Descripción xeral	Terminoloxía e conceptos relacionados coas tecnoloxías da información e a comunicación. Aplicacións multimedia: texto, audio, imaxe, vídeo e interacción. Análise dos medios dixitais. Artigos de información xornalística e estruturas. Entrevistas, listaxes, estatísticas, reportaxes. Escribir e editar: "narrator or teller", "media forms and media language". Formas e convencións no inglés dos medios. Audiencias e institucións. Termos técnicos para analizar o proceso de redacción, edición e impresión. Códigos e convencións. Gramática: "10 common mistakes". Follas de estilo e puntuación.

Comunicar mensaxes audiovisuais en inglés		A1	B1 C1
Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro		A2	B4 C1 B6 B7
Xestionar proxectos audiovisuais.		A3	B2 C4 B4 B5
Investigar e analizala comunicación audiovisual		A4	B6 C1 B7
			B8 B9
Mellorar a habilidade para o uso e a adaptación axeitada das ferramentas tecnolóxicas.		A6	B3 C1 A10
		A5	
		A8	
		A9	
Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro. Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.			C1 C2 C3 C4

	A6	B3 B8	C4
O resultado da aprendizaxe será o dominio da expresión e a comprensión de forma oral e escrita dun idioma estranxeiro, neste caso, o inglés. Asemade, conséguese utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida, tanto no contexto nacional como estranxeiro, de xeito que se manexen en inglés as mensaxes audiovisuais, a creación de produtos audiovisuais, ou a xestión de proxetos audiovisuais. Os estudantes tamén son quén de investigar e analizar a comunicación audiovisual, e con esta asignatura, ademáis, melloran as súas habilidades para o uso e a adaptación axeitada das ferramentas tecnolóxicas.	A1 A3 A4 A11 A12	B2 B7	C1 C2 C3

Contidos		
Temas	Subtemas	
Chapter 1: The concept of multimedia communication modeling. A brief description of elements for multimedia systems. User and network requirements together with the packet transfer concept. An overview of multimedia terminals. As a general introduction to the subject, this chapter includes terminology and concepts related to the elements of multimedia as well as the development of multimedia applications and computer hardware, network requirements and storage devices for their distribution and careers in Information and Communication Technologies.	Introduction	
Chapter 2: Multimedia communication is more than simply putting together text, audio, images and video. Recent trends in multimedia research to exploit the audio-visual interaction and to build the link between audio and video processing. Hp reading, synchronization and tracing audio-to-visual mapping as well as the bimodal person verification. This chapter includes vocabulary and concepts related to text, audio, images and video as well as authoring tools and how data are stored and represented in a computer system.	Elements of Multimedia: Text, audio, pictures, video and interaction	
Chapter 4: Issues concerning distributed multimedia systems. Main features, resource management, networking and multimedia operating systems. Identification of the applications like interactive television, telecooperation and hypermedia, and a survey of the important enabling technologies. This chapter deals with terms and concepts related to operating systems and software packages, distributed multimedia systems, interactivity and e-learning.	Multimedia Networks and Networking	

<p>Chapter 3: Multimedia processing in communication. Analysis of digital media and signal processing elements. Description of a general framework for image copyright protection through digital watermarking. Revision of the key attributes of neural processing essential to intelligent multimedia processing. Recent large-scale-integration programmable processors designed for multimedia processing such as real-time compression and decompression of audio and video as well as the next generation of computer graphics.</p> <p>This chapter includes terms related to the description of the general trends in the evolution of modern computers, an outline of the main types of computers in use today and their practical uses. It describes the function and relationships between the internal components of a personal computer, including the motherboard, processor, random-access memory and other memories, ports, buses, expansion boards, and PC cards, it distinguishes processors by their word size, speed, and memory and identifies new approaches to traditional processor design.</p>	Digital copyrights, hardware, storage.
<p>Chapter 5: Multimedia communication standards. Moving Pictures Experts Group (MPEG)-1, MPEG-2, MPEG-4, MPEG-4 Visual Texture Coding (VTC), Joint Photographic Experts Group (JPEG)-2000, MPEG-7, MPEG-21, International Telecommunications UnionTelecommunication Sector (ITU-T) and Internet standards. The ITU-T standardization process in multimedia communications from the video and speech coding, as well as from multimedia, multiplex and synchronization points of view.</p> <p>This chapter includes terms and concepts related to video editing, its formats and standards as well as technologies related to speech recognition.</p>	Video, audio and standards
<p>Chapter 6: Multimedia communication across networks. An introduction about packet audio-video in the network environment. The concept of video transport across generic networks. Multimedia transport over ATM networks.</p>	Multimedia and the Internet
<p>Chapter 7: Multimedia development. Structured analysis and techniques, data flow diagrams, entity-relationship diagrams, flowcharting, programming languages, scripting, pitching.</p>	Multimedia development
<p>Chapter 8: What can I write about? What is news? Identify what kind of story it is: Hard news, soft news, feature, editorial, youthbeat, opinion column. Structure for your article: The lead, a hard news story, a soft news story, the body. www.media-awareness.ca</p>	Writing a News Story

