General description	The aim of this course is to provide n	najor advances in cognitive p	sychology research on	learning, associative learning
	especially considering their application	ons both to the educational e	nvironment and the hea	alth.

	Study programme competences
Code	Study programme competences
A5	Being able to perform a psychological evaluation in the context of a scientific investigation.
A8	To know the basis for hypotheses establishment with respect to a particular case, and from them to deduce contrastable statements.
A12	To acquire a basic theoretical knowledge about the state of the art in the different areas involved in applied psychology.
B1	Capacity for analysis and synthesis.
B6	Critical thinking.
B8	Autonomous learning.
C3	Using the basic tools of information and communication technologies (ICT) necessary for the exercise of the profession and for lifelong
	learning.
C6	To critically assess the knowledge, technology and information available to solve the problems they face.
C8	Assessing the importance of research, innovation and technology development in the socio-economic and cultural progress of society.

progress of society.			

Contents		
Topic	Sub-topic	

Item 1: Introduction	Information processing, cognition and physiology
	Electrodermal activity
	The heart rate
Item 2: Reflexes Systems	Theories
	Research
	Applications
Item 3: Conditioning and consciousness	Theories of human conditioning
	Unconscious associative learning
	Techniques and experimental preparations
Item 4: Learning of non-contingency (Learned Helplessness)	Theoretical aspects
	Empirical findings
	Applications to educational and health
Item 5: Complex Learning: Observational Learning	Theoretical aspects: Social Cognitive Theory
	Interventional procedures based on observational learning

	Plannin	g		
Methodologies / tests	Competencies	Ordinary class	Student?s personal	Total hours
		hours	work hours	
Objective test	A12 B6	1	0	1
Workbook	B1 B8	1	14	15
Guest lecture / keynote speech	C6	12	6	18
Supervised projects	A5 A8	2	20	22
Laboratory practice	C3 C8	9	5	14
Personalized attention		5	0	5

	Methodologies		
Methodologies	Description		
Objective test	Choice questions with four possible response options. There will always be one right choice		
Workbook	Reading and critical commentary on a topic assigned by the professor		
Guest lecture /	Exposure and development of the theoretical and empirical findings of fundamental matter, supported by media. At the end of		
keynote speech	issue dialogue with the students will be encouraged on the content covered		
Supervised projects	The student must choose a topic, or part of a subject matter, that should be so organized and developed critical		
Laboratory practice	Reproduction and /or laboratory demonstration of various phenomena related to the contents of the matter		

	Personalized attention
Methodologies	Description
Laboratory practice	The professor will follow the development of the ward work, trying to resolve the doubts of the students, as well as guidelines
Supervised projects	indicating that help its proper implementation.
	Before practice inform the student on each of the phases and will specify their task on it. At the end will show and explain the results

		Assessment	
Methodologies	Competencies	Description	Qualification
Guest lecture /	C6	Attendance, attitude and participation in keynote speech (lectures) will be considered	5
keynote speech			
Objective test	A12 B6	A test consisting of 20 multiple choice questions with four possible options. Only one	40
		option is correct.	

Laboratory practice	C3 C8	Shall be considered for evaluation purposes attendance, attitude and participation in practical classes	5
Workbook	B1 B8	Students will deliver a " critical summary" item 4 (Learning non-contingency: Learned helplessness). The content and presentation of the same shall be taken into account.	20
Supervised projects	A5 A8	Research project on the content of any item other than item 4	30

Assessment comments

Requirements to pass the course: 1). The student must pass the objective test (must obtain a minimum score of 20% on 40% total). 2). The student must obtain 50% (corresponding to a score of 5 points) on 100% overall.

The student may decide not to make the "supervised project" (Research Project). In this case the objective test will be worth 70%.
