General description	In this subject studies the quality of t	he electrical service from	the point of view of the le	gislation and rule at present va
	1			

	Study programme competences / results	
Code	Study programme competences / results	
A1	Análise e aplicación de metodoloxías e normativa para unha xestión eficiente da enerxía.	
В9	Extraer, interpretar y procesar información, procedente de diferentes fuentes, para su empleo en el estudio y análisis.	
B13	Aplicar los conocimientos teóricos a la práctica	
B15	Conocer la legislación vigente y reglamentación aplicable al sector de las energías renovables y de la eficiencia energética.	
C1	Adquirir la terminología y nomenclatura científico-técnica para exponer argumentos y fundamentar conclusiones.	

Learning outcomes			
Learning outcomes	Stud	y progra	mme
	cor	npetenc	es/
		results	
Know the legislation and the at present valid rule on quality of the electrical service.	AJ1	BC9	
		BC15	
Know the main types of perturbations and events that affect to the quality of the electrical service, as well as his causes,		BC13	CC1
effects and measures of correction.			
Know the main characteristic of an analyser of power to select the most suitable.		BC9

	Methodologies
Methodologies	Description
Introductory activities	Presentation of the subject, in big group (GG).
Guest lecture /	Oral exhibition complemented with the use of audiovisual means and the introduction of motivating questions headed to the
keynote speech	students, with the purpose to transmit knowledges and facilitate the learning.
	It corresponds to the class of theory, in big group (GG).
Problem solving	Technician by means of which has to resolve a concrete problematic situation, from the knowledges and procedures that have studied and worked.
	It corresponds to the class of problems, in average group (GM).
Laboratory practice	Methodology that allows that the students apply the knowledges purchased, through the realisation of activities of practical
	character.
	It corresponds to the practices of workshop, in small group (GP).

Supervised projects	Methodology designed to promote the autonomous learning of the students, under the tutela of the professor and in a
	professional stage. It is referred prioritariamente to the learning of the "cómo do the things". It constitutes an option
	based in the assumption by the students of the responsibility by his own learning.
	This system of education bases in two basic elements: the independent learning of the students and the follow-up of this learning by the professor.
	With this methodology pretends that the student can know the characteristics of the analysers of power to be able to select the most adapted of between the commercial offer that offers the market.
	It is a complementary activity of the practices of workshop, in small group (GP).
Objective test	Proof written used for the evaluation of the learning.
	With the end to value with greater rigour the achievement of the aims, the proof consists of two parts differentiated: questions of multiple answer (ítems) and resolution of problems.
	Questions of multiple answer (items): it constitutes an instrument of measure, whose distinctive shot is that it allows to describe the answers given like correct or no; in addition to valuing the knowledges purchased.
	Resolution of problems: part in which it pretends evaluate conceptual contents, procedimentales and actitudinales.
	It corresponds to the examination of theory and problems.

	Personalized attention		
Methodologies	Description		
Objective test	Tutorials of review of examinations.		

		Assessment	
Methodologies	Competencies /	Description	Qualification
	Results		
Laboratory practice	B13	The qualification will be the sum of the corresponding note to the assistance and evaluation of the practices of workshop, that will value between 0 and 5 points, and the note of a final examination (proof of multiple answer), that will value also between 0 and 5 points.	25
Supervised projects	B9 C1	The qualification will correspond to the evaluation of the extension and quality of the work presented, that will value between 0 and 10 points.	25
Objective test	A1 B15 B13 C1	This proof consists in the resolution of problems and/or ítems, and will compute between 0 and 10 points.	50

Assessment comments

Rating of subject = [objective Proof (theory and problems) * 0'50] [Practices of laboratory * 0'25] [Mentored work * 0'25]. To surpass the matter is necessary to obtain, at least, five points in the note of the matter.
