| Study programme competences |  |
|-----------------------------|--|
| Code                        | Study programme competences  |
| A3                          | Adquirir un sentido ético da investigación sanitaria.  |
| B3                          | Compromiso pola calidade do desenvolvemento da actividade investigadora.   |
| B4                          | Capacidade de análise e de síntese.  |
| B6                          | Capacidade para traballar de forma colaborativa en equipos multi e interdisciplinar.   |
| B7                          | Capacidade de establecer unha relación de empatía cos suxeitos implicados no desenvolvemento da actividade investigadora.  |
| C1                          | Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.   |
| C4                          | Desenvolverse para o exercicio dunha cidadanía aberta, culta, crítica, comprometida, democrática e solidaria, capaz de analizar a realidade, diagnosticar problemas, formular e implantar solucións baseadas no coñecemento e orientadas ao ben común. |
| C6                          | Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse.  |
| C8                          | Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.  |

## Contents

| Topic  | Sub-topic  |
|--|--|
| Lesson 1. Ethics and Law   | 1. Why do we need norms? Types of norms and normative systems<br>2. Why do we need Law?<br>3. Why do we need virtues? Three models of normative ethics<br>4. Bioethics and the ethics of research  |
| Lesson 2. Responsible research   | 1. Research as a practice<br>2. Facts and values. Is everything technically possible also ethically admissible?<br>3. The research imperative. Is there a (moral) duty to research? Is there an obligation to participate in research?<br>4. The freedom of research. Freedom of research as a basic right<br>5. Research misconduct   |
| Lesson 3. Research on human beings and with human origin materials           | 1. What is biomedical research? Basic concepts and types of research with human beings and human origin materials<br>2. History of the ethics of biomedical research<br>3. Ethical requirements fo biomedical research<br>4. Legal regulation of biomedical research<br>5. Controversial issues. Research involving vulnerable subjects. Human embryo research. Posthuman research. Neuroscience |
| Lesson 4. Animal research  | 1. The case for animal research<br>2. Ethical positions concerning research with animals<br>3. Is licit the research involving animals? Ethical arguments. Scientific arguments<br>4. Legal regulation of animal research  |
| Lesson 5. Research with biological agents and genetically modified organisms | 1. Research, environment, and responsibility<br>2. Biosecurity and laboratory good practices<br>3. Biotechnology and moral restraints. The precautionary principle<br>4. Legal regulation of research with biological agents (BA) and genetically modified organisms (GMO)   |

## Planning

| Methodologies / tests          | Competencies                  | Ordinary class hours | Student's personal work hours | Total hours |
|--------------------------------|-------------------------------|----------------------|-------------------------------|-------------|
| Case study                     | A3 B3 B4 B6 B7 C1<br>C4 C6 C8 | 3                    | 9                             | 12          |
| Objective test                 | B4 C1                         | 1                    | 2                             | 3           |
| Guest lecture / keynote speech | A3 B3 B4 C6 C8                | 11                   | 33                            | 44          |
| Document analysis              | A3 B3 B4 B6 C6 C8             | 4                    | 10                            | 14          |
| Personalized attention         |                               | 2                    | 0                             | 2           |

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

## Methodologies

| Methodologies | Description |
|---------------|-------------|
|               |             |

|                                |   |
|--------------------------------|---|
| Case study                     | The knowledge of historical evolution and of the ethical and legal requirements of research in health sciences is supplemented by means of the analysis of classical and contemporary cases.<br>The main learning aim of case study is to achieve argumentation, deliberation and decision-making abilities.<br>Case study includes other methodologies: analysis of bibliographical and normative sources, as well as research papers. |
| Objective test                 | The exam is an appropriate method for assessing the outcomes of the learning process of subject's contents  |
| Guest lecture / keynote speech | Lectures ease the understanding of the special features, language, and concepts of ethics and law in research, specifying the meaning of bibliographical and normative sources and stressing the main topics fo the subject   |
| Document analysis              | Ethical and legal answers to research in health sciences are usually stated in normative documents and legal norms.<br>These documents provide both a historical and a systematic explanation of the ethical and legal perspectives of research in health sciences.   |

| Personalized attention |   |
|------------------------|---|
| Methodologies          | Description   |
| Document analysis      | Guidance for searching, managing, understanding, and assessing of teaching materials.                     |
| Case study             | Guidance for deliberating in concrete cases, implementing the basic ethical and legal concepts and norms. |

| Assessment     |                                   |   |               |
|----------------|-----------------------------------|---|---------------|
| Methodologies  | Competencies                      | Description   | Qualification |
| Case study     | A3 B3 B4 B6 B7 C1<br><br>C4 C6 C8 | Assessment of participation and argumentation abilites.<br><br>Assessment of understanding and implementation of ethical and legal language and concepts.<br><br>Analysis of bibliographical and normative (ethical and legal) sources is included. | 50            |
| Objective test | B4 C1                             | Main method for assessing knowledge.<br><br>Knowledge and understanding of bibliographical and normative (ethical and legal) sources are included.  | 50            |

| Assessment comments             |
|---------------------------------|
| A proba obxectiva é presencial. |

#### Recommendations

Subjects that it is recommended to have taken before

Subjects that are recommended to be taken simultaneously

Subjects that continue the syllabus

#### Other comments

Para axudar a conseguir una contorna inmediata sustentable e cumplir o obxectivo estratéxico 9 do I Plan de Sustentabilidade Medio-ambiental Green Campus FCS, todos os traballos documentais que se realicen nesta materia serán entregados en formato dixital, sen necesidade de imprimilos. De realizarse en papel:- Non se empregarán plásticos.- Realizaranse impresións a dobre cara.- Empregarase papel reciclado.- Evitarase imprimir borradores.

(\*)The teaching guide is the document in which the URV publishes the information about all its courses. It is a public document and cannot be modified. Only in exceptional cases can it be revised by the competent agent or duly revised so that it is in line with current legislation.
