General description	The practices may be developed in public institutions, companies or non-profit entities. Both the Facultade de Informática			oth the Facultade de Informática	
	of the UDC and the Escola Técnic	a Superior de	Eneñaría of the US	C have a large group	of companies and collaborating
	institutions through agreements fo	or the realization	on of practices. In ar	ny case, there is a firm	n commitment from the coordinator
	of the master to increase the list o	of collaborating	organizations, so tl	nat the students of the	e degree always have the best and
	most up-to-date offer of internships.				
	Each student will have an academic tutor (teacher-tutor) to which he/she can turn to for any question, doubt or contingency.				
	The company will assign a professional tutor who will be in charge of tutoring the student's work within the company. In				
	addition, it will issue a final report assessing the work of the student, following a standardized model, which will be taken				
	into account by the academic tutor in the assessment.				

	Study programme competences / results
Code	Study programme competences / results
A8	CE8 - Be able to apply the acquired knowledge, capabilities and aptitudes to the profesional environment, planning, managing and
	evaluating project in the high performance computing field
B1	CB6 - Possess and understand the knowledge that give a baseline or opportunity to be original in the development and/or application of
	ideas, often in a research environment
B2	CB7 - The students have to know how to apply the acquired knowledge and their capacity to solve problems in new or hardly explored
	environment inside wider contexts (or multidiscipinary) related to its area of development
В3	CB8 - The students have to be able to integrate knowledge and face the complexity to make judgments from information, despite being
	partial and limited, includes reflexions about the social and ethical responsabilities linked to the application of their judgements and
	knowledge
B4	CB9 - The students have to be able to communicate their conclusions, their knowledge and the reasons that hold them to specialized and
	non specialized audience in a clear and unambiguous manner
B5	CB10 - The students have to possess learning skills that allows them to continue to study in a mainly self-driven or autonomous manner
B6	CG1 - Be able to search and select useful information to solve complex problems, using the bibliographic sources of the field
B8	CG3 - Be able to maintain and extend properly funded theoretical hypothesis to allow the introduction and exploitation of novel and
	advanced technologies in the field
В9	CG4 - Be able to plan and do research, development and innovation tasks in high performance computing related environments
B10	CG5 - Be able to work in teams, specially multidisciplinary, and do a proper time and people management and decision taking
C1	CT1 - Use the basic technologies of the information and computing technology field required for the professional development and the
	long-life learning
C2	CT2 - Estimulate the capacity to work in transdisciplinary and interdisciplinary teams to offer proposals that contribute to the contribute to
	the economical, social and political sustainable development
C3	CT3 - Be able to manage time and resources: develop plannings, priorize activities, identify criticism, establish and meet deadlines

C4	CT4 - Value the importance of research, innovation and the technological development in the socioeconomical and cultural advance of the
	society
C5	CT5 - Understand the importance of the enterpeneurship culture and know the resources available for entrepeneurs
