		Teaching Guide		
	Identifying	Data		2016/17
Subject (*)	Xenómica		Code	614522006
Study programme	Mestrado Universitario en Bioinform	nática para Ciencias da S	Saúde	
		Descriptors		
Cycle	Period	Year	Туре	Credits
Official Master's Degree	e 1st four-month period	First	Optativa	6
Language				
Teaching method	Face-to-face			
Prerequisites				
Department	Bioloxía Celular e Molecular			
Coordinador	Vila Taboada, Marta	E-n	nail marta.vila.tabo	ada@udc.es
Lecturers	Becerra Fernandez, Manuel	E-n	nail manuel.becerra	a@udc.es
	Cerdan Villanueva, Maria Esperanz	a	esper.cerdan@	udc.es
	Vila Taboada, Marta		marta.vila.taboa	ada@udc.es
Web		,		
General description				

	Study programme competences
Code	Study programme competences
A8	CE8 - Understanding the basis of the information of the hereditary material, its transmission, analysis and evolution
A9	CE9 ? To understand the benefits and the problems associated with the sequencing and the use of biological sequences, as well as
	knowing the structures and techniques for their processing
B1	CB6 - Own and understand knowledge that can provide a base or opportunity to be original in the development and/or application of ideas,
	often in a context of research
B2	CB7 - Students should know how to apply the acquired knowledge and ability to problem solving in new environments or little known within
	broad (or multidisciplinary) contexts related to their field of study
B5	CB10 - Students should possess learning skills that allow them to continue studying in a way that will largely be self-directed or
	autonomous.
B6	CG1 -Search for and select the useful information needed to solve complex problems, driving fluently bibliographical sources for the field
B7	CG2 - Maintain and extend well-founded theoretical approaches to enable the introduction and exploitation of new and advanced
	technologies
В8	CG3 - Be able to work in a team, especially of interdisciplinary nature
C1	CT1 - Express oneself correctly, both orally writing, in the official languages of the autonomous community
C2	CT2 - Dominate the expression and understanding of oral and written form of a foreign language
C3	CT3 - Use the basic tools of the information technology and communications (ICT) necessary for the exercise of their profession and
	lifelong learning
C7	CT7 ? To maintain and establish strategies for scientific updating as a criterion for professional improvement.
C8	CT8 - Rating the importance that has the research, innovation and technological development in the socio-economic and cultural progress
	of society

Learning outcomes			
Learning outcomes	Study	y progra	amme
	COI	mpeten	ces
Knowledge about the molecular tools used in genomics	AJ8		
	AJ9		
Knowledge about structural, functional and evolutionary genomics		BJ1	CJ8
		BJ2	
To set up experiments and analyse and interpret data using DNA microarrays		BJ6	CJ2
		BJ7	CJ3

Knowledge about the mechanisms involved in the evolution of genomes and the molecular and bioinformatic tools used in that	BJ5	CJ1	
kind of studies	BJ8	CJ7	

	Contents
Topic	Sub-topic
Introduction: from Molecular Genetics to Genomics	Molecular markers
	Applications ot recombinant DNA technologies
	PCR and real-time quantitative PCR
	DNA editing techniques
The Human Genome Project	Classic DNA sequencing methods
	Approaches for whole genome sequencing
	Next Generation Sequencing
Structural Genomics	Prokaryote and eukaryote genomes: size, gene families, repetitive DNA
	Organelle genomes
	Genome annotation and assembly
Functional Genomics	Transcriptomics
Comparative Genomics	Using model organisms in Medicine
Clinic Genomics	GWAS
	Molecular diagnosis
Hands on	Sequence alignment
	Genomic databases and projects
	Gene expression analysis: microchips and microarrays

Planning			
Competencies	Ordinary class	Student?s personal	Total hours
	hours	work hours	
B2 B5 B8 C3	21	42	63
A8 A9 B2 C1 C2 C3	2	8	10
A8 A9 B1 B6 B7 C1	21	52.5	73.5
C2 C7 C8			
	3.5	0	3.5
	B2 B5 B8 C3 A8 A9 B2 C1 C2 C3 A8 A9 B1 B6 B7 C1	hours B2 B5 B8 C3 21 A8 A9 B2 C1 C2 C3 2 A8 A9 B1 B6 B7 C1 21 C2 C7 C8	Competencies Ordinary class hours Student?s personal work hours B2 B5 B8 C3 21 42 A8 A9 B2 C1 C2 C3 2 8 A8 A9 B1 B6 B7 C1 21 52.5 C2 C7 C8 52.5 52.5

	Methodologies
Methodologies	Description
ICT practicals	Hands on: students solve exercises using their own laptop.
Mixed	Assessment of the learning process. Tests may include multiple choice questions, problem solving and computer exercises.
objective/subjective	Instructors will decide whether scheduling a separate test for the computer exercises depending on the progress of the group.
test	
Guest lecture /	Each instructor will explain the basic contents of each topic interacting as much as possible with the students.
keynote speech	

	Personalized attention
Methodologies	Description
ICT practicals	The instructors will carefully supervise the student's work during the hands-on sessions.
	In the event of having officially certified "part-time" students, the instructors will take the appropriate measures so that their scores are not affected.

Assessment

Methodologies	Competencies	Description	Qualification
Guest lecture /	A8 A9 B1 B6 B7 C1	Students must attend at least 80% of the lecturers in order to pass the subject.	70
keynote speech	C2 C7 C8	Scores will depend on the result of a multiple choice test. In addition, similar	
		calculations to the ones worked during lectures may be required.	
ICT practicals	B2 B5 B8 C3	Students must attend at least 80% of the hands on sessions in order to pass the	30
		subject.	
		Scores will depend on the result of an exam: students will use their own laptop to	
		solve a set of exercises. This exam may be scheduled not to overlap with the	
		"theory" test.	

Assessment comments

In the event of having officially certified "part-time" students, the instructors will take the appropriate measures so that their scores are not affected.
