Identifying Data				
				2015/16
Subject (*)	Física da Materia Branda, Interfaces	Code	730495013	
Study programme	Mestrado Universitario en Materiais Complexos: Análise Térmica e Reoloxía (plan 2012)			
Descriptors				
Cycle	Period	Year	Type	Credits
Official Master's Degree	1st four-month period	First	Obligatoria	3
Language				
Teaching method	Face-to-face			
Prerequisites				
Department				
Coordinador		E-mail		
Lecturers		E-mail		
Web				
General description	This course introduces the fundamental concepts of colloids and interfaces of science by covering the central aspects of the basic concepts for the understanding of structural phenomena and adhesion in complex fluids			

Study programme competences / results

Code	Study programme competences / results
A1	Set up and conduct tests using the techniques of thermal analysis and rheology most appropriate in each case, within the scope of complex materials
A2	Identify and evaluate the different types of complex materials
A3	Knowing the different types of thermal and rheological behaviors of the materials
A5	Understanding the relationships between structure and properties of materials
B1	Knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often in a research context
B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or multidisciplinary) contexts related to their field of study
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non specialized audience in a clear and unambiguous way
B8	Applying a critical, logical and creative way of thinking
B9	To work autonomously with initiative
B12	Communicate effectively in the work environment
B13	Analysis-oriented attitude
B21	To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C6	Critically assessing the knowledge, technology and information available to solve the problems they face with.
C7	To assume as a professional and citizen the importance of learning throughout life.
C8	To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.

Learning outcomes

Learning outcomes	Study programme competences / results

To know and understand both theoretical and practical aspects related to soft matter. Acquire knowledge of fundamental concepts related to colloids and interfaces physics and physical chemistry of complex fluids. Understanding the various structural phenomena in complex fluids.	AR1	BR1	CR2
	AR2	BR2	CR6
	AR3	BR4	CR7
	AR5	BR8	CR8
		BR9	
		BR12	
		BR13	
		BR21	

Contents	
Topic	Sub-topic
Intermolecular interactions and forces at the molecular level	
Surfactants, micelles, emulsions, membranes	
Effects resulting from interactions	

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A3 A5 B1 B2 B21 C6	9	15	24
Laboratory practice	A1 A2 B8 B9 B13 C8 C7	15	5	20
Supervised projects	B4 B9 B12 B13 B21 C2	5	25	30
Personalized attention		1	0	1

(*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical issues.
Laboratory practice	Performance of practical activities such as demonstrations, exercises, experiments, etc..
Supervised projects	Activities whose purpose is that the students enlarge the study of the topics presented in the program and consolidate their acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in literature survey.

Personalized attention	
Methodologies	Description
Guest lecture / keynote speech	The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours of tutoring of the professor.

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Guest lecture / keynote speech	A3 A5 B1 B2 B21 C6	Examination or objective test.	50
Laboratory practice	A1 A2 B8 B9 B13 C8 C7	Continuous assessment through monitoring of student work in the classroom, laboratory and / or tutorials	20

Supervised projects	B4 B9 B12 B13 B21 C2	Presentation (oral and written) of the supervised work.	30
