

Teaching Guide						
Identifying Data				2016/17		
Subject (*)	Ecoloxía: Ecoloxía I (individuos e ecosistemas)		Code	610G02039		
Study programme	Grao en Bioloxía					
Descriptors						
Cycle	Period	Year	Type	Credits		
Graduate	1st four-month period	Third	Obligatoria	6		
Language	SpanishEnglish					
Teaching method	Face-to-face					
Prerequisites						
Department	Bioloxía Animal, Bioloxía Vexetal e Ecoloxía					
Coordinador	Rodríguez Roiloa, Sergio	E-mail	sergio.roiloa@udc.es			
Lecturers	Martínez Abraín, Alejandro Rodríguez Roiloa, Sergio Ruiz De la Rosa, Jose Miguel	E-mail	a.abrain@udc.es sergio.roiloa@udc.es jose.miguel.ruiz.delarosa@udc.es			
Web						
General description	Distribution patterns : the individual and the environment. The ecosystem.					

Study programme competences	
Code	Study programme competences
A1	Recoñecer distintos niveis de organización nos sistemas vivos.
A17	Realizar bioensaios e diagnósticos biolóxicos.
A20	Muestrear, caracterizar e manexar poboacións e comunidades.
A21	Deseñar modelos de procesos biolóxicos.
A24	Xestionar, conservar e restaurar poboacións e ecosistemas.
A26	Deseñar experimentos, obter información e interpretar os resultados.
A30	Manexar adecuadamente instrumentación científica.
B4	Traballar de forma autónoma con iniciativa.
B6	Organizar e planificar o traballo.
B7	Comunicarse de maneira efectiva nunha contorna de traballo.
B8	Sintetizar a información.
B12	Adaptarse a novas situacións.

Learning outcomes		
Learning outcomes		Study programme competences
To describe ecological concepts at the individual, population, community and ecosystem level.		A1 A24
To discuss ecological concepts by critically considering the evidences in support.		B8
To face with some success the specialised literature.		A30
To use some basic techniques from the vast ecological methodology.	A17 A20 A21 A26 A30	B4 B6 B7 B12

Contents	
Topic	Sub-topic
Section 1. Ecology and evolution	Unit 1. Introduction to ecology Unit 2. Natural selection

Section 2. Individuals and environment	Unit 3. The physical environment: land and water Unit 4. Plant adaptations to the environment Unit 5. Animal adaptations to the environment
Section 3. The ecosystem	Unit 6. The ecosystem and its functioning Unit 7. Production Unit 8. Energy flow Unit 9. Decomposition and nutrient cycling Unit 10. Global cycles

Planning				
Methodologies / tests	Competencies	Ordinary class hours	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	24	62.4	86.4
Laboratory practice	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	15	15	30
Seminar	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	8	20.8	28.8
Objective test	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	3	0	3
Personalized attention		1.8	0	1.8

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Oral presentations to transfer knowledge and ease learning. Most of the graphical support of presentations is available in the virtual campus (Moodle).
Laboratory practice	For the students to learn effectively through the completion of practical activities in the field and/or in the laboratory.
Seminar	Demonstration and study of numerical models for a better understanding and resolution of ecological problems. Most models will be worked with Faculty PCs if students have no portables.
Objective test	Written exam on all aspects of the matter: theory, practicals and seminars.

Personalized attention	
Methodologies	Description
Objective test	Preparation, explanation and revision of exams. Elucidation of possible doubts emerging as the matter is developed.
Guest lecture / keynote speech	Orientation and tuition to make the most of practicals.
Laboratory practice	
Seminar	Orientation and tuition to make the most of seminars.

Assessment			
Methodologies	Competencies	Description	Qualification

Objective test	A1 A17 A20 A21 A24 A26 A30 B4 B6 B7 B8 B12	Written exam on all aspects of the matter: theory, practicals and seminars (see Assessment comments).	100
Others			

**Assessment comments**

One and only exam (but 2 opportunities) on all and every part: theory, practicals (P) and seminars (S).

Weight proportional to contribution to time planning: 60%, 20% y 20% (respectively). All 3 parts are to be passed simultaneously, but compensation possible if one part > 4/10.

Attendance not compulsory, but for P and S it'll be recorded.

Students can voluntarily present at the exam a paper personal copybook on the work developed in all 8 S and/or all 3 P classes; main text must be manuscript (by hand) and the whole should be easily readable. Guides will be available in Moodle and the marks on these workbooks may help overcome insufficiencies in the corresponding exam.

Copybooks can be drafted in pairs or groups, but the final result is not to be cloned: they must reflect individual work and interpretation.

Both copybooks are needed to get the top mark (Honours).

**Recommendations****Subjects that it is recommended to have taken before**

Química/610G02001

Matemáticas/610G02003

Estatística/610G02005

Xeografía: Xeografía física/610G02006

**Subjects that are recommended to be taken simultaneously**

Fisioloxía vexetal aplicada/610G02029

Fisioloxía Animal: Fisioloxía Animal I/610G02035

**Subjects that continue the syllabus**

Ecoloxía: Ecoloxía II (poboacions e comunidades)/610G02040

Ecoloxía humana/610G02041

Ecotoxicoloxía/610G02042

Análise de datos en Bioloxía/610G02044

## Other comments

Understanding rather than memorization is favored.
