

Teaching Guide				
Identifying Data				2016/17
Subject (*)	Analysis on Architectural Form		Code	630G01007
Study programme	Grao en Arquitectura			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	2nd four-month period	First	FB	6
Language	Spanish			
Teaching method	Face-to-face			
Prerequisites				
Department	Representación e Teoría Arquitectónica			
Coordinador	Perez Cid, Miguel angel	E-mail	miguel.pcid@udc.es	
Lecturers	Perez Cid, Miguel angel	E-mail	miguel.pcid@udc.es	
Web	departamentos.etsa.udc.es/webryta/			
General description	The objective of this course is to settle the student's knowledge of the architectural graphic representation through basically the practice of FreeHand Drawing.			

Study programme competences	
Code	Study programme competences
A10	REPRESENTACIÓN ESPACIAL: aptitude ou capacidade para aplicar, tanto manual como informaticamente, os sistemas de representación gráfica, dominando os procedementos de proxección e corte, os aspectos cuantitativos e selectivos da escala e a relación entre o plano e a profundidade.
A13	IDEACIÓN GRÁFICA: aptitude ou capacidade para concibir e representar graficamente a figura, a cor, a textura e a luminosidade dos obxectos e dominar a proporción e as técnicas de debuxo, incluídas as informáticas.
A37	ANÁLISE DE FORMAS: comprensión ou coñecemento das leis da percepción visual e da proporción, as teorías da forma e da imaxe, as teorías estéticas da cor e os procedementos de estudo fenomenolóxico e analítico das formas arquitectónicas e urbanas.
A39	RESTITUCIÓN GRÁFICA: comprensión ou coñecemento das técnicas de medición e levantamento gráfico de edificios e de ámbitos urbanos e naturais en todas as súas fases, dende o debuxo de apuntamentos á restitución científica.
B1	Learn how to learn
B3	Aplicar un pensamento crítico, lóxico e creativo.
B4	Traballar de forma autónoma con iniciativa.
B7	Comunicarse de maneira efectiva nun entorno de traballo.
B8	Visión espacial.
B9	Creatividade.
B10	Sensibilidade estética.
B11	Capacidade de análise e síntese.
B13	Imaxinación.
B14	Habilidade gráfica xeral.
B17	Cultura histórica.
B18	Razoamento crítico.
B19	Traballo nun equipo de carácter interdisciplinar.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse.
C7	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.
C8	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.

## Learning outcomes

Learning outcomes	Study programme competences		
Ability to apply graphic representation systems. Ability to handle projection and section systems. Ability to handle the quantitative and selective aspects of the scale. Ability to establish the relationship between the plane and depth.	A10	B1 B3 B4 B7 B8 B9 B10 B11 B13 B14 B17 B18 B19	C3 C6 C7 C8
Ability to conceive and represent the figure, colour, texture, and brightness and also dominate the objects proportion. Knowledge of the drawing techniques -including the computer ones-, all of them fundamental to the correct approach to the projectual skill, a prelude to the project representation. Knowledge and understanding of the stages of graphic learning, from the initial perceptual stage to the final creative representation.	A13	B1 B3 B4 B7 B8 B9 B10 B11 B13 B14 B17 B18 B19	C3 C6 C7 C8
Knowledge and understanding of the visual perception and proportion laws, form and image theories, the aesthetic theories of color and procedures of phenomenological and analytical study of the architectural and urban forms.	A37	B1 B3 B4 B7 B8 B10 B11 B13 B14 B17 B18 B19	C3 C6 C7 C8

Knowledge, understanding and management of measurement techniques and graphic survey of buildings and urban and natural areas at every stage, from drawing sketches to detailed depiction.	A39	B1	C3
		B3	C6
		B4	C7
		B7	C8
		B8	
		B9	
		B10	
		B11	
		B13	
		B14	
		B17	
		B18	
		B19	

Contents	
Topic	Sub-topic
ANALYSIS ON ARCHITECTURAL FORMS THROUGH FREEHAND DRAWING	Laws of visual perception and rules of proportion. Theories of form and image. Aesthetic theories of color. Analysis and description of architectural forms and spaces from significant examples of current or historical architecture. Human figures as reference of scale. Method of study, analysis and representation of architectural and urban forms. Freehand drawing and life sketching Employment and management of different techniques.
SKETCHING AND GRAPHIC SURVEY	Sketching and freehand drawing techniques Sketches and life drawing. Measurement techniques and graphic survey
CREATIVE DRAWING AND IDEATION SKETCHES	Creative graphic depiction as the aim of learning approach. Techniques for architectural design presentation. Composite drawing

Methodologies	
Methodologies	Description
Student portfolio	

Objective test	A practical examination used to evaluate the learning whose distinctive aspect is the possibility to determine whether the acquired learning is expected to pass the examination. It is a measure instrument, rigorously elaborated which allows to evaluate the capacities, abilities and attitudes. It will consist of 2-4 drawings (6 hours), as the examination official timetable will establish.
----------------	--

Personalized attention	
Methodologies	Description
	This academic activity will be developed by the professor, either individual or in small group and its finality is to have into consideration the student's needs and doubts in relation with the current essays, helping and motivating them during the learning process. For this subject and the already exposed methodologies it is fundamental to consult the professor about the weekly improvement to assure the quality of the essays according to the criteria which will be indicated in each case. Considering the importance the personalized care this subject has, this tutorial is compulsory for the students. Non assistance to the arranged tutorials (1h), the students will be given a ?non evaluated?.

Assessment			
Methodologies	Competencies	Description	Qualification
Student portfolio	A10 A13 A37 A39 B17 B14 B13 B11 B10 B9 B8 B7 B4 B3 B1 B19 B18 C3 C6 C7 C8	El alumno presentará un trabajo obligatorio cuyo contenido detallado, estará expuesto en moodle y será propuesto por los profesores. La no presentación de la totalidad de estos ejercicios, conllevará la calificación de no presentado.	30
Objective test	A10 A13 A37 A39 B3 B1 B19 B18 B17 B14 B13 B11 B10 B9 B8 B7 B4 C3 C6 C7 C8	OBJECTIVE ASSESSMENT: 50% of the qualification.  This methodology is meant to determine whether the student improvement has been sufficient and in concordance with what has been done in the workshops. It will be divided into two parts, three hours each, where the essays proposed by the professors will be developed.  Students must obtain five points over ten in this methodology in order to pass this subject.	70

Assessment comments	
To pass this subject, in any of the two evaluations within the course (the one belonging to the term or in the second opportunity in July) is an essential requirement to have done all the proposed essays in the different methodologies with the minimum established level and the correct professor tutorial. Otherwise the student will be considered non evaluated.	
Students who only attend the second opportunity in July will be specially obligated to fulfill what has been exposed above.	
A minimum of 80% of assistance is compulsory to pass the subject, otherwise students will be non evaluated.	
Considering the importance the personalized care this subject has, this tutorial is compulsory for the students. Non assistance to the arranged tutorials (1h), the students will be given a ?non evaluated?.

#### Other comments

It would be advisable for new students before joining this subject, that previously had completed courses in high school on technical and freehand drawing.