Chapter 9: Finding story ideas: Talk to people in a specific field. Newsgathering: Create a list, collect government statistics and reports. Interviewing do's and don'ts: Tape the interview, start with easy questions, end with difficult questions. Organizing the information: Write the focus, develop a focus. Writing and editing: narrator or teller, rewriting, clear and concise, run-on sentences. Young People's Press.	Tips for news writing and editing
Chapter 10: Communication processes. Main media forms. Media language. Forms and conventions. Audiences and institutions. Representation and ideology. Media products. Analytical skills. Evaluative skills. Iconography.	Key concepts and skills
Chapter 11: Analyzing the moving image. Camerawork. Editing sound and vision. Sound. Special effects. Focus genre. Technical terms for analyzing print. Magazines. Newspapers. Codes and conventions. Documentary forms. Images and analysis. Grammar: 10 common mistakes. Spelling. Punctuation. Reporting speech. Figures. Style guide.	Audio-visual and print-based media language and vocabulary

Metodoloxías

Metodoloxías	Descripción
Foro virtual	During the semester students will prepare and comment on topics, videos or other media in class or on the course Web page.
Presentación oral	By doing a project in a group, the teacher can also assess how students interact with others and how they participate in group settings. In order for the project to be a success in terms of assessing the student, clear instructions and deadlines will be given to the students. A summary of the project will have to be submitted to the teacher who will monitor it and an oral presentation in English will be required. The oral presentation will be scored 50% of the total project marking
Proba oral	This involves the teacher or evaluator asking the student questions and the student giving the answers orally or by writing them down. This is an excellent way to evaluate the student's thought process.
Proba obxectiva	This usually involves a multiple choice, short answer, essay, true/false, fill in the blank, or matching test to show how much the students learned from the materials that were just covered in the class.
Seminario	Small groups are required to work together, asking questions, giving their opinions, or working on their projects.

Sesión magistral	Lectures explaining the concepts and the terminology will be delivered to the students. These lectures will be implemented with multimedia presentations, animations, graphs, video clips or any other element that may help understand the main concepts, processes and ideas.
------------------	---

Atención personalizada

Metodologías	Descripción
Presentación oral	In order for the presentation to be successful in terms of assessing the student, clear instructions and deadlines will be given to the students. As for the project presentation, it will be done in English for about 20 minutes without notes but students may use presentation aids such as computers and projectors.
Proba oral	

Avaluación

Metodologías	Competencias / Resultados	Descripción	Cualificación
Presentación oral	A1 A2 A3 A4 A12 B1 B2 B4	The oral presentation will be scored 50% of the total project marking	20
Proba oral	A1 A2 A3 A4 B4	This involves the teacher or evaluator asking the student questions on the topics and areas of study and the student giving the answers orally	20
Proba obxectiva	A1 B5 B6 B7 B8 B9 C1 C2 C3 C4	This usually involves a multiple choice, short answer, essay, true/false, fill in the blank, or matching test to show how much the students learned from the materials that were just covered in the class.	40
Foro virtual	A1 A2 A3 A4 A11 A12 B1 B2 B4	Active participation in the subject forum will be taken into account.	10
Seminario	B7 B8 C4	Students are required to give their opinions on ethical or technical issues, comment on items, show how they work, and how they can be used for communication. All this in English.	10
