

Teaching Guide						
Identifying Data				2016/17		
Subject (*)	METROLOXÍA E CONTROL DA CALIDADE		Code	730G03032		
Study programme	Grao en Enxeñaría Mecánica					
Descriptors						
Cycle	Period	Year	Type	Credits		
Graduate	2nd four-month period	Third	Obligatoria	6		
Language	Spanish/Galician					
Teaching method	Face-to-face					
Prerequisites						
Department	Enxeñaría Industrial 2					
Coordinador	Yañez Casal, Armando Jose	E-mail	armando.yanez@udc.es			
Lecturers	Lopez Diaz, Ana Jesus Yañez Casal, Armando Jose	E-mail	ana.xesus.lopez@udc.es armando.yanez@udc.es			
Web						
General description	<p>The subject of Metrology and Quality Control deals with the techniques necessary for the planning and implementation of quality control in manufacturing processes. First introduced on the concepts fundamental measurement to characterize the variables that will later be used in quality control.</p> <p>Later, it focuses on the close relationship between the variability of the manufacturing parameters and quality end product, for day after studying such variability from a statistical viewpoint.</p> <p>Finally, describes the technical quality control based on statistics, which is known as statistical process control. Such techniques are aimed at finding a balance between the costs of quality control, cope with the costs of making a potential insufficient control.</p>					

Study programme competences / results	
Code	Study programme competences / results
A26	Coñecemento aplicado de sistemas e procesos de fabricación, metroloxía e control de calidade.
B1	Que os estudantes demostren posuír e comprender coñecementos nunha área de estudo que parte da base da educación secundaria xeral e adoita encontrarse a un nivel que, áinda que se apoia en libros de texto avanzados, inclúe tamén algúns aspectos que implican coñecementos procedentes da vanguarda do seu campo de estudo
B2	Que os estudantes saibam aplicar os seus coñecementos ao seu traballo ou vocación dunha forma profesional e posúan as competencias que adoitan demostrarse por medio da elaboración e defensa de argumentos e a resolución de problemas dentro da súa área de estudo
B4	Que os estudantes poidan transmitir información, ideas, problemas e solucións a un público tanto especializado como leigo
B5	Que os estudantes desenvolvan aquelas habilidades de aprendizaxe necesarias para emprenderen estudos posteriores cun alto grao de autonomía
B7	Ser capaz de realizar unha análise crítica, avaliación e síntese de ideas novas e complexas
B9	Adquirir unha formación metodolóxica que garanta o desenvolvemento de proxectos de investigación (de carácter cuantitativo e/ou cualitativo) cunha finalidade estratéxica e que contribúan a situarnos na vanguarda do coñecemento
C1	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C2	Desenvolverse para o exercicio dunha cidadanía aberta, culta, crítica, comprometida, democrática e solidaria, capaz de analizar a realidade, diagnosticar problemas, formular e implantar solucións baseadas no coñecemento e orientadas ao ben común.
C4	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse.
C5	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.

Learning outcomes

Learning outcomes	Study programme competences / results		
Knowing the measurement principles that should be taken into account to make a measurement	A26	B1 B2 B4 B5 B7 B9	C1 C4 C5
Knowing the tools currently available to characterize dimensionally industrial product. Select the most appropriate to take a measurement.	A26	B1 B2 B4 B5 B7 B9	C1 C4 C5
Understanding the importance of quality control in modern manufacturing processes. Studying different types of variability, its causes and effects. Understanding variability as a measure of the quality of a manufacturing process.	A26	B1 B2 B4 B5 B7 B9	C1 C4 C5
Knowing the basic statistical tools to analyze properly the behavior of the variables that define the quality of a product. Studying the methods commonly used to verify the existence of cause-effect relationships between process variables.	A26	B1 B2 B4 B5 B7 B9	C1 C4 C5
Knowing the most common methods for statistical process control, especially control charts. Learning how to perform and interpret these graphs by using statistical software.	A26	B1 B2 B4 B5 B7 B9	C1 C4 C5
A complementary fashion, in addition to the above knowledge, characteristic of the course, students will develop their skills in teamwork, information search and management literature, writing papers, exhibition and public defense and critical analysis, among others.		B1 B2 B4 B5 B7 B9	C1 C2 C4 C5

Contents	
Topic	Sub-topic
1. Introduction to metrology.	1.1. Introduction and history of metrology. 1.2. Systems units. The International System. 1.3. The measurement procedure. 1.4. Uncertainty quantification 1.5. Traceability and calibration

2. Applications of metrology industry	2.1. Dimensional metrology. 2.2. Length measurement. Instrumentation. 2.3. Surface quality: Roughness 2.4. Other measures: mass, time, temperature, light intensity and electrical quantities.
3. Quality Control	3.1. Introduction to quality control 3.1.1. Historical development of quality control 3.1.2. Maintaining and improving quality 3.2. Basic tools for quality improvement 3.2.1. Data collection. 3.2.2. Diagrams and their types: Pareto, cause and effect, bivariate.
4. Variability in quality control	4.1. Causes of variability 4.2. Probabilistic models. 4.3. Comparison of two treatments. 4.4. Comparison of more than two treatments: Analysis of variance
5. Statistical Process Control	5.1. introduction 5.2. Control charts. 5.3. for variables 5.4. For attributes. 5.5. Other control charts.

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student's personal work hours	Total hours
Guest lecture / keynote speech	A26 B1 B5 B7 B9 C1 C2 C4 C5	21	15	36
Problem solving	A26 B1 B2 B4 B5 B7 B9 C1 C2 C4 C5	16	35	51
Seminar	A26 B1 B2 B4 B5 B7 B9 C1 C2 C4 C5	8	10	18
Mixed objective/subjective test	A26 B1 B2 B4 B5 B7 B9 C1 C4	2.5	20	22.5
Supervised projects	A26 B1 B2 B4 B5 B7 B9 C1 C2 C4 C5	0	20.5	20.5
Personalized attention		2	0	2

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Lectures which will develop the course content
Problem solving	Interactive classes in which they solve exercises representative of content covered in lectures.
Seminar	Tutoring lessons in small groups where they will analyze and discuss the issues that have a major difficulty for students and the supervised work
Mixed objective/subjective test	In addition to the various activities planned, students must take a final exam on the content of the material, which consist of a series of short questions of theory and practice, as well as two or three issues of implementation, with a total duration of approximately two hours.
Supervised projects	El alumnado deberá desarrollar y entregar una serie de ejercicios y actividades propuestas durante el curso, sobre aplicaciones concretas de algunos aspectos de la materia.

Personalized attention

Methodologies	Description
Problem solving	For questions about any aspect that students deems appropriate, besides tutorials in small groups, there are six hours a week
Supervised projects	of tutoring in the schedule published by the website of the UDC.
Seminar	

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Mixed objective/subjective test	A26 B1 B2 B4 B5 B7 B9 C1 C4	In addition to the various activities planned, students must take a final exam on the contents of the subject, which consist of a series of short questions of theory and practice, as well as two or three issues of implementation, with a total duration of approximately two hours.	80
Supervised projects	A26 B1 B2 B4 B5 B7 B9 C1 C2 C4 C5	Students must develop and deliver a series of exercises and activities proposed during the course, on the specific application of some aspects of the subject.	20
