| General description | Wastewater treatment has become a | fundamental tool in water ma | nagement. Indeed, the | e ultimate aim of the Water | |
| | Framework Directive (2000/60/EC) is to achieve the elimination of hazardous substances and contribute to achieving | | | | |
| | concentrations near background values for naturally occurring substances in both freshwater and marine ecosystems. The | | | | |
| | main purpose of this subject is to help students identify and evaluate risk factors and processes involved in water pollution | | | | |
| | and water treatment. | | | | |

| | Study programme competences |
|------|---|
| Code | Study programme competences |
| A19 | Knowledge of advanced water treatment with different conclusions: depuration, re-use, purification, elimination of nutrients and |
| | regeneration treatments |
| A23 | Fundamental knowledge of energy consumption and its environmental implications inside a development sustainable |
| A25 | Knowledge and understanding of water in different situations: the working of ecosystems, environmental factors with the purpose of to |
| | make an inventory of medium, applying the methodology to value the impact and its use in studies and evaluations of the environmental |
| | impact. |
| B1 | To resolve problems effectively |
| B2 | To apply critical thinking, logic and creativity |
| B3 | To work individually with initiative |
| B4 | To communicate effectively in work surroundings |
| B5 | Continuous recycling of knowledge in a general perspective in a global situation of water engineering |
| B6 | Understanding of the need to analyse history to understand the present |
| B7 | Facility to integrate in multidiscipline teams |
| B8 | Capacity to organize and plan |
| B9 | Capacity for analysis, synthesis and structure of information and ideas |
| C1 | To understand the importance of the enterprising culture and to know the means at the reach of the enterprising people |
| C2 | To value knowledge critically, technology and available information to resolve problems that they will face |
| C3 | To assume as a professional and citizen the importance of learning throughout life |
| C4 | To value the importance of the investigation, innovation and technology development in the social ?economic advance and cultural in |
| | society |
| C5 | To posses and understand knowledge that gives a base or oportunity to be original in the development and for applications of ideas, ofter |
| | in the context of investigation |
| C6 | The students must be able to apply the acquired knowledge and their capacity to resolve problems in new surrandings or not well known |
| | within wider contexts (or multidiscipline) related with the study area |
| C7 | The students must be able to integrate knowledge and to affront the complexity to formulate judgements from information that, been |
| | incomplete or limited, include reflexions about social responsabilities and ethics related to the application of the knowledge and judments |

| C8 | The students must be able to comunicate their conclusions, knowledge and the last reasons that support them, to spezialated publics and |
|----|---|
| | not spezialated in a clear and unambiguous way. |
| C9 | The student must possess the learning ability with permits them to continues to study in a manner wich will be in a great measure self |
| | directed and individual |

| Learning outcomes | | | |
|--|-------|----------|------|
| Learning outcomes | Study | / progra | amme |
| | cor | npeten | ces |
| The learning outcomes address water treatment and how it influences the normal functioning of freshwater ecosystems. | AC19 | BC1 | CC1 |
| | AC23 | BC2 | CC2 |
| | AC25 | BC3 | CC3 |
| | | BC4 | CC4 |
| | | BC5 | CC5 |
| | | BC6 | CC6 |
| | | BC7 | CC7 |
| | | BC8 | CC8 |
| | | BC9 | CC9 |

| | Contents |
|---|--|
| Торіс | Sub-topic |
| Water, energy and sustainable development. Life cycle | Water demand |
| analysis | Water footprint and carbon footprint |
| | Greenhouse gases emission |
| Water reuse as an example of sustainable initiative | Water reuse options |
| | Treatment options and their energy requirements |
| | Life cycle analysis of water reuse |
| Renewable energies to face water scarcity | The problem of the water and the energy |
| | Technologies based on renewable energies for freshwater production |
| Water and energy: two closely-related concepts | Introduction |
| | The use of energy to obtain the required water |
| | Energy obtained from water |
| | The use of water to obtain energy |
| The functioning of freshwater ecosystems | Lentic systems |
| | Lotic systems |
| Freshwater biodiversity. Types of aquatic organisms | Microbes and plants |
| | Animals |
| Effects of pollutants on aquatic ecosystems | Suborganismal effects |
| | Supraorganismal effects |
| The use of bioindicators to assess freshwater quality | Bioindicators recommended by the Water Framework Directive |
| Chemical contaminants of water | Types |
| | Standards |
| | Problems |
| | Health Effects and Impact on the environment |
| Chemical treatments | Coagulation-precipitation |
| | Oxidation reduction |
| | Ion exchange |
| | Disinfection |
| | High-service pumping |
| | Water plant residuals managment |

| Types of water contamination | Domestic wastewater |
|---|-------------------------|
| | Livestock Wastewater |
| | Industrial wastewater |
| | Municipal waste water |
| | Agricultural pollution |
| | Water from urban runoff |
| Analytical methods for the determination of physicochemical | Analytical methods |
| parameters | |

| Planning | | | |

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| | Methodologies |
|-----------------|--|
| Methodologies | Description |
| Guest lecture / | Regular lectures where the main theoretical contents of the subject are regarded |
| keynote speech | |
| Seminar | Practical lectures related to the theoretical aspects regarded at the magistral lectures |

| | Personalized attention | |
|---------------------------|--|--|
| Methodologies Description | | |
| Seminar | Personalized attention to be provided for the seminars | |

| | Assessment | | | |
|-----------------|-------------------|---|---------------|--|
| Methodologies | Competencies | Description | Qualification | |
| Seminar | B1 B2 B3 B4 B5 B7 | The attendance to the seminars and the work being developed at the seminars will be | 50 | |
| | B8 B9 C1 C2 C3 C4 | considered for the final mark | | |
| | C5 C6 C7 C8 C9 | | | |
| Guest lecture / | A19 A23 A25 B6 | The knowledge of the concepts developed at the magistral lectures will be assesed | 50 | |
| keynote speech | | and considered for the final mark | | |
