

Teaching Guide				
Identifying Data				2018/19
Subject (*)	Edaphology	Code	610G02045	
Study programme	Grao en Bioloxía			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	2nd four-month period	Fourth	Optional	6
Language	Spanish			
Teaching method	Face-to-face			
Prerequisites				
Department	Física e Ciencias da Terra			
Coordinador	Paz Gonzalez, Antonio	E-mail	antonio.paz.gonzalez@udc.es	
Lecturers	Lado Liñares, Marcos Paz Gonzalez, Antonio Vidal Vázquez, Eva	E-mail	marcos.lado@udc.es antonio.paz.gonzalez@udc.es eva.vidal.vazquez@udc.es	
Web				
General description	The program of Soil Science focusses on: a) the study of the organic and mineral soil composition, b) soil physical and chemical and biological properties, c) ecological relevance of soil functions.			

Study programme competences / results	
Code	Study programme competences / results
A1	Recoñecer distintos niveis de organización nos sistemas vivos.
A2	Identificar organismos.
A6	Catalogar, avaliar e xestionar recursos naturais.
A18	Levar a cabo estudos de produción e mellora animal e vexetal.
A20	Muestrear, caracterizar e manexar poboacións e comunidades.
A21	Deseñar modelos de procesos biolóxicos.
A22	Describir, analizar, avaliar e planificar o medio físico.
A23	Avaliar o impacto ambiental. Diagnosticar e solucionar problemas ambientais.
A24	Xestionar, conservar e restaurar poboacións e ecosistemas.
A25	Desenvolver e aplicar técnicas de biocontrol.
A26	Deseñar experimentos, obter información e interpretar os resultados.
A27	Dirixir, redactar e executar proxectos en Bioloxía.
A28	Desenvolver e implantar sistemas de xestión relacionados coa Bioloxía.
A29	Impartir coñecementos de Bioloxía.
A30	Manexar adecuadamente instrumentación científica.
A31	Desenvolverse con seguridade nun laboratorio.
A32	Desenvolverse con seguridade no traballo de campo.
B1	Aprender a aprender.
B2	Resolver problemas de forma efectiva.
B3	Aplicar un pensamento crítico, lóxico e creativo.
B4	Traballar de forma autónoma con iniciativa.
B5	Traballar en colaboración.
B6	Organizar e planificar o traballo.
B7	Comunicarse de maneira efectiva nunha contorna de traballo.
B8	Sintetizar a información.
B9	Formarse unha opinión propia.
B10	Exercer a crítica científica.
B11	Debater en público.
B12	Adaptarse a novas situacións.

B13	Comportarse con ética e responsabilidade social como cidadán e como profesional.
C1	Expresarse correctamente, tanto de forma oral coma escrita, nas linguas oficiais da comunidade autónoma.
C2	Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.
C4	Desenvolverse para o exercicio dunha cidadanía aberta, culta, crítica, comprometida, democrática e solidaria, capaz de analizar a realidade, diagnosticar problemas, formular e implantar solucións baseadas no coñecemento e orientadas ao ben común.
C5	Entender a importancia da cultura emprendedora e coñecer os medios ao alcance das persoas emprendedoras.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.
C7	Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida.
C8	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.

