| General description | The goal of the subject is to introduce the most recent schemes in IP networks and Mobile Ad-hoc NETworks (MANETs). It covers topics like IPv6, virtual private networks (VPNs), Mobile IP / IPv6, MANETs, classical routing algorithms both static and dynamic, as well as their particularization to the case of MANETs. |        |  |           |  |  |

| Study programme competences |   |
|-----------------------------|---|
| Code                        | Study programme competences   |
| A17                         | Coñecemento e aplicación das características, funcionalidades e estrutura dos sistemas distribuídos, as redes de computadores e internet, e deseñar e implementar aplicacións baseadas nelas. |
| A55                         | Capacidade para seleccionar, deseñar, despregar, integrar e xestionar redes e infraestruturas de comunicacións nunha organización.  |
| B1                          | Capacidade de resolución de problemas   |
| B3                          | Capacidade de análise e síntese   |
| C3                          | Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.               |
| C6                          | Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse.   |

| Learning outcomes  |  |                             |                      |
|--|--|-----------------------------|----------------------|
| Learning outcomes  |  | Study programme competences |                      |
| Coñecer en profundidade os distintos elementos cos que se pode construir unha rede de comunicacións. Capacidad de analizar as vantaxes e inconvantos de cada topoloxía e protocolo de rede. Coñecer os algoritmos que incorporan os protocolos, e os seus contornos de aplicabilidade. |  | A17<br>A55                  | B1<br>B3<br>C3<br>C6 |

| Contents   |   |
|--|---|
| Topic  | Sub-topic   |
| 1. Analisys, design and addressing in IP networks. Advanced IP networks (IPv6) | 1.1 IPv6: motivation, differences to IPv4, IPv6 extension headers, route aggregation vs multihoming, automatic address assignment, fragmentation, Neighbour Discovery (ND) protocol.      |
| 2. Virtual Private Networks (VPNs). IPsec.                                     | 2.1 VPNs: purpose, types, Level-2 VPNs (PPP) vs Level-3 VPNs (IPsec).<br>2.2 IPsec: fundamentals, authentication (AH), Encapsulated Security Payload (ESP), key exchange mechanisms: IKE. |
| 3. Mobile IP / IPv6  | 3.1 Introduction to IP mobility.<br>3.2 Mobile IP.  |

|                                   |   |
|-----------------------------------|---|
| 4. MANETs: Mobile Ad Hoc Networks | 4.1 Motivation and fundamentals.<br>4.2 MAC layer.<br>4.3 Network layer. Static and dynamic routing algorithms: general case and particularization to MANETs.<br>4.4 Transport layer. |
|-----------------------------------|---|

| Planning                       |                                 |                      |                               |             |
|--------------------------------|---------------------------------|----------------------|-------------------------------|-------------|
