-topic
Fundamentals of rheology and viscoelasticity.	
2. Rheometry	
3. Rheology of dispersed media	
4. Industrial applications of complex materials.	

Planning				
Methodologies / tests	Competencies	Ordinary class	Student?s personal	Total hours
		hours	work hours	
Guest lecture / keynote speech	A3 B1 C6 C7	18	18	36
Laboratory practice	A1 B2 B4 B8 B13	20	10	30
Supervised projects	B12 B14 C2 C4	5	50	55
Objective test	A3 B4 B8 B13 B14 C2	2	0	2
Personalized attention		2	0	2

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies		
Methodologies	Description	
Guest lecture /	Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical	
keynote speech	issues.	
Laboratory practice	Performance of practical activities such as demonstrations, exercises, experiments, research, etc	
Supervised projects	Activities whose purpose is that the students enlarge the study of ther topics pesented in each theme and consolidate their	
	acquired knowledge and capabilities. These activities should aslo help the students learn and improve their capabilities in	
	literature survey.	
Objective test	Exam that will help to evaluate the knowledge and competencies acquired by the students.	

Personalized attention		
Methodologies	Description	
Guest lecture /	The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours	
keynote speech	of tutoring of the teacher.	
Laboratory practice		
Supervised projects		
Objective test		

		Assessment		
Methodologies Competencies		Description	Qualification	
Guest lecture / keynote speech	A3 B1 C6 C7	Continuous assessment through monitoring of student work in the classroom, laboratory and / or tutorials	10	
Laboratory practice	A1 B2 B4 B8 B13	Continuous assessment through monitoring of student work in the classroom, laboratory and / or tutorials	10	
Supervised projects	B12 B14 C2 C4	Activities whose purpose is that the students enlarge the study of ther topics pesented in each theme and consolidate their acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in literature survey.	30	
Objective test	A3 B4 B8 B13 B14 C2	Examination or objective test.	50
