

## Teaching Guide

Identifying Data					2016/17
Subject (*)	Sistemas de Almacenamento de Enerxía		Code	770523019	
Study programme	Mestrado Universitario en Eficiencia e Aproveitamento Enerxético				
Descriptors					
Cycle	Period	Year	Type	Credits	
Official Master's Degree	2nd four-month period	First	Optativa	3	
Language	Spanish				
Teaching method	Face-to-face				
Prerequisites					
Department	Enxeñaría Industrial				
Coordinador	Casteleiro Roca, José Luis	E-mail	jose.luis.casteleiro@udc.es		
Lecturers	Casteleiro Roca, José Luis	E-mail	jose.luis.casteleiro@udc.es		
Web					
General description	This subject aims to give students theoretical knowledge of various types of Energy Storage systems used nowadays.				

## Study programme competences / results

Code	Study programme competences / results
A13	Capacidad para analizar, aplicar y optimizar los sistemas de aprovechamiento energético.
B3	Poseer y comprender conocimientos que aporten una base u oportunidad de ser originales en el desarrollo y/o aplicación de ideas, a menudo en un contexto de investigación.
B5	Que los estudiantes sepan comunicar sus conclusiones y los conocimientos y razones últimas que las sustentan a públicos especializados y no especializados de un modo claro y sin ambigüedades.
B6	Buscar y seleccionar alternativas considerando las mejores soluciones posibles.
B10	Potenciar la creatividad.
B13	Aplicar los conocimientos teóricos a la práctica
C1	Adquirir la terminología y nomenclatura científico-técnica para exponer argumentos y fundamentar conclusiones.
C3	Aplicar una metodología que fomente el aprendizaje y el trabajo autónomo.
C5	Adquirir la capacidad para elaborar un trabajo multidisciplinar

## Learning outcomes

Learning outcomes	Study programme competences / results		
Knowing the Energy Storage Systems based on reservoirs	AJ13	BC6 BC13	CC3
Knowing the Energy Storage Systems based on inertial disks	AJ13	BC6 BC10	CC5
Knowing the Energy Storage Systems based on compressed air	AJ13	BC5 BC6	CC5
Knowing the Energy Storage Systems based on hydrogen	AJ13	BC3 BC10	CC1

## Contents

Topic	Sub-topic
Topic 1: Need for energy storage	1.1. The binomial generation-production 1.2. Problems of load variation in the power stations
Topic 2: Potential energy storage	2.1. Operating principle 2.2. Storage reservoirs. Pump stations

Topic 3: Kinetic energy storage	3.1. Operating principle 3.2. Inertial storage disks
Topic 4: Energy storage with engines	4.1. Operating principle 4.2. Compressed air 4.3. Hydrogen

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A13 B6 B13	10	28	38
Laboratory practice	B10 B3 C3 C5	14	12	26
Objective test	B5 B6 C1	3	7	10
Personalized attention		1	0	1

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Keynote speech complemented with the use of audiovisual media and the introduction of some questions to students, in order to transmit knowledge and facilitate learning.  The order of the topics covered will not have to be the one described in the teaching guide. In addition, there will be topics that can be seen together on the development of others, and the division between them may not be strict.
Laboratory practice	Performing laboratory practice as far as possible; or, failing that, solving exercises and specific problems in the classroom, from the knowledge explained.
Objective test	It consists in carrying out an objective test of approximately 3 hours, in which the acquired knowledge will be evaluated.

Personalized attention	
Methodologies	Description
Laboratory practice	The student has the relevant meetings of personalized tutorials, to resolve the concerns arising from the matter.

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Objective test	B5 B6 C1	Exam type objective test	75
Laboratory practice	B10 B3 C3 C5	Some tasks established in the subject, within the framework of this methodology	25

Assessment comments
As part of the "Laboratory practice" may include aspects such as attendance, personal work, proposed personal work, attitude, etc., to help to pass the subject.  The "Objective test" will be divided into a theoretical and practical part.  It is necessary to exceed 50% of the score in the theoretical part of the "Objective test" to approve, as well as having made and approved the work proposed in the "Laboratory practice".
