General description	In this course, the student acquire the ability to design interior partition systems, vertical circulation systems and interior/exterior finishes. The historical setting, typologies, materials, rules, design, safety, measurements and estimate, prescription, preservation, pathologies and repair of each system will be analyzed.			

Study programme competences	
Code	Study programme competences
A2	PROXECTOS DE EXECUCIÓN: aptitude ou capacidade para elaborar proxectos integrais de execución de edificios e espazos urbanos en grao de definición suficiente para a súa completa posta en obra e equipamento de servizos e instalacións.
A3	DIRECCIÓN DE OBRAS: aptitude ou capacidade para dirixir obras de edificación e urbanización desenvolvendo proxectos, replanteando no terreo, aplicando os procedementos de construción adecuados e coordinando oficios e industrias.
A8	PROXECTO DE OBRA ACABADA: aptitude ou capacidade para dimensionar, deseñar, programar e poñer en obra e integrar en edificios e conxuntos urbanos as solucións construtivas, encontros e remates dos sistemas de obra acabada, divisións interiores, carpintería, escaleiras e demais obra acabada, en conxunto e en detalle, así como para asesorar tecnicamente sobre estes aspectos.
A11	XESTIÓN DE NORMAS CONSTRUCTIVAS: aptitude ou capacidade para aplicar as normas de construción, de homologación, de protección, de mantemento, de seguridade e de cálculo nos proxectos integrados e na execución, tanto de obras de edificación como de espazos urbanos.
A28	PROXECTO DE SEGURIDADE EN OBRA: aptitude ou capacidade para redactar e executar proxectos de seguridade, prevención de riscos e hixiene laboral en obras de edificación e de urbanización.
A32	VALORACIÓN DE OBRAS: aptitude ou capacidade para elaborar medicións e orzamentos e dar fe dos custos de todo tipo no proxecto e execución de edificios e espazos urbanos.
A47	ECOLOXÍA E SOSTENIBILIDADE: comprensión ou coñecemento da responsabilidade do arquitecto respecto aos principios básicos de ecoloxía, de sostenibilidade e de conservación dos recursos e do medio ambiente na edificación, o urbanismo e a paisaxe.
A58	MATERIAIS DE CONSTRUCCIÓN: comprensión ou coñecemento das características físicas e químicas, os procedementos de fabricación e homologación, a análise patolóxica e as aplicacións e restricións de uso dos materiais empregados en obra estrutural, civil, grosa e acabada.
A59	SISTEMAS CONSTRUTIVOS CONVENCIONAIS: comprensión ou coñecemento das características físicas, os procedementos de fabricación e homologación, os tratamentos e acabados, a organización dimensional, os métodos de montaxe e a análise patolóxica dos compoñentes construtivos convencionais na obra estrutural, civil, grosa e acabada.
A64	MÉTODOS DE VALORACIÓN: comprensión ou coñecemento dos métodos de medición, valoración e taxación, de programación económica e de cálculo de custos e fiscalización destes, nas obras de carácter arquitectónico e urbanístico e no planeamento.
B1	Learn how to learn

B2	Resolver problemas de forma efectiva.
B3	Aplicar un pensamento crítico, lóxico e creativo.
B6	Comportarse con ética e responsabilidade social como cidadán e como profesional.
B8	Visión espacial.
B9	Creatividade.
B10	Sensibilidade estética.
B12	Toma de decisións.
B13	Imaxinación.
B15	Capacidade de organización e planificación.
B16	Motivación pola calidade.
B21	Intuición mecánica.
C1	Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.
C2	Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C4	Desenvolverse para o exercicio dunha cidadanía aberta, culta, crítica, comprometida, democrática e solidaria, capaz de analizar a realidade, diagnosticar problemas, formular e implantar solucións baseadas no coñecemento e orientadas ao ben común.
C5	Entender a importancia da cultura emprendedora e coñecer os medios ao alcance das persoas emprendedoras.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben afrontarse.
C7	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.
C8	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.

