Identifying Data				2017/18
Subject (*)	Introduction to complex materials	Code	730495001	
Study programme	Mestrado Universitario en Materiais Complexos: Análise Térmica e Reoloxía (plan 2012)			
Descriptors				
Cycle	Period	Year	Type	Credits
Official Master's Degree	2nd four-month period	First	Obligatoria	3
Language	English			
Teaching method	Face-to-face			
Prerequisites				
Department	Química			
Coordinador	Castro Garcia, Socorro	E-mail	socorro.castro.garcia@udc.es	
Lecturers	Castro Garcia, Socorro	E-mail	socorro.castro.garcia@udc.es	
Web				
General description	<p>"Introducción a los materiales complejos" es una materia obligatoria de segundo cuatrimestre. Esta asignatura, de carácter claramente interdisciplinar, pretende dar una visión general de los materiales complejos y avanzados: metales, aleaciones, cerámicas, cristales líquidos, MOFs, polímeros, nanomateriales, etc.</p> <p>"Introduction to complex materials" is a compulsory subject of the Master 2nd four-month period. The aims of this interdisciplinary subject is to provide a general overview of the different types of complex and advanced materials: metals and alloys, ceramics, liquid crystals, MOFs, polymers, nanomaterials, etc.</p>			

Study programme competences / results	
Code	Study programme competences / results
A2	Identify and evaluate the different types of complex materials
A5	Understanding the relationships between structure and properties of materials
B2	The students have the skill to apply their knowledge and their ability to solve problems in new or unfamiliar contexts within broader (or multidisciplinary) contexts related to their field of study
B4	That the students can communicate their conclusions and the knowledge and last reasons behind that conclusions to specialized and non specialized audience in a clear and unambiguous way
B8	Applying a critical, logical and creative way of thinking
B13	Analysis-oriented attitude
B14	Ability to find and manage the information
B17	Analyze and decompose processes
C2	Have a good command of spoken and writing expression and understanding of a foreign language.
C7	To assume as a professional and citizen the importance of learning throughout life.
C8	To assess the importance of research, innovation and technological development in the socio-economic and cultural progress of society.

Learning outcomes			
Learning outcomes			Study programme competences / results
To know the structure and properties of complex materials	AR2	BR2	CR2
	AR5	BR4	CR7
		BR8	CR8
		BR13	
		BR14	
		BR17	

To understand structure-properties relationships	AR5	BR2 BR4 BR8 BR13 BR14 BR17	CR2 CR7 CR8
--	-----	---	-------------------

Contents	
Topic	Sub-topic
General overview of complex and advanced materials: - metals and alloys - ceramics - polymers - liquid crystals - MOFs - nanomaterials, etc	

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Supervised projects	A2 A5 B2 B4 B8 B13 B14 B17 C2 C7 C8	15	25	40
Objective test	A2 A5 B2 B4 B8 B13 B17 C2	2	0	2
Guest lecture / keynote speech	A2 A5 B8 B13 C2 C7 C8	12	20	32
Personalized attention		1	0	1

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Supervised projects	Activities whose purpose is that the students enlarge the study of the topics presented in each theme and consolidate their acquired knowledge and capabilities. These activities should also help the students learn and improve their capabilities in literature survey.
Objective test	Final exam, at the end of the course, that will help evaluation of the knowledge, competencies and global vision about materials acquired by the students.
Guest lecture / keynote speech	Presentation made by the teacher, on a schematic basis, focusing on the main topics of each theme and covering both theoretical and practical issues.

Personalized attention	
Methodologies	Description
Supervised projects Objective test Guest lecture / keynote speech	The personalized attention to students, understood as a support in the teaching-learning process, will take place in the hours of tutoring of the teacher.

Assessment			
Methodologies	Competencies / Results	Description	Qualification

Supervised projects	A2 A5 B2 B4 B8 B13 B14 B17 C2 C7 C8	Presentation (oral and written) of the tutored work.	60
Objective test	A2 A5 B2 B4 B8 B13 B17 C2	Examination or objective test.	40
