

Teaching Guide

Identifying Data					2017/18
Subject (*)	Home Automation Systems (Domotics)		Code	770G02038	
Study programme	Grao en Enxeñaría Eléctrica				
Descriptors					
Cycle	Period	Year	Type	Credits	
Graduate	2nd four-month period	Fourth	Optativa	6	
Language	Spanish				
Teaching method	Face-to-face				
Prerequisites					
Department	Enxeñaría Industrial				
Coordinador	Casteleiro Roca, José Luis	E-mail	jose.luis.casteleiro@udc.es		
Lecturers	Casteleiro Roca, José Luis	E-mail	jose.luis.casteleiro@udc.es		
Web					
General description	The subject's main objective is to give students theoretical knowledge of various types of the Home Automation Systems, and its operation ways, in order to achieve the necessary knowledge for their manage, analysis and design.				

Study programme competences

Code	Study programme competences
A1	Capacidade para planificar, presupostar, organizar, dirixir e controlar tarefas, persoas e recursos.
A2	Capacidade para a redacción, firma, desenvolvemento e dirección de proxectos no ámbito da enxeñaría industrial, e en concreto da especialidade de electricidade.
A3	Capacidade para realizar medicións, cálculos, valoracións, taxacións, peritaxes, estudos e informes.
A4	Capacidade de xestión da información, manexo e aplicación das especificacións técnicas e da lexislación necesarias no exercicio da profesión.
A5	Capacidade para analizar e valorar o impacto social e medioambiental das solucións técnicas actuando con ética, responsabilidade profesional e compromiso social, e buscando sempre a calidade e mellora continua.
C1	Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C7	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.

Learning outcomes

Learning outcomes	Study programme competences		
Design and calculate technical facilities management and integration of the various services and facilities that exist in buildings	A1 A4		C1
Knowing the different facilities that can present homes and buildings; its main features and its architecture	A3 A5		C3 C7
Knowing the pillars of the technical management of facilities in residential buildings (Home Automation) and buildings (Building Automation)	A2 A4		C1
Conocer los principios de las normas, reglamentos y legislación y autorizaciones administrativas de instalaciones a nivel nacional, regional y municipal	A2 A3		C7
Knowing the selection and resize efficiently the appropriate energy systems, communications, comfort, security and energy management	A1 A5		C3
Conocer las soluciones técnicas que ofrece el mercado en el área de la gestión de instalaciones técnicas	A3		C3 C7
Ser capaz de interpretar la información técnica y otras fuentes de información, en español y en Inglés	A3		C1

Contents

Topic	Sub-topic
Topic 1: Introduction to Home Automation	<ul style="list-style-type: none">1.1. General characteristics1.2. Features and applications of the Home Automation in housing1.3. Components of a Home Automation system
Topic 2: Applications and types of automation systems	<ul style="list-style-type: none">2.1. Services and Home Automation applications at homes2.2. Classification of Home Automation systems2.3. Wireless systems
Topic 3: Power Line Carrier systems	<ul style="list-style-type: none">3.1. The X-10 standard3.2. Main components3.3. Installation and configuration3.4. Other possibilities
Topic 4: Systems with Programmable Logic Controller	<ul style="list-style-type: none">4.1. Characteristics of systems with Programmable Logic Controller4.2. SIMON system4.3. Basic components4.4. Installation and configuration4.5. Other systems with programmable controller
Topic 5: Data Bus systems	<ul style="list-style-type: none">5.1. KNX standard features5.2. Basic components5.3. Installation and configuration5.4. Programming with ETS
Topic 6: Installations	<ul style="list-style-type: none">6.1. Electrical installations6.2. Telecommunication installations6.3. Plumbing installations6.4. Air conditioning installations6.5. LPG installations

Topic 7: Installations basic legislation	<p>7.1. The planning act in construction law</p> <p>7.2. The technical building code</p> <p>7.3. Electrical low voltage regulation</p> <p>7.4. Thermal installations regulation</p> <p>7.5. Common telecommunications infrastructure regulation</p>
Topic 8: Energy management and certification	<p>8.1. Legislation</p> <p>8.2. Home Automation involvement in the energy rating</p> <p>8.3. Residential buildings certification</p> <p>8.4. Tertiary sector buildings certification</p>

Planning				
Methodologies / tests	Competencies	Ordinary class hours	Student's personal work hours	Total hours
Guest lecture / keynote speech	A4 A5 C7	17	40	57
Problem solving	A3 A4 C1 C3	17	30	47
Laboratory practice	A2 A1 A3 C1	8	24	32
Objective test	A3 A4 C7	1	10	11
Personalized attention		3	0	3

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	<p>Keynote speech complemented with the use of audiovisual media and the introduction of some questions to students, in order to transmit knowledge and facilitate learning.</p> <p>The order of the topics covered will not have to be the one described in the teaching guide. In addition, there will be topics that can be seen together on the development of others, and the division between them may not be strict.</p>
Problem solving	Solving exercises and specific problems in the classroom, from the knowledge explained.
Laboratory practice	Performing laboratory practice as far as possible; or, failing that, solving exercises and specific problems in the classroom, from the knowledge explained. In addition, within the laboratory practice can include a small work of specific subjects of the subject to ensure the correct understanding of the subject.
Objective test	It consists in carrying out an objective test of approximately 1 hour, in which the acquired knowledge will be evaluated.

Personalized attention	
Methodologies	Description
Laboratory practice	The student has the relevant meetings of personalized tutorials, to resolve the concerns arising from the matter.

Assessment			
Methodologies	Competencies	Description	Qualification
Objective test	A3 A4 C7	Exam type objective test	75
Laboratory practice	A2 A1 A3 C1	Some tasks established in the subject, within the framework of this methodology	25
Others			

Assessment comments

As part of the "Laboratory practice" may include aspects such as attendance, personal work, proposed personal work, attitude, etc., to help to pass the subject.

The "Objective test" will be divided into a theoretical and practical part.

It is necessary to exceed 50% of the score in the theoretical part of the "Objective test" to approve, as well as having made and approved the work proposed in the "Laboratory practice".

Recommendations

Subjects that it is recommended to have taken before

Electric Installations low voltage/770G02022

Automation/770G02028

Power Electronics/770G02029

Technical Office/770G02034

Industrial installations and comercial/770G02031

Subjects that are recommended to be taken simultaneously

Subjects that continue the syllabus

Efficient management of electric power/770G02040

Industrial Instrumentation/770G02042
