Methodologies	
Methodologies	Description

Guest lecture / keynote speech	Oral presentation (using audiovisual material and student interaction) designed to transmit knowledge and encourage learning. Presentations of this type are variously referred to as 'expository method?', 'guest lectures?' or 'keynote speeches?'. (The term 'keynote?' refers only to a type of speech delivered on special occasions, for which the lecture sets the tone or establishes the underlying theme; it is characterised by its distinctive content, structure and purpose, and relies almost exclusively on the spoken word to communicate its ideas.)
Case study	Teaching-learning method in which students are presented with a specific set of real-life circumstances and a problem ('case?') which they must attempt to understand, assess and solve as a group through a process of discussion. Students should be able to analyse a series of facts relating to a particular area of knowledge or activity, and arrive at a rational conclusion via a process of discussion within small work groups.
Document analysis	Research skills development involving use of audiovisual and/or bibliographical documents (documentary or film extracts, news items, advertising images, photographs, articles, legal texts, etc.) relating to specific topic of study, with targeted analysis activities. Used as introduction to topic, as focus for case study, to explain abstract processes and present complex situations, or as strategy for synthesising content (theoretical and practical).
Directed discussion	Group dynamic technique involving free, informal, spontaneous debate among members of group; may also take form of coordinated discussion in presence of moderator.
Oral presentation	Core component of teaching-learning process involving coordinated oral interaction between student and teacher, including proposition, explanation and dynamic exposition of facts, topics, tasks, ideas and principles.
Field trip	Activities associated with particular area of study which take place away from university or academic environment (businesses, institutions, organisations, historical sites, etc.), aimed at developing research capacities, including direct, systematic observation, information gathering and product development (project outline, plan, etc.)
Student portfolio	Folder or binder divided into clearly marked or labelled sections containing record or products of learning activities performed over a given period, with student's progress charted through marks achieved and comments of teacher. The portfolio or file folder for the purposes of this asignatura- includes all documents or files to be delivered by the student to score as 'work' or 'practical' : research, case studies, summaries, project outlines and development, article analysis, summaries, tests, tasks and task outcomes, etc.
Objective test	Written learning progress test, characterised by pre-determined answers. Well-designed tests offer objectively quantifiable results in relation to student knowledge, capacities, skills, performance, aptitudes, attitude, intelligence, etc. Used for diagnostic, formative and summative assessment. May consist of all or any of the following types of questions: multiple choice, ordering and sequencing, short answer, binary, completion, multiple matching.

## Personalized attention

Methodologies	Description
Field trip Guest lecture / keynote speech Objective test Student portfolio Document analysis Case study Directed discussion Oral presentation	This is to facilitate students through personalized attention, information on any matter arising in the development of the subject, such as, methods, skills, proposals, analysis could be done in understanding and learning of the subject etc. .  This activity may be conducted in person (directly in the classroom and at times the teacher has assigned to tutoring office) or non-contact (through email or virtual campus).
