| Lecturers | Barbara Criado, Ignacio Manuel Díaz Tapia, Pilar Fagúndez Díaz, Jaime Peña Freire, Viviana Pimentel Pereira, Manuel | E-mail | ignacio.barbara@udc.es p.diaz@udc.es jaime.fagundez@udc.es v.peña@udc.es m.pimentel@udc.es | |
| Web | | | | |
| General description | Systematic Botany: Cryptogams. We will study fungi, algae, bryophytes and ferns in an evolutionary context, paying special attention to their phylogenetic positions. This course integrates information from previous courses (Biochemistry, Plant Physiology, Plant Anatomy and Histology, etc) and it will be useful for students seeking to develop a career in research, teaching, environmental assessment, agriculture, ethnobotany, etc. | | | |

| Study programme competences | |
|-----------------------------|--|
| Code | Study programme competences |
| A1 | Recoñecer distintos niveis de organización nos sistemas vivos. |
| A2 | Identificar organismos. |
| A4 | Obter, manexar, conservar e observar especímenes. |
| A9 | Identificar e utilizar bioindicadores. |
| A20 | Muestrear, caracterizar e manexar poboacións e comunidades. |
| A22 | Describir, analizar, avaliar e planificar o medio físico. |
| A27 | Dirixir, redactar e executar proxectos en Bioloxía. |
| A32 | Desenvolverse con seguridade no traballo de campo. |
| B1 | Aprender a aprender. |
| B3 | Aplicar un pensamento crítico, lóxico e creativo. |
| B4 | Traballar de forma autónoma con iniciativa. |
| B6 | Organizar e planificar o traballo. |
| B7 | Comunicarse de maneira efectiva nunha contorna de traballo. |
| B8 | Sintetizar a información. |
| B9 | Formarse unha opinión propia. |
| B11 | Debater en público. |

| Learning outcomes | | |
|--|-----------------------------|----------------|
| Learning outcomes | Study programme competences | |
| -Aprender as técnicas básicas do traballo de campo e laboratorio en Criptogamia. | A4 A9 | B1 B7 B8 |

| | | | |
|---|--------------------------------------|----------------------------------|--|
| -Desenvolver capacidades de observación, descripción e identificación de criptogamas e o seu grao de integración e presenza no medio natural. | A2 A4 A20 A22 A27 A32 | B1 B4 B6 B11 | |
| -Coñecer a diversidade vexetal das criptogamas: niveis morfolóxicos de organización, complexidade dos sistemas reprodutivos e a relación co medio no que viven. | A1 A2 | B1 B3 B8 B9 | |
| -Comprender os tipos reprodutivos e os distintos ciclos biolóxicos característicos dos distintos grupos vexetais. | A1 | B1 B3 B8 B9 | |
| -Incentivar un maior interese e motivación para a aprendizaxe da Criptogamia, como unha ciencia básica para unha formación completa en Bioloxía. | | B3 B4 B6 B7 B8 B9 | |
| -Comprender a organización taxonómica das criptogamas, que reflicte as relacións evolutivas entre os distintos grupos vexetais. | A1 A2 | B1 B3 B8 B9 | |
| -Desenvolver o hábito e a capacidade para o manexo axeitado e crítico da bibliografía. | A27 | B6 B8 B9 | |

Contents

| Topic | Sub-topic |
|--|--|
| THEORETICAL TEACHING (FUNGI AND LICHENS) | Lesson 1.- General features of fungi and fungi-like organisms. Fungal nutrition and life history. Ecological and economical importance. Origin and classification. Lesson 2.- General features of Acrasiomycota, Myxomycota and Plasmodiophoromycota. Reproduction and life history. Lesson 3.- General features of Oomycota. Reproduction and life history. Lesson 4.- Fungi sensu stricto. General features of Chytridiomycetes, Zygomycetes, Ascomycetes and Basidiomycetes. Reproduction and life history. Lesson 5.- Lichens, Fungi imperfectae (Deuteromycetes) and related groups. Ecological and economical importance. Summary and phylogeny of Fungi sensu lato. |

