General description	<p>This subject is aimed to cover concepts, and theoretical and experimental tools, which weren't included in the previous step of Chemistry Degree. They are essential for the adequate comprehension of another Master subjects.</p> <p>Specifically, concepts and characteristics of intermolecular forces, intermolecular energies, radial distribution functions in gases and condensed phases, interface interactions, interface behaviour and reactivity modeling will be shown.</p> <p>All the information related to subjects in this Master is centralized on the webpage shown above. This webpage is the reference for all students, regardless of the center where they study.</p>
