

Teaching Guide				
Identifying Data				2016/17
Subject (*)	Técnicas en Microbioloxía	Code	610G02017	
Study programme	Grao en Bioloxía			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	1st four-month period	Third	Obligatoria	6
Language	Spanish			
Teaching method	Face-to-face			
Prerequisites				
Department	Bioloxía Celular e Molecular			
Coordinador	Rioboo Blanco, Carmen	E-mail	carmen.rioboo@udc.es	
Lecturers	Fidalgo Paredes, Pablo Rioboo Blanco, Carmen Torres Vaamonde, Jose Enrique	E-mail	pablo.fidalgo@udc.es carmen.rioboo@udc.es enrique.torres@udc.es	
Web				
General description	Learning the basic techniques of a Microbiology Laboratory, as well as their potential applications in the field of microbiological quality control and in research.			

Study programme competences	
Code	Study programme competences
A1	Recoñecer distintos niveis de organización nos sistemas vivos.
A2	Identificar organismos.
A9	Identificar e utilizar bioindicadores.
A11	Identificar e analizar material de orixe biolóxica e as súas anomalías.
A13	Realizar o illamento e cultivo de microorganismos e virus.
A14	Desenvolver e aplicar produtos e procesos de microorganismos.
A15	Deseñar e aplicar procesos biotecnolóxicos.
A21	Deseñar modelos de procesos biolóxicos.
A25	Desenvolver e aplicar técnicas de biocontrol.
A26	Deseñar experimentos, obter información e interpretar os resultados.
A27	Dirixir, redactar e executar proxectos en Bioloxía.
A29	Impartir coñecementos de Bioloxía.
A30	Manexar adecuadamente instrumentación científica.
A31	Desenvolverse con seguridade nun laboratorio.
B1	Aprender a aprender.
B2	Resolver problemas de forma efectiva.
B3	Aplicar un pensamento crítico, lóxico e creativo.
B4	Traballar de forma autónoma con iniciativa.
B5	Traballar en colaboración.
B6	Organizar e planificar o traballo.
B7	Comunicarse de maneira efectiva nunha contorna de traballo.
B8	Sintetizar a información.
B10	Exercer a crítica científica.
B11	Debater en público.
B12	Adaptarse a novas situacións.
C1	Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.

C8	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.
----	---

Learning outcomes			
Learning outcomes	Study programme competences		
Fluid handling of the basic techniques of microbiology laboratory and their potential applications in industry and research.	A1 A2 A9 A11 A13 A14 A15 A21 A25 A26 A27 A29 A30 A31	B2 B3 B4 B5 B6 B7 B8 B10 B11	C3 C6 C8
Ability to relate concepts and practical application thereof.		B1 B6 B8 B10 B12	C1

Contents	
Topic	Sub-topic
I. Methods for detection and quantification of microorganisms	1. Sampling 2. Processing of samples 3. Methods of enrichment, isolation and culture 4. Methods of counting
II. Classification and identification of prokaryotes	1. Phenotypic methods 2. Genotypic methods
III. Measures of biomass and microbial metabolic activity	1. Estimates of the total microbial biomass 2. Specific determination of biomass 3. Measures of microbial activity
PRACTICES	1. Methods of counting and estimating biomass and microbial activity 2. Techniques for determining the microbiological quality of food 3. Rapid bacterial identification techniques 4. Microbiological water analysis 5. Genotypic methods for analysis of microorganisms
SEMINARS	1. Reporting of results 2. Conducting case studies

Planning				
Methodologies / tests	Competencies	Ordinary class hours	Student's personal work hours	Total hours
Guest lecture / keynote speech	A1 A14 A15 A21 A25 A29 B12 C6 C8	8	16	24

Laboratory practice	A2 A9 A11 A13 A26 A30 A31 B6	45	45	90
Seminar	A26 A27 B1 B2 B4 B5 B7 B10 B11 C3	4	20	24
Case study	B2 B5 B8	0	5	5
Mixed objective/subjective test	B3 B8 C1	2	0	2
Personalized attention		5	0	5

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Exposition by teachers in which the theoretical program of the subject will be developed.
Laboratory practice	Students will conduct mandatory laboratory practices, which will be in group. The student will be introduced in the use of different techniques of analysis and study of microorganisms.
Seminar	Works in small groups in which the results previously obtained in the laboratory practices will be presented in a reasoned manner. In addition, microbiological analysis for different practical cases will be proposed and scientific criticism should be exercised.
Case study	The student will be proposed with at least one practical case in which he will reasonably indicate the actions to be taken from the point of view of a microbiologist, to meet the demand required in this case.
Mixed objective/subjective test	Test written in which the degree of knowledge and understanding achieved by the students in all aspects included in the subject will be assessed.

Personalized attention	
Methodologies	Description
Seminar Guest lecture / keynote speech Laboratory practice Case study	During the development of the subject, requirements and queries of the students regarding the subject will be addressed by providing the necessary guidance and support, both in person as non-presential. Within the personalized attention you can include mentoring requested by the student for the preparation of examinations, as well as the subsequent revision of the same, and the preparation of seminars and case studies.

Assessment			
Methodologies	Competencies	Description	Qualification
Seminar	A26 A27 B1 B2 B4 B5 B7 B10 B11 C3	Evaluation of the tasks carried out during the seminars. It will be required by the students, in person and in the classroom, the results that have been obtained in the performing of laboratory practices.	10
Guest lecture / keynote speech	A1 A14 A15 A21 A25 A29 B12 C6 C8	Assessed through the mixed test.	0
Laboratory practice	A2 A9 A11 A13 A26 A30 A31 B6	Mandatory attendance and evaluation of student work during the development of practices. In mixed test, questions directly related to practical issues will be also proposed.	10
Mixed objective/subjective test	B3 B8 C1	Test written about the knowledge acquired in the keynote sessions, the laboratory practices and in the seminars.	70
Case study	B2 B5 B8	The student must resolve a practical case that will be proposed.	10

Assessment comments
---------------------

To pass the course, in any of the diets to which the student may go, the student must have obtained a 5 out of 10 in the different parts of the "mixed test", performing all tasks that are considered mandatory, and obtain a minimum score of 1.5 points on a maximum 3.

In order to be evaluated, students must attend to practical sessions. In the case of not passing the subject in a first option, in the second option, the student must pass only the part that was not passed.

For a student to be considered "NOT PRESENT", he must have the following requirements: not site the examination (the mixed-test) and not attend half of the practice sessions.

If the number of "with Honours" that may be granted is exhausted in the first option, none will be granted in the second option, even though the maximum note is obtained.