Learning outcomes			
Learning outcomes	Study programme competences / results		
Soils act as substrates for vegetal communities and also as adsorbent and absorbent for nutritive, and allow life of many animal and vegetal organisms. Therefore our program pays particular attention to the ?edaphosphere? as a complex dynamic and organised site, located in the interface between biosphere, lithosphere, hydrosphere and atmosphere. Soil is also the support of man-made spaces or sites influenced by man activity, such as urban-industrial areas and transport infrastructures.	A6 A20 A26 A27	B2 B5 B6 B9	C2 C4 C6 C7
Because of the role of the soil for terrestrial ecosystems, Edaphology has a particular interest in Environmental Biology. The soil food chain describes a complex living system and how it interacts with the environment, plants, and animals. The nature of soil makes direct observation of food webs difficult. Soil microbial communities are characterized in many different ways. The activity of microbes can be measured by their respiration and carbon dioxide release. The cellular components of microbes can be extracted from soil and genetically profiled, or microbial biomass can be calculated by weighing the soil before and after fumigation.	A21 A28 A29 A30 A31 A32	B1 B8 B10 B11	C3 C6 C7
Assessment of environmental impact taken into account soil diversity. Evaluation of soil contamination and techniques for soil restoration.	A1 A6 A18 A20 A22 A23 A24	B1 B9 B10	C1 C5 C6
The scientific study of the soil is important for Biologists, mainly from an ecological perspective. Soil is essential in environmental studies and soil science contributes to understand important processes such as biogeochemical cycles, the structure ecosystems and factors from which primary production depends.	A2 A6 A22 A23 A25 A30 A31 A32	B3 B4 B10	C1 C5 C7 C8
The course of Soil Science is designed to provide an overview of the fundamental: Physical processes, Chemical processes, Fertility, Biology, and Land Use. Both theoretical and practical contents in Soil Science should contribute to enhance the skills of Biology students at the UDC in the use of several instrumental techniques.	A2 A6 A25 A27	B2 B7 B12 B13	C1 C5 C6 C7 C8

Topic	Sub-topic
<b>I PRELIMINARY CONCEPTS</b> Lesson 1.- History of Soil Science.	Origin and development of Soils Science. Main topics in Soil Science.
Lesson 2.- Soil descripton in field conditions. Laboratory techniques for soil studies.	Profile and horizons. Physical, Chemical and Bioñological methods of soil analysis.
<b>II SOIL COMPOSITION</b> Lesson 3.- Soil mineral composition. Soil clays.  Lesson 4.- Soil organic matter.	Soil texture. Specific surface. Soil mineralogy. Soil clays. Structure and properties of most common soil clays. Oxyhydroxides.  Soil organic compounds. Humus. Organo-mineral associations. Organic matter and ecosystems: biogeochemical cycles.
<b>III SOIL PROPERTIES</b>  Lesson 5.- Soil physical properties and soil structure. Lesson 6.- Soil water retention and water dynamics. Lesson 7.- Soil temperature and aeration. Lesson 8.- Soil pH and cation exchange capacity. Lesson 9.- Soil biology. Lesson 10. Soil fertility	Bulk density and solid density. Soil porosity. Pore-size distribution. Aggregate dynamics in soils. Structural stability.  Soil moisture content and soil potential. Soil water measurement. Soil moisture characteristic curve. Soil water retention and soil water dynamics. Soil water and water requirements of vegetation.  Soil thermal properties. Soil temperature management. Composition of the soil atmosphere. Soil and gases of greenhouse effect.  Soil pH and soil acidity. Soil acidity effects. Acidity amendment. Exchange complex of soils. Cation exchange capacity.  Soil organisms. Soil enzymatic activity. Nucleic acids in soil. Soil organism and soil properties as indicators of soil quality.  Macronutrients and micronutrients. Nitrogen , phosphorus and potassium cycles. Calcium and magnesium. Iron, copper, zinc, boron and molybdenum. Other oligoelements
<b>IV FACTORS AND PROCESSES OF SOIL FORMATION</b>  Lesson 11.- Factors of soil formation.  Lesson 12.- Processes of soil formation.	Parent material. Climate. Topography. Times Vegetations and organisms. Anthropogenic factors.  Soil profile differentiation. Clay accumulation. Podzolization. Salinization. Calcification. Hydromorphic processes. Ferralitic alteration.

