| General description | <p>Esta materia está dirixida aos estudiantes de primeiro curso do Grao en Dereito. Ten a consideración de materia básica porque nela estúdanse conceptos fundamentais de economía e de contabilidade, útiles non só para os estudiantes de Dereito como tales, senón tamén como cidadáns que consomen, invisten, reciben subvencións públicas, pagan impostos e adoptan outras moitas decisións en materia económica.</p> <p>Tendo en conta que a materia é parte fundamental de toda actividade financeiro, empresarial, social, xurídica ou política a disciplina resulta necesaria e imprescindible dentro do contexto da titulación.</p> <p>A materia consta de seis créditos ECTS. Nela, explícanse os conceptos básicos, instrumentos e criterios necesarios para ter un coñecemento xeral sobre as cuestións económico-contables más relevantes. O seu desenvolvemento está pensado para alumnos que se inician no estudo da economía e da contabilidade, e que necesitan ter unha visión global das mesmas e das diferentes cuestións e problemática que a integran.</p> <p>Expómonos o coñecemento dos principios económicos contables como unha disciplina de carácter multidisciplinar e como tal non pretendemos estudar o tema en toda a súa extensión e profundidade, senón simplemente ofrecer o alumno unha visión panorámica da mesma, como corresponde á idea dun programa ao nivel dunha materia integrada nun grao de Dereito.</p> <p>O considerable progreso nos programas específicos de contabilidade e no tratamento informático dos datos proporcionan unhas achegas fundamentais para facilitar a comprensión e a execución dos conceptos básicos desta disciplina.</p> | | | |
