General description				

Study programme competences	
Code	Study programme competences
A1	PROXECTO BÁSICO ARQUITECTÓNICO E URBANO: aptitude ou capacidade para aplicar os principios básicos formais, funcionais e técnicos á concepción e deseño de edificios e de conxuntos urbanos, definindo as súas características xerais e as prestacións que se acadan.
A2	PROXECTOS DE EXECUCIÓN: aptitude ou capacidade para elaborar proxectos integrais de execución de edificios e espazos urbanos en grao de definición suficiente para a súa completa posta en obra e equipamento de servizos e instalacións.
A3	DIRECCIÓN DE OBRAS: aptitude ou capacidade para dirixir obras de edificación e urbanización desenvolvendo proxectos, replanteando no terreo, aplicando os procedementos de construción adecuados e coordinando oficios e industrias.
A5	INTERVENCIÓN NO PATRIMONIO EDIFICADO: aptitude ou capacidade para intervenir nos edificios de valor histórico, coordinar estudos históricos e arqueolóxicos sobre eles, elaborar os seus plans directores de conservación e redactar e executar os proxectos de restauración e rehabilitación.
A7	SUPRESIÓN DE BARREIRAS: aptitude ou capacidade para deseñar e executar edificios e espazos urbanos aptos para as persoas con diferentes capacidades físicas ou para adaptar con este fin os xa existentes.
A8	PROXECTO DE OBRA ACABADA: aptitude ou capacidade para dimensionar, deseñar, programar e poñer en obra e integrar en edificios e conxuntos urbanos as solucións construtivas, encontros e remates dos sistemas de obra acabada, divisións interiores, carpintería, escaleiras e demais obra acabada, en conxunto e en detalle, así como para asesorar tecnicamente sobre estes aspectos.
A9	CRÍTICA ARQUITECTÓNICA: aptitude ou capacidade para analizar morfolóxica e tipoloxicamente a arquitectura e a cidade e para explicar os precedentes formais e programáticos das solucións proxectuais.
A13	IDEACIÓN GRÁFICA: aptitude ou capacidade para concibir e representar graficamente a figura, a cor, a textura e a luminosidade dos obxectos e dominar a proporción e as técnicas de debuxo, incluídas as informáticas.
A20	PROXECTO DE ESPAZOS LIBRES: aptitude ou capacidade para redactar e executar trazados urbanos e proxectos de urbanización e de xardinería, así como os de obra civil e complementaria asociada a eles.
A34	FUNCIÓNS PRÁCTICAS E SIMBÓLICAS: comprensión ou coñecemento dos métodos de estudo dos procesos de simbolización da ergonómia e das relacións entre o comportamento humano, o entorno natural ou artificial e os obxectos, de acordo cos requirimentos e a escala humanos.
A35	SOCIOLOXÍA RESIDENCIAL: comprensión ou coñecemento dos métodos de estudo das necesidades e demandas sociais, dos compoñentes da calidade de vida, das condicións de habitabilidade e dos programas básicos de vivenda.

A36	SOCIOLOXÍA CULTURAL: comprensión ou coñecemento das implicacións que nas funcións e responsabilidades sociais do arquitecto ten as necesidades, valores, normas de conduta e de organización e patróns espaciais e simbólicos determinados pola pertenza a unha cultura.
A61	FUNDAMENTOS LEGAIS: comprensión ou coñecemento do marco legal do desempeño profesional no relativo á saúde, a seguridade e o benestar públicos e á regulamentación civil, administrativa, urbanística, da edificación e da industria.
A63	TRÁMITES PROFESIONAIS: comprensión ou coñecemento dos procedementos administrativos da actividade arquitectónica, como os de financiamento e contratación de obras, preparación de expedientes unitarios, presentación de documentos e xestión de visados e licenzas.
A65	METODOLOXÍA DO TRABALLO: comprensión ou coñecemento dos sistemas de organización das oficinas profesionais respecto á distribución de tarefas e responsabilidades, ao control de tempos de produción, custos e rendementos laborais, á administración económica e á planificación comercial.
B1	Learn how to learn
B2	Resolver problemas de forma efectiva.
B3	Aplicar un pensamento crítico, lóxico e creativo.
B4	Traballar de forma autónoma con iniciativa.
B5	Traballar de forma colaborativa.
B6	Comportarse con ética e responsabilidade social como cidadán e como profesional.
B7	Comunicarse de maneira efectiva nun entorno de traballo.
B8	Visión espacial.
B9	Creatividade.
B10	Sensibilidade estética.
B11	Capacidade de análise e síntese.
B12	Toma de decisións.
B13	Imaxinación.
B14	Habilidade gráfica xeral.
B15	Capacidade de organización e planificación.
B16	Motivación pola calidade.
B17	Cultura histórica.
B18	Razoamento crítico.
B19	Traballo nun equipo de carácter interdisciplinar.
B20	Sensibilidade cara a temas medioambientais.
C1	Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.
C2	Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro.
C5	Entender a importancia da cultura emprendedora e coñecer os medios ao alcance das persoas emprendedoras.

