

Teaching Guide				
Identifying Data				2016/17
Subject (*)	Development Tools	Code	614G01054	
Study programme	Grao en Enxeñaría Informática			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	1st four-month period	Fourth	Obligatoria	6
Language	SpanishGalicianEnglish			
Teaching method	Face-to-face			
Prerequisites				
Department	Computación			
Coordinador	Parapar López, Javier	E-mail	javier.parapar@udc.es	
Lecturers	Parapar López, Javier Valcarce Silva, Daniel	E-mail	javier.parapar@udc.es daniel.valcarce@udc.es	
Web	<a href="http://www.dc.fi.udc.es/~parapar/">http://www.dc.fi.udc.es/~parapar/</a>			
General description	<p>In this subject we will explain the conceptual and practical foundations regarding tools for the development of projects software. In particular we will explain the following tools, his advantages and his correct use from a point of view of Software Engineering:</p> <p>Integrated Development Enviroments: Eclipse  Tools for automation of packing: Maven  Tools for control of versions and cooperative work : Git  Tools for continue integration : Apache Jenckins  Tools for task/time/bug tracking: Redmine  Tools for analysis of code and dependencies: Codepro Analytix, Sonar  Tools for analysis of performance and monitoring: JStat, JConsole, JVisualVM</p> <p>The subject is very practical and tries to contribute to the student deep knowledge on the tools of development more used nowadays in IT companies.</p>			

Study programme competences / results	
Code	Study programme competences / results
A22	Coñecemento e aplicación dos principios, metodoloxías e ciclos de vida da enxeñaría do sóftware.
A25	Capacidade para desenvolver, manter e avaliar servizos e sistemas sóftware que satisfagan todos os requisitos do usuario e se comporten de forma fiable e eficiente, sexan accesibles de desenvolver e manter, e cumpran normas de calidade, aplicando as teorías, principios, métodos e prácticas da enxeñaría do sóftware.
B1	Capacidade de resolución de problemas
B2	Traballo en equipo
B3	Capacidade de análise e síntese
B4	Capacidade para organizar e planificar
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.
C7	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.

Learning outcomes	
Learning outcomes	Study programme competences / results

Software Development	A25	B2 B3 B4	C3
Software Development	A22	B1	
Conocer e manexar as principais contornas de desenvolvemento			C6
Aprender o manexo de ferramentas de control de versións e de mantemento software	A25	B1 B3	C6
Conocer ferramentas para a xestión de proxectos e seguemento de incidencias	A25		C3 C6 C7
Usar ferramentas de apoio ao despregamento, empaquetado, versionado e distribución do software	A25	B4	C3
Usar ferramentas de inspección de código		B2	
Usar ferramentas de análises de rendemento e monitorización de aplicacións	A25		C3 C7

Contents	
Topic	Sub-topic
Integrated Development Enviroments	Eclipse
Tools for packing automation	Maven
Tools for version control and cooperative work	Git
Tools for continue integration	Jenkins
Tools for task/time/bug tracking	Redmine
Tools for analysis of code and dependencies	Sonar
Tools for analysis of performance and monitoring	jMeter, JStat, JConsole, JVisualVM

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Supervised projects	B2 B3 B4 C6 C7	7	21	28
Laboratory practice	A22 A25 B1 C3	14	42	56
Mixed objective/subjective test	A22 A25 B1 B3 C6	0.5	0	0.5
Guest lecture / keynote speech	B4 C6 C7	18	47.5	65.5
Personalized attention		0		0

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Supervised projects	Traballos tutelados propostos polo profesor e desenvolvidos polos estudantes ou ben en grupo ou ben individualmente.
Laboratory practice	Ao tratarse dunha materia eminentemente práctica o desenvolvemento por parte do alumno dun caso de práctica para o uso de todas as ferramentas comentadas nas leccións maxistras será fundamental
Mixed objective/subjective test	Avaliarase o dominio dos coñecementos teóricos e operativos da materia.
Guest lecture / keynote speech	Clases maxistras na exposición dos coñecementos teóricos utilizando diferentes recursos: a lousa, transparencias, proxeccións, demostracións e a facultade virtual. Pode incluír conferencia convidada.

Personalized attention	
Methodologies	Description

Supervised projects	Se propondran pequenos traballos tutelados para a resolución por parte do alumno co soporte do coñecemento do profesor.
Laboratory practice	Ao tratarse dunha materia eminentemente práctica o desenvolvemento por parte do alumno dun caso de práctica para o uso de todas as ferramentas comentadas nas leccións maxistras será fundamental

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Mixed objective/subjective test	A22 A25 B1 B3 C6	Questions about the acquired knowledge. Questions involving critical reasoning for solving practical problems of the real world. It is mandatory to achieve at least the 40% of the marks in order to pass the course	40
Supervised projects	B2 B3 B4 C6 C7	Tracking of the working process and evaluation of the final output from the students. It is mandatory to achieve at least the 40% of the marks in order to pass the course	20
Laboratory practice	A22 A25 B1 C3	Correctness and completeness of the assignments proposed to the students while adequately using the dev tools introduced in the subjects. It is mandatory to achieve at least the 40% of the marks in order to pass the course	40

Assessment comments
Para a segunda oportunidade, tanto as prácticas e traballos como a teorías avaliaranse no exame mixto. Se non se acada a nota mínima nas distintas probas a nota máxima do alumno será 4.5
