General description				

Study programme competences / results	
Code	Study programme competences / results
A5	Understanding the relationships between structure and properties of materials
A7	Knowing the different types of thermal thermo-mechanical behaviors in materials subjected to fatigue
B1	Knowledge and understanding to provide a basis or opportunity for originality in developing and / or applying ideas, often in a research context
B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or multidisciplinary) contexts related to their field of study
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non specialized audience in a clear and unambiguous way
B8	Applying a critical, logical and creative way of thinking
B9	To work autonomously with initiative
B13	Analysis-oriented attitude
B14	Ability to find and manage the information
B21	To assess the importance of research, innovation and technological developments in the socio-economic and cultural progress of society
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C6	Critically assessing the knowledge, technology and information available to solve the problems they face with.
C7	To assume as a professional and citizen the importance of learning throughout life.
C8	To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.

Learning outcomes			
Learning outcomes	Study programme competences / results		
The course provides a thorough treatment of the mechanics of continuous media for fluids and solids. The aim is to present the different mechanical behavior of matter in the continuous limit. Newton's laws of motion in media with strong performance (elasticity) and / or fluid is applied.	AR5 AR7	BR1 BR2 BR4 BR8 BR9 BR13 BR14 BR21	CR2 CR6 CR7 CR8

Contents

Topic	Sub-topic
1. Introduction to elastic modulus (Young's modulus, shear modulus, bulk modulus, ...) of a solid and a fluid viscosities	
2. Description of the displacement field in an elastic body, and velocity field in a fluid	
3. Expression of elastic energy in linear elasticity, and the rate of viscous fluid in dedisipación	
4. Description of the different apparatus for measuring or viscous elastic properties (or both) of a medium.	

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A5 A7 B1 B9 B14 B21	10	18	28
Laboratory practice	B2 B4 B8 B13 C8	20	20	40
Supervised projects	B9 B13 B14 C2 C6 C7 C8	5	25	30
Personalized attention		2	0	2
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Presentation given by the professor, on a schematic basis, focusing on the main topics, covering both theoretical and practical issues.
Laboratory practice	Performance of practical activities such as demonstrations, exercises, experiments, etc..
Supervised projects	Activities whose purpose is that the students enlarge the study of the topics pesented in the program and consolidate their acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in literature survey.

Personalized attention	
Methodologies	Description
Guest lecture / keynote speech	The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours of tutoring of the professor.

Assessment			
Methodologies	Competencies / Results	Description	**Qualification**
Guest lecture / keynote speech	A5 A7 B1 B9 B14 B21	Examination or objective test.	50
Laboratory practice	B2 B4 B8 B13 C8	Continuous assessment through monitoring of student work in the classroom, laboratory and / or tutorials.	20
Supervised projects	B9 B13 B14 C2 C6 C7 C8	Presentation (oral and written) of the supervised work.	30