| | |
|--|---|
| THEORETICAL TEACHING (ALGAE) | <p>Lesson 6.- General features of algae. Algal biology, reproduction and life history. Ecological and economical importance. Origin and classification.</p> <p>Lesson 7.- Prokaryotic algae. Cyanophyta: characters, habitat and classification.</p> <p>Lesson 8.- Eukaryotic algae. Rhodophyta: characters, reproduction, life history, habitat and classification.</p> <p>Lesson 9.- Eukaryotic algae. Ochrophyta: characters, reproduction, life history, habitat and classification (Chrysophyceae, Xanthophyceae, Bacillariophyceae and Phaeophyceae).</p> <p>Lesson 10.- Eukaryotic algae. Haptophyta, Cryptophyta, Dinophyta and Euglenophyta: characters, reproduction, life history, habitat and classification.</p> <p>Lesson 11.- Eukaryotic algae. Chlorophyta: characters, reproduction, life history, habitat and classification (Chlorophyceae, Prasinophyceae, Ulvophyceae and Charophyceae). Summary and phylogeny of Algae.</p> |
| THEORETICAL TEACHING (MOSES, LIVERWORTS, STONEWORTS AND FERNS) | <p>Lesson 12.- Introduction and origin of land plants. Bryophyta: characters, reproduction, life history, habitat and classification (Anthoceropsida, Marchantiopsida and Bryopsida). Origin and phylogeny of embriophytic plants.</p> <p>Lesson 13.- Introduction to vascular plants. Telomatic theory.</p> <p>Lesson 14.- Pteridophyta: characters, reproduction, life history, habitat and classification (Psilophytsida, Psilotopsida, Lycopodiopsida, Equisetopsida and Pteridopsida). Origin and phylogeny of ferns sensu lato.</p> |
| THEORETICAL TEACHING (SEMINARS) | <p>Seminar 1.- Fungi sensu lato: questions about reproduction, life history, definitions, etc. (2 hours).</p> <p>Seminar 2.- Algae: questions about reproduction, life history, definitions, etc. (2 hours).</p> <p>Seminar 3.- Embriophytic plants: questions about reproduction, life history, definitions, etc. (2 hours).</p> <p>Seminar 4.- General summary of the course and open questions for the students. (2 hour).</p> |
| PRACTICAL TEACHING (FIELD TRIP) | Fiel trip (morning and afternoon) along the seashore and wet continental habitats for studying plants in their habitat and collection samples for the lab. |
| PRACTICAL TEACHING (LAB SESSIONS) | <p>Lab session 1.- Observation, description, identification and preservation of Fungi sensu lato.</p> <p>Lab session 2.- Observation, description, identification and preservation of Lichens.</p> <p>Lab session 3.- Observation, description, identification and preservation of Brown seaweeds.</p> <p>Lab session 4.- Observation, description, identification and preservation of Green algae.</p> <p>Lab session 5.- Observation, description, identification and preservation of Red seaweeds.</p> <p>Lab session 6.- Observation, description, identification and preservation of Mosses and Liverworts.</p> <p>Lab session 7.- Observation, description, identification and preservation of Ferns sensu lato.</p> |
| PRACTICAL TEACHING (PRACTICAL CASES) | <p>Practical case 1.- Devise a descriptive report of a natural environment of the seashore (mainly seaweeds and lichens), as well as a representative herbarium of the plant collected in the area.</p> <p>Practical case 2.- Devise a descriptive report of a natural environment of a wet forest (mainly lichens, mushrooms, mosses, liverworts and ferns), as well as a representative herbarium of the plant collected in the area.</p> |

| Planning | | | | |
|--------------------------------|-----------------------------------|----------------------|-------------------------------|-------------|
| Methodologies / tests | Competencies | Ordinary class hours | Student?s personal work hours | Total hours |
| Guest lecture / keynote speech | A1 A2 B1 B3 B8 B9 | 21 | 42 | 63 |
| Seminar | A1 B1 B3 B7 B8 B9 B11 | 7 | 21 | 28 |
| Laboratory practice | A9 B1 B7 B8 | 14 | 7 | 21 |
| Case study | A2 A4 A20 A22 A27 A32 B1 B4 B6 | 0 | 23 | 23 |
| Field trip | A2 A20 A22 A27 A32 | 6 | 6 | 12 |
| Personalized attention | | 3 | 0 | 3 |

