Methodologies	
Methodologies	Description
Document analysis	Different documental resources will be used to contribute to reach the objectives of this subject. They will help both to secure theoretical knowledge and to carry out the workshop activities.
Workbook	In each part of the program the professors may provide the students some document(s) that could help them to deepen in the theoretical contents of the subject. This documentation may also be used as support material for the rest of methodologies of more practical nature.
Guest lecture / keynote speech	The main aspects of the subject are explained.
Workshop	Different activities that require the active participation of students will be carried out. The students' analysis and reasoning capacity will be valued, deepening in the contents characteristic of the subject. As for the student's specific work, questions of short answer will be posed to value both the learning grade and the synthesis capacity; furthermore, there will be questions of wide answer related with aspects of the subject usually with reference to a text, a graph, a piece of news, etc. and where appropriate, there could also be multiple-choice questions.
Objective test	At the end of the course a written exam will be carried out. It seeks to get a global objective valuation of the knowledge acquired by each student throughout the course and his/her reasoning capacity.

Personalized attention	
Methodologies	Description
Workshop	To optimize the use of this methodology the individual learning needs of each student will be taken into account.  For those students with part-time dedication recognition an individual plan will be settled down for the continuous evaluation during the first days of the course.

Assessment comments

Qualification as ?Non-presented?: In accordance with the general criterion applied in the subjects of the University Degrees of the Economics and Business Faculty, when any student had carried out activities that allow to obtain two points at least, the final qualification of non-presented will never be applicable, but rather that qualification will be the result of the sum of the different parts that are valued in the subject (in this case the questionnaires of the interactive classes and the final exam).

Final qualification: To pass the subject, it will be necessary to have done at least the 20% of the tests of continuous evaluation ("workshop").

The evaluation of the second opportunity (July) will be carried out with the same criteria that the evaluation of the first opportunity.

Those students who have opted to the evaluation of the early opportunity will be treated with the same criteria applied for the July opportunity, i. e., 60% final exam and 40% continuous evaluation.

Students with recognition of part-time dedication and academic assistance waiver exemption. Except for the dates approved by the Faculty Board for the mixed tests, for the remaining tests will be agreed at the beginning of the course a specific timetable compatible with their dedication.

Conditions for doing the final exam and the evaluation activities: The professors in charge of each group will communicate the students the material required for the realization of both the different activities of continuous evaluation and the final exam.