## Learning outcomes

Learning outcomes

Study programme  
competences

<p>By passing this course, students should be able to:</p> <ul style="list-style-type: none"> <li>- Knowing how to manage intellectual and material tools to undertake the conception and development of an architectural design of a small scale and low complexity.</li> <li>- Know how to relate the different scales of analysis and realization of the project, from planning to detail, including certain elements of constructive definition.</li> <li>- Be able to develop the technical documentation required for a project of low complexity and scale, showing accurately its formal settings and developing certain constructive aspects, and considering basic aspects of technical and planning regulations.</li> <li>- Use various tools and techniques to properly handle the processes of creation and ideation.</li> </ul>	A1	B1	C1

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Introductory activities	In the first classes of this course, different tests will be posed to students in order to know their level of architectural expression. These tests will be done in the classroom.
Document analysis	Before starting the development work material in the Workshop, will proceed to the analysis of documentary sources related to the theme by using audiovisual documents, bibliographical, documentary reports, graphic panels, photographs, models, articles, informational texts , applicable regulations, etc.. The so formed groups (teacher - student) analyze the available documentation and complete it, producing a synthesis of various documentary sources. This analysis is complemented with interventions and architecture professionals from other fields, to be invited to conduct talks and discussions with development of specific issues and personal experiences.
Collaborative learning	The class is divided into small working groups, where students work together to solve the tasks assigned by the teacher. The group is organized to get the most information possible and share it (analysis of the plot, finding examples of regulations, general construction site layout, data or in situ measurements, infographic treatment documentation obtained, etc.. ). This work is guided by the teacher. Its objective is to optimize both individual and group learning.
Directed discussion	Both the grupal and individual work is exposed publicly to encourage group members to participate in the creative process of self and others, in a free, informal and spontaneous way
Diagramming	The data obtained in the analysis, as well as the intentions of the project, will be expressed in simplified graphic form in the early stages of each job. These are the phases of background information and draft.
Workshop	Projects are developed by combining different methodologies and tests: attending exhibitions and lectures, by discussion of specific problems of the program, etc. The student works mainly on practical tasks in each exercise, always under the support and supervision of teachers.

Guest lecture / keynote speech	Expository teaching is organized around subject content. Periodically, conferences and / or exhibitions related to the topic at hand in each year will be held, in which the rapporteur will present orally and / or graphical information to students.
Supervised projects	It aims to promote independent learning of students, under the guidance of the teacher. It refers to learning "how to do", where the student is responsible of his own formation.
Objective test	There will be an objective test on the contents presented in the sessions, which form the theoretical and normative framework of the subject.
Student portfolio	As a result of their work at the end of the semester, each student will have developed its own portfolio, accessible through the Moodle teaching platform. This document, elaborated through the group sessions and the workshop, will serve as a basis for personnel qualification and student curriculum vitae.

### Personalized attention

Methodologies	Description
Workshop Directed discussion Student portfolio Supervised projects	<p>The student receives personalized attention by his/her group's teacher, concerning the work that is developing in the subject and in the Workshop. In the Workshop he/she also will be able to comment and get critical revision by the teachers of other subjects and groups, to compare opinions and criteria and confront them with their own.</p> <p>The student's portfolio will be subject to reviews custom to observe its evolution and verify his/hers own.</p>

### Assessment

Methodologies	Competencies / Results	Description	Qualification
Objective test		Instrumental knowledge contained within the agenda of expository teaching of the course will be evaluated through an objective test.	20
Student portfolio		<p>The final result of the whole work done in the course will be reflected in the student's personal portfolio, available and accessible through Moodle.</p> <p>The results will be evaluated through a supervised and guided teaching process, where personal effort and intellectual development of the student should appear reflected in the final documentation.</p>	80

### Assessment comments

In order to pass the course, the student must meet the following requirements:

1. Deliver all work proposed, under the specified terms and forms.

2. Attend the classes and Workshop on a regular basis. A minimum attendance of 80% is required.

The students in any of the following circumstances will be considered as NOT FILED:

1. Do not submit the proposed work as and when due, or submit incomplete. Jobs that do not contain the documentation required in all subjects comprising the workshop will be considered incomplete.

2. Do not meet the minimum attendance requirements.

3. Do not attend the objective test.

According to that established in the memory of the Degree of Architect, the Workshop Board of Assessment will analyze the overall results thereof and shall rule, if appropriate, on specific cases of student assessment.

According to that established in the memory of the Degree of Architect, students who do not pass the workshop next year. In this case, the students, in addition to Proyectos 5, must develop the work of the materials that failed in the workshop last year. Tests of different opportunities allow students to complete and modify all or part of the papers presented at the workshop, and to overcome some or all of the subject.
