| General description | Introduction to experimental hydr | aulics. Scale models. Hydrome | try. Continuous of control | crosssections. Experimental field | |
| | techniques. Instrumentation and | control of water treatment proc | esses. Tests to obtain des | sign parameters. Know and | |
| | understand the design and const | ruction of scale models of hydr | aulic structures. Understa | nd the different techniques of | |
| | measurements of physical param | neters (pressure, temperature, s | speed, etc). Knowledge a | and practices with computer | |
| | systems, electronic devices and | hydraulic data acquisition syste | ms (monitoring and contro | ol of a river basin, hydraulic | |
| | experiments). | | | | |

| | Study programme competences / results |
|------|---|
| Code | Study programme competences / results |
| A13 | Knowledge of the experimental technics applied to the water engineering. Capacity to design experiments. Capacity to develop reduced |
| | models in the laboratory. Capacity to use different types of experimental instrumentation, including flowmeter, depth probes, |
| | three-dimensional speedometer, limnimeter, windlass |
| A14 | Knowledge and understanding for design and construction of scale-models of hydraulic structures. Understanding of different technics that |
| | exist in the measurement of physical conditions (pressure, temperature, speed?) in the field of hydraulic knowledge of computing systems |
| | and electronic control and the acquisition of hydraulic data (monitoring and control of the river basin, hydraulic circuit, etc) |
| A20 | Use and management of measuring equipment in the field and in the laboratory. Knowledge of the methodology of control process and the |
| | determination of design parameters for water treatment processes |
| B1 | To resolve problems effectively |
| B2 | To apply critical thinking, logic and creativity |
| B3 | To work individually with initiative |
| B4 | To communicate effectively in work surroundings |
| B5 | Continuous recycling of knowledge in a general perspective in a global situation of water engineering |
| B6 | Understanding of the need to analyse history to understand the present |
| B7 | Facility to integrate in multidiscipline teams |
| B8 | Capacity to organize and plan |
| B9 | Capacity for analysis, synthesis and structure of information and ideas |
| C1 | To understand the importance of the enterprising culture and to know the means at the reach of the enterprising people |
| C2 | To value knowledge critically, technology and available information to resolve problems that they will face |
| C3 | To assume as a professional and citizen the importance of learning throughout life |
| C4 | To value the importance of the investigation, innovation and technology development in the social ?economic advance and cultural in |
| | society |
| C5 | To posses and understand knowledge that gives a base or oportunity to be original in the development and for applications of ideas, often |
| | in the context of investigation |
| C6 | The students must be able to apply the acquired knowledge and their capacity to resolve problems in new surrandings or not well known |
| | within wider contexts (or multidiscipline) related with the study area |

| C7 | The students must be able to integrate knowledge and to affront the complexity to formulate judgements from information that, been |
|----|---|
| | incomplete or limited, include reflexions about social responsabilities and ethics related to the application of the knowledge and judments |
| C8 | The students must be able to comunicate their conclusions, knowledge and the last reasons that support them, to spezialated publics and |
| | not spezialated in a clear and unambiguous way. |
| C9 | The student must possess the learning ability with permits them to continues to study in a manner wich will be in a great measure self |
| | directed and individual |

| Learning outcomes | | | |

| | 01 | | |
| Learning outcomes | Stud | y progra | amme |
| | 00 | npetenc | es/ |
| | | results | |
| Be able to perform tests and experimentation in the field of hydraulics and water quality | AC13 | BC1 | CC1 |
| | AC14 | BC2 | CC2 |
| | AC20 | BC3 | CC3 |
| | | BC4 | CC4 |
| | | BC5 | CC5 |
| | | BC6 | CC6 |
| | | BC7 | CC7 |
| | | BC8 | CC8 |
| | | BC9 | CC9 |

| | Contents |
|---|---|
| Торіс | Sub-topic |
| 1. Introduction | 1.1 Introduction to testing and experimentation in hydraulics |
| 2. Continuous of control crosssections | 2.1 Experimental field techniques. |
| 3. Hydrometry. Techniques for measuring and recording water | 3.1 Instrumentation Systems (sensors, actuators) |
| parameters (level, flow, speed, etc). | 3.2 Control Modules (PLCs, data acquisition) |
| | 3.3 Data Transmission Systems |

| | Planning | g | | |
|---|----------------------------|-------------------------|---------------------------|-------------|
| Methodologies / tests | Competencies / | Teaching hours | Student?s personal | Total hours |
| | Results | (in-person & virtual) | work hours | |
| Guest lecture / keynote speech | A14 B1 B2 B4 B5 B6 | 20 | 20 | 40 |
| | B8 B9 C1 C2 C3 C4 | | | |
| | C5 C6 C7 C8 C9 | | | |
| Laboratory practice | A13 A14 A20 B1 B2 | 20 | 20 | 40 |
| | B3 B4 B7 B8 B9 C2 | | | |
| Objective test | A13 A14 B1 B2 B5 B6 | 2 | 8 | 10 |
| | В9 | | | |
| Seminar | A13 A14 A20 B1 B2 | 15 | 15 | 30 |
| | B3 B5 | | | |
| Personalized attention | | 30 | 0 | 30 |
| (*)The information in the planning table is for | guidance only and does not | take into account the I | neterogeneity of the stud | dents. |

| | Methodologies |
|---------------------|---|
| Methodologies | Description |
| Guest lecture / | Regular lectures where the main theoretical contents of the subjects are regarded |
| keynote speech | |
| Laboratory practice | Practical experiments related to the theoretical aspects regarded at the magistral lectures |
| Objective test | Final Exam |

Personalized attention to be provided for the semminars

Seminar

| | Personalized attention |
|---------------------|---|
| Methodologies | Description |
| Guest lecture / | Personalized attention to be provided for the semminars |
| keynote speech | |
| Objective test | |
| Seminar | |
| Laboratory practice | |

| | | Assessment | |
|---------------------|---------------------|---|---------------|
| Methodologies | Competencies / | Description | Qualification |
| | Results | | |
| Guest lecture / | A14 B1 B2 B4 B5 B6 | Attendance | 10 |
| keynote speech | B8 B9 C1 C2 C3 C4 | | |
| | C5 C6 C7 C8 C9 | | |
| Objective test | A13 A14 B1 B2 B5 B6 | The knowledge of the concepts developed at the magistral lectures will be assesed | 30 |
| | B9 | and considered for the final mark | |
| Seminar | A13 A14 A20 B1 B2 | Optional | 10 |
| | B3 B5 | | |
| Laboratory practice | A13 A14 A20 B1 B2 | The attendance to the seminars and the work developed will be considered for the | 50 |
| | B3 B4 B7 B8 B9 C2 | final mark | |
