UNIVERSIDADE DA CORUÑA

Teaching Guide			
Identifying Data			**2018/19**
Subject (*)	Recombinant proteins and protein Engineering	**Code**	610441012
Study programme	Mestrado Universitario en Bioloxía Molecular , Celular e Xenética		
Descriptors			

Cycle	**Period**	**Year**	**Type**	**Credits**
Official Master's Degree	2nd four-month period	First	Optional	3

Language	Spanish		
Teaching method	Face-to-face		
Prerequisites			
Department	Bioloxía		
Coordinador	Gonzalez Siso, Maria Isabel	**E-mail**	isabel.gsiso@udc.es
Lecturers	Becerra Fernandez, Manuel	**E-mail**	manuel.becerra@udc.es
	Gonzalez Siso, Maria Isabel		isabel.gsiso@udc.es
	Vizoso Vázquez, Ángel José		a.vizoso@udc.es
Web			
General description	The current importance of enzymatic processes applied to the food and drug industry allows the production of compounds that could not obtain by any other way. Industrial production of enzymes is a business that at the beginning of the 21st century moves around 1600 million of dollars a year. The use of enzymes in industrial processes is often limited by factors inherent to the nature of enzymes as for example a lack of stability in extreme conditions of temperature or pH, denaturation in presence of organic solvents or poor activity against certain substrates. Currently, there are a wide range of techniques of expression and engineering of proteins that allow the generation of modified proteins in order to overcome these limitations. There are a wide range of products developed by these pathways that are used in various fields. This course will describe current methods for expression and modification of proteins, both in basic research and biotechnological applications.		

Study programme competences / results	
Code	**Study programme competences / results**
A10	Skills of modifying genes, proteins and chromosomes with biotechnological applications
B3	Skills of management of the information: that are able to gather and to understand relevant information and results, obtaining conclusions and to prepare reasoned reports on scientific and biotechnological questions
B7	Personal progress skills : that are able to learn from freelance way, adapting to new situations, developing necessary qualities as the creativity, skills of leadership, motivation for the excellence and the quality.
C3	Skills of Using basic tools of the information technologies and communications (ICT) necessary to the exercise of his profession and for the apprenticeship over his life.
C8	Considering the importance that the investigation has, the innovation and the technological development in the socioeconomic advance and cultural of the society.

Learning outcomes			
Learning outcomes	**Study programme competences / results**		
Ability to learn and use biochemical concepts, techniques and resources available in databases related to the subject	AR10	BR7	CC3 CC8
Ability to solve practical cases through the acquisition of skills that allow to carry out a simulated project of expression of recombinant proteins and directed evolution of proteins.	AR10	BR3 BR7	CC3 CC8

Contents	
Topic	**Sub-topic**

Systems for expresión of native and recombinant proteins: bacterias	Systems of expression of Heterologous proteins in bacteria and purification.
Systems for expresión of native and recombinant proteins: yeasts	Systems of expression of Heterologous proteins in yeast and down-stream processing.
Systems for expresión of native and recombinant proteins: animal cells	Genetic manipulation of animal cells. Systems of expression and production of proteins in mammalian cells.
Protein engineering I	Introduction. Site-directed mutagenesis techniques.
Protein engineering II	Techniques of artificial evolution of proteins.
Protein engineering III	Techniques of stabilization and immobilization of enzymes.
Industrial applications of protein engineering	Applications in Enzymology, pharmaceutical, food industry and other applications.

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A10 B7	7	7	14
Laboratory practice	A10 B3 C3	7	14	21
Mixed objective/subjective test	B3	2	16	18
Directed discussion	B3 C3 C8	7	14	21
Personalized attention		1	0	1
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Oral presentation complemented with the use of audiovisual media in order to pass on knowledge and facilitate learning.
Laboratory practice	A methodology that allows students to learn effectively through practical activities.
Mixed objective/subjective test	Exam comprising questions type of testing trial, questions objective type testing and resolution of cases and problems.
Directed discussion	Technique of group dynamics in which the members of a group discussed free, informal and spontaneous way on a subject, coordinated by a moderator.

Personalized attention	
Methodologies	Description
Directed discussion	The directed discussion is conceived as moments of face-to-face student work with the teacher by involving compulsory student participation.

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Mixed objective/subjective test	B3	Test to evaluate the knowledge acquired during the master classes, practical classes of laboratory as well as directed discussion	60
Laboratory practice	A10 B3 C3	Regular attendance and active participation to laboratory practices as well as the report made by students will be evaluated	20

Directed discussion	B3 C3 C8	Regular attendance and active participation will be evaluated	20

Assessment comments
To get honours preference will be given to the best notes of the call of June
