General description	With this subject Comunitary and	Public health are addres	sed from tl	he perspective of Phy	siotherapy and the Spanish	
	health system, developing tools such as health promotion, prevention and health education, programming, teamwork					
	epidemiology					

	Study programme competences / results
Code	Study programme competences / results
A12	Intervenir en los ámbitos de promoción, prevención, protección y recuperación de la salud.
A13	Saber trabajar en equipos profesionales como unidad básica en la que se estructuran de forma uni o multidisciplinar e interdisciplinar los
	profesionales y demás personal de las organizaciones asistenciales.
A14	Incorporar los principios éticos y legales de la profesión a la práctica profesional así como integrar los aspectos sociales y comunitarios en
	la toma de decisiones.
A17	Comprender la importancia de actualizar los conocimientos, habilidades, destrezas y actitudes que integran las competencias
	profesionales del fisioterapeuta.
A18	Adquirir habilidades de gestión clínica que incluyan el uso eficiente de los recursos sanitarios y desarrollar actividades de planificación,
	gestión y control en las unidades asistenciales donde se preste atención en fisioterapia y su relación con otros servicios sanitarios.
A19	Comunicarse de modo efectivo y claro, tanto de forma oral como escrita, con los usuarios del sistema sanitario así como con otros
	profesionales.
C1	Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.
C4	Desenvolverse para o exercicio dunha cidadanía aberta, culta, crítica, comprometida, democrática e solidaria, capaz de analizar a
	realidade, diagnosticar problemas, formular e implantar solucións baseadas no coñecemento e orientadas ao ben común.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.
C7	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.

	Contents
Торіс	Sub-topic
UNIT 1. INTRODUCTION; BASIC CONCEPTS IN	
COMMUNITY HEALTH AND PUBLIC HEALTH FROM THE	
PERSPECTIVE OF THE PHYSIOTHERAPY. CONCEPTUAL	
FRAMEWORK.	
	Health and their determinants.
Lesson 1. Concept of health.	
Lesson 2. Community physiotherapy and public Health.	Biopsicosocial perspective and his implications.
	Concept of community health and levels of action.
	Concept of public Health and actions.
	Levels of prevention.
Lesson 3. Social organization of healthcare.	Models of healthcare. National system of health.
	Intervention in formal and informal community environments. Primary attention of
	health. Domiciliary attention and in working/leisure- community environments.
	Cooperation.
UNIT 2. EPIDEMIOLOGY AND HEALTH DEMOGRAPHY	Concept. Dinamic and static demography. Taxes adjust.
Lesson 4. Demography.	
Lesson 5. Types of epidemiologic studies.	Criteria for the classification
Lesos 6. Frequency disease measurements.	Incidence and prevalence.
Lesson 7. Cohort studies.	Relative risk. Advantages and limitations
Lesson 8. Case-control studies.	Odds ratio. Advantages and limitations.
Lesson 9. Studies for the evaluation of diagnostic tests.	Sensitivity, specificity and predictive values.
Lesson 10. General epidemiology of communicable diseases.	General basis for their prevention.
Lesson 11. General epidemiology of chronic diseases.	Double burden of disease. Indicators of chronic diseases. Years of disability-adjusted
	life.
Lesson 12. Vaccines.	Concept. Classification. composition
UNIT 3. TEAM METHODOLOGY AND ACTION IN	Team working concept versus working in groups. Functioning, organization and
COMMUNITY PHYSIOTHERAPY.	communication.
Lesson 13. Communication and team working.	
Leeson 14. Health Promotion. Health Education.	Concept and methods.
Lesson 15. Health Panning.	Health plans and programs.

Lesson 16. Qualitative research.	Concept and phases.
	echniques of information collection (individual and by group ones).

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

	Methodologies
Methodologies	Description
Guest lecture /	Oral presentation complemented by the use of media and the introduction of some questions to the students, in order to
keynote speech	improve the knowledge and facilitate learning. to this effect, some can be used interactively.
Directed discussion	Community physiotherapy module
	Analysis and discussion of materials (publications and articles, brochures, audiovisual materials, news, etc.) related to
	community physiotherapy, health promotion and prevention, or closely related concepts (determinants of health and health
	equity, social organization for health care, bioethics, qualitative research, etc).
	Public Health module
	Presentation for discussion and resolution of different types of exercises in which the type of epidemiological study and identify
	appropriate risk measure is calculated
Collaborative learning	Community physiotherapy module
	Community Program physiotherapy, prevention or health promotion (team). Have a part of oral exposure.
	Public Health Module
	To develop in group a type of epidemiological study, describing their objectives, methodology and data analysis.
Mixed	The exam will consider the content and skills worked in theoretical clasess (lectures) and directed discussions (interactive
objective/subjective	classes) and in collaborative learning (practical classes and self-working)
test	

	Personalized attention		
Methodologies	Description		
Collaborative learning	ollaborative learning The monitoring of the student work performed by teams will be done.		

Assessment

Methodologies	Competencies /	Description	Qualification
	Results		
Mixed	A12 A13 A14 A18	Community physiotherapy module	70
objective/subjective	A19 C1 C4 C6		
test		Examination will consist of multiple choice questions, open questions and analysis of a	
		text, in order to evaluate the skills of this module. Account for up to 30% of the final	
		grade, provided that the student has succeed in public health part.	
		Public Health module	
		To assess the knowledge acquired in the part of the subject taught by the teacher	
		Saleta, students must pass a written exam consisting of multiple choice questions,	
		short questions and exercises that will require calculation. To take the exam will need	
		to meet two requirements for the course: one is that the student should not have	
		missed practical lessons more than once, and the other is that it should work in the	
		research group. In the event that during the course you could not participate in the	
		work, you must submit the work on your own, for July . This written examination	
		equivalent to 40% of the final grade, provided they have succeed in Community	
		physiotherapy part.	
		Will be essential to overcome each of the modules of the course and to approve and	
		make half with the other module.	
Collaborative learning	A12 A13 A14 A17	Community physiotherapy module	30
	A18 A19 C1 C4 C6		
	C7	Design and presentation of a program of community physiotherapy, health promotion	
		or prevention, in teams of about 5 people. It wiill represent up to 20% of the final	
		grade.	
		Public health module.	
		Evaluation of research work to be conducted in groups of approximately 10 students.	
		He counted up to 10% of the final grade.	

Assessment comments

The mean mark only will be done if both modules are overcome.

To pass the part of the subject taught by the teacher Saleta is essential attend practical classes and participate with the rest of the peer group in conducting a research. If more than one practical class is missed or don't participate in the research WILL CONSTITUTE A FAILURE OF THE PART TAUGHT BY PROFESSOR. For subsequent calls will be indispensable to present a research work individually, if you have not participated in group work during the course.