Learning outcomes

Learning outcomes	Study programme competences		
Partition systems: The student must know the performance required by the architectural spaces, the applicable rules and propose solutions. Must know prescribe the solution, the repair and the maintenance in accordance with the architectural project.	A2	B1	C1
	A8	B2	C3
	A11	B3	C4
	A28	B6	C5
	A47	B8	C6
	A58	B9	C7
	A59	B10	C8
Interior / Exterior finishes: The student must know the performance required by the architectural spaces, the applicable rules and propose solutions. Must know prescribe the solution, the repair and the maintenance in accordance with the architectural project.	A64		
	A2	B1	C1
	A8	B2	C2
	A11	B3	C3
	A28	B6	C4
	A32	B8	C5
	A47	B9	C6
	A58	B10	C7
	A59	B12	C8
A64	B13		
	B15		
	B16		

Vertical circulation systems: The student must know the performance required by the architectural spaces, the applicable rules and propose solutions. Must know prescribe the solution, the repair and the maintenance in accordance with the architectural project.	A2	B1	C1
	A8	B2	C3
	A11	B3	C4
	A28	B6	C5
	A32	B8	C6
	A58	B9	C7
	A59	B10	C8
	A64	B12	
	B13		
	B15		
	B16		
The student must achieve the ability to integrate and lead a multidisciplinary team capable of building partition systems, vertical circulation systems as well as interior and exterior finishes; solving unexpected events and modifications in the performance required, rules, estimate, maintenance and ecological sensitivity.	A2	B1	C1
	A3	B2	C2
	A8	B3	C3
	A11	B6	C4
	A28	B8	C5
	A32	B9	C6
	A47	B10	C7
	A58	B12	C8
	A59	B13	
	A64	B15	
		B16	
	B21		

Contents	
Topic	Sub-topic
Lesson 01 PARTITION SYSTEMS	<p>Performance and regulatory requirements.</p> <p>Historical setting, typologies, materials, rules, conception, design, safety, measurements and estimate, prescription, preservation, pathologies and repair of:</p> <p>Drywalls.</p> <p>Heavy partitions.</p> <p>Dry lined walls.</p> <p>Movable partitions.</p> <p>Doors.</p>
Lesson 02 VERTICAL CIRCULATION SYSTEMS	<p>Performance and regulatory requirements.</p> <p>Historical setting, typologies, materials, rules, conception, design, safety, measurements and estimate, prescription, preservation, pathologies and repair of:</p> <p>Stairs.</p> <p>Ramps.</p> <p>Elevators.</p> <p>Handrails.</p>
Lesson 03 INTERIOR FINISHES	<p>Performance and regulatory requirements.</p> <p>Historical setting, typologies, materials, rules, conception, design, safety, measurements and estimate, prescription, preservation, pathologies and repair of:</p> <p>Ceilings.</p> <p>Paving.</p> <p>Interior vertical surfaces.</p>

Lesson 04 EXTERIOR FINISHES	Performance and regulatory requirements. Historical setting, typologies, materials, rules, conception, design, safety, measurements and estimate, prescription, preservation, pathologies and repair of: Outdoor paving.

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Lectures where several building systems (historical setting, typologies, materials, rules, conception, design, safety, measurements and estimate, prescription, preservation, pathologies and repair) are explained from performance required and in accordance with the architectural project. Reference documentation and examples of buildings will be provided in order to learn from the mistakes and the decisions. An intelligent knowledge is sought instead of rote learning. The student must pass an objective test and several multiple-choice questions.

Workshop	<p>The workshop is a workspace where students develop their architectural projects, applying the skills learnt during lectures. They will learn the relationship between the compositional processes of architecture and its construction.</p> <p>Several subjects merge around the idea of architecture, ensuring optimization of teaching resources and streamlining the student's work.</p> <p>The workshop aims to establish mechanisms for coordination and mainstreaming across studies, avoiding duplication and repetition in the content to facilitate an effective transit between semesters.</p> <p>Different projects will be developed mandatory.</p>
Case study	<p>The professors will show architectural projects of outstanding quality in order to serve as a model to develop the students' projects during the workshop. The projects will be shown to teach the relationship between the compositional processes of architecture and its construction. It will be assessed within the workshop.</p>
Objective test	<p>The objective tests seek to verify the application of knowledge and the skills acquired by students.</p> <p>They have documentary support of books and own notes based on a practical case.</p>
Workbook	<p>Specific readings support the lectures. These readings serve to introduce the topic, helping the students understand technical texts. It will be assessed within the objective test.</p>
Multiple-choice questions	<p>In order to promote learning and continuous assessment, students must complete four mandatory testing of different topics.</p> <p>These tests are carried out within the distance learning platform UDC Moodle.</p>

Personalized attention

Methodologies	Description
Workshop Case study	<p>Besides regular supervision during the workshop and case studies (the projects will be developed in open sessions in the presence of all students), professors offer weekly office hours, and they encourage students to use them for solving doubts and questions.</p>