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies | |
|--------------------------------|--|
| Methodologies | Description |
| Guest lecture / keynote speech | O profesor impartirá os conceptos básicos para a comprensión da materia axudándose de presentacións e documentos que porá previamente á disposición dos estudiantes. |
| Seminar | O estudiante deberá preparar de xeito autónomo algúns dos conceptos ou contidos da materia, empregando os contidos básicos das sesións maxistras e consultando a bibliografía que recomendará o profesor. Os seminarios serán postos en común durante as distintas sesións nas que o traballo dos estudiantes someterase a discusión e avaliación. |
| Laboratory practice | O estudiante terá que realizar descripcións macroscópicas e microscópicas de criptogamas e completar un guión disponible con anterioridade á práctica e que será avaliado. Tamén se realizarán exercicios de identificación mediante o uso de claves, floras e monografías. |
| Case study | O estudiante deberá realizar mostaxes en ambientes mariños e de bosque para a recolección de criptogamas representativas de ambos ambientes. Posteriormente, procesará os materiais recollidos, identificándoos e conservándoos en pregos de herbario que entregará para a súa avaliación. |
| Field trip | Realizarase unha saída ó campo guiada polos profesores co obxecto de que os estudiantes se familiaricen cos ambientes naturais nos que se amosarán exemplos de criptogamas. Na saída o profesor impartirá docencia práctica en base ós exemplos que se atopen ese día. |

| Personalized attention | |
|------------------------|--|
| Methodologies | Description |
| Seminar | Atenderase ó estudiante de xeito personalizado para todas aquellas dúbidas ou cuestións que lle xurdan nas distintas actividades realizadas. |
| Laboratory practice | |
| Case study | |
| Field trip | |

| Assessment | | | |
|--------------------------------|--------------------------|--|---------------|
| Methodologies | Competencies | Description | Qualification |
| Seminar | A1 B1 B3 B7 B8 B9 B11 | Qualifications will be based on the work conducted by the student as well as on his/her participation in class. Attendance to the seminars is compulsory. Competencies: A1, B1, B3, B7, B8, B9, B11 | 1 |
| Guest lecture / keynote speech | A1 A2 B1 B3 B8 B9 | Assessment will be conducted through a written exam that will include essay questions, short-answer questions and a multiple choice questionnaire. A1, A2, B1, B3, B8 and B9 | 49 |
| Laboratory practice | A9 B1 B7 B8 | Qualifications will be based on a questionnaire that the student will have to complete during each lab session. Participation will also be considered. Competencies: A9, B1, B7, B8 | 20 |

| | | | |
|------------|-----------------------------------|---|----|
| Case study | A2 A4 A20 A22 A27 A32 B1 B4 B6 | Qualifications will be based on the content and quality of the report written by the student. An oral exam will also be conducted in order to assess the quality of the herbarium that must be presented together with the report. Competencies: A2, A4, A20, A22, A27, A32, B1, B4, B6 | 20 |
| Field trip | A2 A20 A22 A27 A32 | Qualifications will be based on the report written by the student. Attendance and participation will also be considered. Competencies: A2, A20, A22, A27, A32. | 10 |

Assessment comments

Students must pay special attention to the planning section. It is essential that they understand that to be successful in the course they should work around 150 hours (50 presential). Non presential activities include (but are not limited to) studying for the final exam and preparation of reports. All students that participate in more than 30% of the activities of the course will obtain a qualification. To pass the course in the first opportunity, students must participate at least in 70% of the activities of the course. All students must obtain at least 4,5 points out of 10 in the written exam (and at least 4 in the different parts of the written text) and 4 out of 10 points in the rest of the activities. To pass the course in the second opportunity (July) all students (depending on the grades obtained in the first opportunity) must take a written exam and/or a lab test. The obtained qualifications will be kept only during the academic term (January-July). On a case by case basis, those students that, for justified reasons, are not able to participate in all the programmed activities will be given alternative options to pass the course.

Part-time students or students who participate in equality and diversity support programs are welcome to participate in this subject. The teachers will adapt the different compulsory activities in order to enable these students to fulfill the aims of the course.

This course has the following key dates:

Lab course: between September 20th and October 19th, 2017

Field course: October 6th, 2017 (Friday)

Open Lab sessions: between October 20th and December 5th, 2017

Field course report submission: October 24th, 2017 (Tuesday)

Case study report submission (and herbarium exam): October 11th, 2017 (Monday)

Other comments

Se ben non é imprescindible, é moi importante que o alumno teña aprobada a materia de Iniciación á Botánica do primeiro curso do Grao.
