Methodologies	Competencies	Description	Qualification
Case study	A3 A4 B1 B2 B3 B6 C4	Analysis of cases presented in the classroom	10
Document analysis	A6 A8 A9	Use of adequate information resources. Each group must present to the rest of the class a given theoretical concept.	10
Supervised projects	A1 A2 A5 A10 B4 C1 C8	Project or final essay in groups.	20
Objective test	C6	multiple choice test	60

Assessment comments
<p>The student is considered within the general ongoing assessment if he/she presents over 20% of total practice. The same evaluation system will be applied in the first opportunity and in July.</p> <p>In order to pass the course, it is necessary to obtain a minimum of 5 points over 10 (as the total grade) AND in the exam (in order to calculate that average grade) it is necessary to obtain a minimum of 4 points over 10.</p> <p>Case studies, document analysis and the supervised projects are done over the whole duration of the course and it is not possible to elaborate them out of the lecturing period because they are developed in the classroom. Both part time and full time students are subject to the same evaluation system.</p> <p>Of course, accusing the exam with devices that allow communication with the outside or that stock information is not allowed. If a student is found cheating in the exam, the final grade will be zero both in the first opportunity and in July</p>