Assessment

Methodologies	Competencies	Description	Qualification
Guest lecture / keynote speech	A2 A11 A32 A47 A58 A59 A64 B1 B2 B6 B8 B9 B10 B12 B13 B15 B16 B21 C1 C2 C4 C5 C6 C7 C8	<p>In order to pass the subject, attendance required is at least 75%. (January and July opportunities)</p> <p>When attendance is complete will be preserved in subsequent opportunities.</p> <p>Students must pass an objective test and several multiple-choice questions tests. The final mark will be the average only if they get at least a 4 score (out of 10) in the objective test.</p>	0
Objective test	A11 A32 A47 A58 A59 A64 B1 B2 B3 B8 B9 B12 B15 B16 B21 C1 C2 C3 C4 C5 C6 C7 C8	<p>The objective tests seek to verify the application of knowledge and the skills acquired by students. They will have documentary support of books and own notes.</p> <p>Students must pass an objective test and several multiple-choice questions tests. The final mark will be the average only if they get at least a 4 score (out of 10) in the objective test.</p> <p>Objective test: when students get at least a 5 score (out of 10), mark will be preserved until July (included). Students will not pass the objective test if they made serious mistakes such:</p> <p>Acoustical bridges; finishes: absence of expansion joints; wrong dimensions for stairs; contact between incompatible materials.</p>	25
Workbook	A47 A58 A59 A64 B1 B2 B3 B6 C2 C5 C6 C7 C8	It will be assessed within the objective test.	0

Multiple-choice questions	A11 A58 A59 B3 C3 C5 C6 C7 C8	Students must complete four mandatory testing of different topics. They must get at least a 5 score (out of 10) in each test (including penalizations). Three attempts in each is allowed with cumulative penalty of two points (first attempt: 0 points penalty, second attempt: 2 points, etc.) When students get at least a 5 score (out of 10), mark will be preserved until July (included) (for each test independently). These tests are carried out within the distance learning platform UDC Moodle.	25
Workshop	A2 A3 A8 A11 A28 A32 A47 A58 A59 A64 B1 B2 B3 B6 B8 B9 B10 B12 B13 B15 B16 B21 C1 C2 C3 C4 C5 C6 C7 C8	Attendance required: 80%. The assessment for compulsory projects is not restricted to content, the authorship must be proved. There will be no compensation between this evaluation and other qualifications of the subject. In the assessment, the delivery of each case study will be considered. Students must get at least a 5 score (out of 10). If so, the final mark will be an average between the workshop and the objective test/multiple-choice questions tests. In order to pass, first year students must deliver every part of the workshop. If not, they will obtain a "NO PRESENTADO" (absent from assessment). According to the documentation from ETSAC degree in Architecture memory, a Board of Assessment will be convened to analyze the results and resolve, if appropriate, specific cases of student assessment. Students who fail the workshop in January will have a second chance in July. If they obtain a "NO PRESENTADO" (absent from assessment), they won't have the second opportunity (July). Students who fail the specific part of the subject (Construction 3) (January and July) must develop in consecutive opportunities, with the appropriate adjustments, the project failed. This will happen in all opportunities and calls. Students with partial validations or exchange programs will have a set treatment for each case.	50
Case study	A2 A3 A8 A11 A28 A32 A47 A58 A59 A64 B1 B3 B6 B8 B9 B10 B12 B13 C3 C4 C5 C6 C7 C8	The professors will show architectural projects of outstanding quality in order to serve as a model to develop the students' projects during the workshop. The projects will be shown to teach the relationship between the compositional processes of architecture and its construction. It will be assessed within the workshop.	0

Assessment comments

The program, delivered at the beginning of the course, will include information about minimum contents, delivery dates, dates multiple choice tests, lessons, partial deliveries and everything needed to study the subject.

In order to promote continuous assessment, attendance will be controlled and the final mark will depend on the attitude and the work of the student. Students must pass theoretical and practical tests (Objective test, Multiple-choice questions tests), the workshop and case study. This will confirm if the student assimilated the concepts, the competences, and methods of work of the subject.

Students who failed in January will be able to pass the subject in the second opportunity (July) but if they obtain a "NO PRESENTADO" (absent from assessment), they won't have a second chance.

If students do not pass every part of the subject (Objective test, Multiple-choice questions tests, Workshop and Case study), even if they fail, or the minimum attendance, will obtain a "NO PRESENTADO" (absent from assessment) (in each opportunity)
