

Teaching Guide

Identifying Data				2015/16	
Subject (*)	Microbioloxía Molecular	Code	610441010		
Study programme	Mestrado Universitario en Bioloxía Molecular , Celular e Xenética				
Descriptors					
Cycle	Period	Year	Type	Credits	
Official Master's Degree	2nd four-month period	First	Optativa	3	
Language	Spanish				
Teaching method	Face-to-face				
Prerequisites					
Department	Bioloxía Celular e Molecular				
Coordinador	Cid Blanco, Angeles	E-mail	angeles.cid@udc.es		
Lecturers	Bou Arévalo, Germán Cid Blanco, Angeles Poza Domínguez, Margarita Tomás Carmona, M ^º del Mar	E-mail	GermanBou@canalejo.org angeles.cid@udc.es Margarita.Poza.Dominguez@sergas.es MA.del.Mar.Tomas.Carmona@sergas.es		
Web					
General description	PENDIENTE DE INCLUIR POR LOS SERVICIOS DE GADU LOS SIGUIENTES PROFESORES DEL INIBIC: Germán Bou Arévalo (germanbou@canalejo.org) Margarita Poza Domínguez (Margarita.Poza.Dominguez@sergas.es) M ^º del Mar Tomas Carmona (MA.del.Mar.Tomas.Carmona@sergas.es)				

Study programme competences / results

Code	Study programme competences / results
A1	Skills of using usual techniques and instruments in the cellular, biological and molecular research: that are able to use techniques and instruments as well as understanding potentials of their uses and applications.
A2	Skills of working in a sure way in the laboratories knowing operation handbooks and actions to avoid incidents of risk.
A5	Skills of understanding the microorganisms' role as pathogenic agents and as biotechnological tools.
B1	Analysis skills to understand biological problems in connection with the Molecular and Cellular Biology and Genetics.
B2	Skills of decision making for the problem solving: that are able to apply theoretical knowledges and practical acquired in the formulation of biological problems and the looking for solutions.
B3	Skills of management of the information: that are able to gather and to understand relevant information and results, obtaining conclusions and to prepare reasoned reports on scientific and biotechnological questions
B4	Organization and work planning skills: that are able to manage the use of the time as well as available resources and to organize the work in the laboratory.
B5	Correct oral and written communication on scientific topics in the native language and at least in another International diffusion language.
B7	Personal progress skills : that are able to learn from freelance way, adapting to new situations, developing necessary qualities as the creativity, skills of leadership, motivation for the excellence and the quality.
B8	Critical reasoning skills and ethical commitment with the society: sensitivity in front of bioethical problems and to the ones related to the natural resource conservation
B9	Skills of preparation, show and defense of a work.
C3	Skills of Using basic tools of the information technologies and communications (ICT) necessary to the exercise of his profession and for the apprenticeship over his life.
C4	Skills of take place for the exercise of an open citizenship, highbrow, critic, committed, democratic and solidary, able to analyze the reality, diagnosing problems, formulating and to implement solutions based on the knowledge and oriented to common good.
C5	Understanding the importance of the enterprising culture and to know means within reach of enterprising people.
C6	Considering critically the knowledge, technologies and the available information to solve problems with which should face.
C7	Assuming as a professional and citizen the importance of the apprenticeship over the life.
C8	Considering the importance that the investigation has, the innovation and the technological development in the socioeconomic advance and cultural of the society.

Learning outcomes			
Learning outcomes	Study programme competences / results		
Understand the microbial cooperative behavior and the interactions of micro-organisms with other living beings at the molecular level	AR5	BR5 BR7 BR8	CC6 CC7 CC8
Handle the techniques and understand the molecular basis of the fight against infections and resistance mechanisms	AR1 AR2 AR5	BR1	CC4 CC7 CC8
Apply the molecular knowledge to understanding and solving problems		BR1 BR2 BR3 BR4 BR7 BR8 BR9	CC3 CC4 CC5 CC6 CC7 CC8

Contents	
Topic	Sub-topic
Microbial cooperative behaviour	-Molecular basis for the cooperation -Practical implications
Microbial interactions	-Positive and negative interactions -Molecular basis of the interactions with other microorganisms, plants or animals
Biotechnological applications	-Practical applications of the microbial molecular interactions
Mechanisms of resistance to antimicrobial agents	-Enzymes degrading antimicrobial agents -Expulsion pumps -Modification of targets -Regulation of porins
Practical study of different aspects involved in the resistance to antimicrobial agents	-PCR of involved genes -Gene cloning -Protein expression -Preparation of knock-out mutants -Studies of the regulation of the mechanisms of resistance through RNA analysis

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student's personal work hours	Total hours
Short answer questions	B1 B2 B5	1	0	1
Guest lecture / keynote speech	A5 C4 C5 C8	8	16	24
Laboratory practice	A2 B4 C6 C7	24	12	36
Seminar	A1 B3 B7 B8 B9 C3	2	10	12
Personalized attention		2	0	2

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Short answer questions	Written test that will assess the grade of knowledge and understanding achieved by the student.

Guest lecture / keynote speech	Exposure by the teaching staff of the theoretical basis of the subject
Laboratory practice	Case study in the research laboratory of different aspects involved in resistance to antimicrobial agents carried out by the students.
Seminar	Working Group that will discuss certain aspects related to the subject, elaborating final conclusions

Personalized attention

Methodologies	Description
Guest lecture / keynote speech Laboratory practice Seminar	During the development of the subject will be addressed in the needs of the student and consultations relating to the subject matter, providing you the necessary support, both in person or through email.

Assessment

Methodologies	Competencies / Results	Description	Qualification
Laboratory practice	A2 B4 C6 C7	Continuous assessment of practices	25
Seminar	A1 B3 B7 B8 B9 C3	Active participation in the programmed seminars	5
Short answer questions	B1 B2 B5	Written test on the knowledge acquired during the course, both in its theoretical and practical aspects	70

Regulación da expresión xénica/610441006

Other comments

Of all the subjects that it recommends to have studied previously, compulsory all of them of the master's degree, the technical subjects are considered to be fundamental.