<p>V SOIL SYSTEMATICS AND CLASSIFICATION</p> <p>Lesson 13.- Soil Systematics.</p> <p>Lesson 14.- Introduction to Soil Taxonomy.</p> <p>Lesson 15.- World Reference Base for Soil Resources.</p> <p>Lesson 16.- Spanish and Galician Soils.</p>	<p>Genesis and diagnostic horizons. Soil profile. Horizon nomenclature. Modern Soil Classifications. Soil Taxonomy. World Reference Base for Soil Resources.</p> <p>Characteristics for soil diagnosis. Moisture and temperature regimes. Orders, suborders, great groups, subgroups, families, and series.</p> <p>Organic soil. Soil with anthropic influences. Soils conditioned by topography and by time. Soils conditioned by cold, temperate, steppe, arid or semiarid and tropical or subtropical climates.</p> <p>Soil under Atlantic climate. Soils under Mediterranean climate. Galician soils: parent material, climate, topography and vegetation effects.</p>
<p>VI APPLIED SOIL SCIENCE</p> <p>Lesson 17.- Applications of Soil Science.</p>	<p>Soil cartography. Interactions soil-landscape. Soil functions and society. Soil and environment. Soil contamination. Recovery of contaminated soils. Soil Use and Management.</p>
<p>PRACTICAL ACTIVITIES</p> <p>Laboratory work</p> <p>Field studies</p>	<p>Textural analysis Bulk density and solid density, Porosity. Aggregate stability Soil pH. Organic carbon and nitrogen Cation exchange capacity Soil extractable phosphorus Biological activity and dehydrogenase activity</p> <p>Case studies: Umbrisols, Cambisols, Fluvisols, and Gleysols</p>

<b>SUPERVISED PROJECTS</b>	<p>Soil erosion as a source of diffuse pollution</p> <p>Mechanisms and processes of water erosion under an Atlantic climate</p> <p>Effect of forest fires in soil degradation</p> <p>Mining and soil contamination</p> <p>Livestock farming and soil contamination</p> <p>Landfills and soil contamination</p> <p>Organic pollutants</p> <p>Physical-chemical indicators of soil quality</p> <p>Biological indicators of soil quality</p> <p>Vineyard soil in Galicia</p> <p>Excessive soil fertilisation with slurry</p> <p>Soil compactation risks</p> <p>Hydric balance in soils</p> <p>Heavy metals in soils</p>
----------------------------	--

<b>Planning</b>				
<b>Methodologies / tests</b>	<b>Competencies / Results</b>	<b>Teaching hours (in-person &amp; virtual)</b>	<b>Student?s personal work hours</b>	<b>Total hours</b>
Guest lecture / keynote speech	A21 A22 A23 A24 A27 A30 C1 C2 C3	20	40	60
Objective test	A22 A23 A31 B1 B2	1	1	2
Supervised projects	B2 B7 B8 B9 B10 B11 B12 C6 C7	4	16	20
Field trip	A24 A32 C4 C5 C6 C7	5	10	15
Laboratory practice	A2 A20 A22 A23 A25 A26 A27 A30 A31 A32 B3 B6 B8 B9 B10 C7 C8	12	28	40
Introductory activities	A6 A22 C6 C8	1	2	3
Personalized attention		10	0	10
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

<b>Methodologies</b>	
<b>Methodologies</b>	<b>Description</b>
Guest lecture / keynote speech	The contents of soil science will be developed. The used audiovisual materials will be provided to students.
Objective test	Short questions about keynote speech contents
Supervised projects	These are guided and supervised academic activities
Field trip	The main soil types in Galicia will be observed.
Laboratory practice	Assessment of main physical, chemical and biological properties of soils
Introductory activities	Outline of the program, highlighting the main interesting issues for Biologists

<b>Personalized attention</b>	
<b>Methodologies</b>	<b>Description</b>
Introductory activities	Personalized attention will be provided by individual meetings in dates previously selected.

<b>Assessment</b>
-------------------

Methodologies	Competencies / Results	Description	Qualification
Laboratory practice	A2 A20 A22 A23 A25 A26 A27 A30 A31 A32 B3 B6 B8 B9 B10 C7 C8	Continuous assessment and practical work.	10
Field trip	A24 A32 C4 C5 C6 C7	Assessment of field activities and reports of filed work.	8
Supervised projects	B2 B7 B8 B9 B10 B11 B12 C6 C7	Quality of the reports and presentations.	20
Introductory activities	A6 A22 C6 C8	This issue will be assessed together with keynote speech.	2
Guest lecture / keynote speech	A21 A22 A23 A24 A27 A30 C1 C2 C3	Short questions and tests about the keynote speech. Final examination and also partial examinations, if requested.	60

### Assessment comments

Soil Science global note can be assessed by continuous evaluation following Bolonia criteria. Evaluations may be performed not only in English, but also in Galician or Spanish languages, if this is requested by students.
