General description	Software Design is a key phase in	n software life o	cycle that provides t	he link between the re	equirements of a system and its
	implementation. The most commo	on software de	sign today is based	on object-oriented ted	chniques, which consists of
	developing a program based on objects that interchange messages.				
	This subject will introduce studen	ts to the basic	elements and prope	erties of object orienta	tion using an object-oriented
	language like Java. The students				
	Unified Modeling Language (UML).		3 3 3		
	Finally, the basic principles that represent a good design will be presented and we will learn to identify those typical design problems and their most common solutions represented as design patterns.				

	Study programme competences / results
Code	Study programme competences / results
A7	Capacidade para deseñar, desenvolver, seleccionar e avaliar aplicacións e sistemas informáticos que aseguren a súa fiabilidade,
	seguranza e calidade, conforme a principios éticos e á lexislación e normativa vixente.
A13	Coñecemento, deseño e utilización de forma eficiente dos tipos e estruturas de datos máis adecuados á resolución dun problema.
A14	Capacidade para analizar, deseñar, construír e manter aplicacións de forma robusta, segura e eficiente, elixindo o paradigma e as
	linguaxes de programación máis adecuados.
B1	Capacidade de resolución de problemas
B2	Traballo en equipo
В3	Capacidade de análise e síntese
B4	Capacidade para organizar e planificar
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e
	para a aprendizaxe ao longo da súa vida.
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.

Contents		
Topic	Sub-topic	
1. Introduction	? Software design	
	? Object-oriented analysis and design	
2. Basic Elements of Object Orientation	? Classes and objects	
	? Object identity	
	? Object state	
	? Object behavior	
3. Basic Characteristics of Object Orientation	? Abstraction and encapsulation	
	? Modularity	
	? Hierarchy	
	? Polimorphism	
	? Typing	
	? Dynamic binding	
4. Unified Modeling Language (UML)	? Introduction	
	? Basic elements of UML	
	? Static design: Class diagrams	
	? Dynamic design: Interaction diagrams	
	? Other diagrams	
5. Design Principles	? Quality in design	
	? SOLID principles	
	? Types of inheritance	

6. Design Patterns	? Introduction to design patterns
	? Elementary patterns
	? Designs adaptable to changes
	? Loosely coupled designs
	? Patterns and collections of objects
	? Other patterns and principles
Practice	? Introduction to Java and NetBeans
	? Software tests
	? Exceptions management
	? Use of a source code repository

	Methodologies	
Methodologies	Description	
Guest lecture /	Lectures explaining theoretical concepts using different resources: blackboard, projection of digital slides, class notes in	
keynote speech	electronic format and other resources provided by the teachers in the Virtual Campus of the UDC.	
Laboratory practice	Laboratory activities based on the knowledge that students are acquiring in lectures. Students will develop this activities	
	preferably in groups. We will use a modeling tool to build the design artifacts and an object-oriented language (Java) to	
	implement that artifacts.	
Seminar	Seminars with activities related to knowledge acquired in lectures or laboratory activities	
Objective test	Written test in which the knowledge acquired by students is assessed. Each student must apply their knowledge both in	
	theoretical and practical level.	

	Personalized attention
Methodologies	Description
Laboratory practice	Personalized attention to students includes not only tutorials (either virtual or in-person) to discuss questions, but also the
Seminar	following actions:
	- Monitoring the work of laboratory practices proposed by the teacher.
	- Evaluation of the results obtained in practice and seminars.
	- Personalized meetings to answer questions about the contents of the subject.

Assessment

Methodologies	Competencies /	Description	Qualification
	Results		
Laboratory practice	A7 A13 A14 B1 B2 B3	Exercises based on Java programming, object-oriented design, testing design, the	40
	B4 C3 C6	modeling language UML and the use of design principles and design patterns.	
		Plagiarism may result in a zero grade, both for the original and for the copy	
Seminar	A7 A13 A14 B1 B2 B3	Seminars are practical sessions led by the teacher in which useful aspects related to	0
	B4 C3 C6	the assignments are discussed.	
		The seminars do not include the submission of assignments by the students, so it is not an evaluable activity.	
Objective test	A7 A13 A14 B1 B3 C6	Written test conducted at the end of the semester with theoretical and practical content.	60
		It is mandatory to obtain a minimum grade of 4 in the objective test to pass the subject.	

Assessment comments

Failure to reach the minimum score in the objective test in any of the opportunities will mean that you can not get more than a 4.5 in the final grade of the subject.

Aspects to be considered for the evaluation of second opportunity (July):

Laboratory practices grades are the ones obtained at the first opportunity (submission of laboratory practices in the second opportunity is not allowed). Aspects to be considered in the case of part-time enrollment:

The obligation to attend activities that require to be in-person is eliminated.

	Recommendations
	Subjects that it is recommended to have taken before
Programming I/614G01001	
Programming II/614G01006	
	Subjects that are recommended to be taken simultaneously
Programming Paradigms/614G01014	
	Subjects that continue the syllabus

Software Process/614G01019

Human Machine Interfaces/614G01022

Internet and Distributed Systems/614G01023

Other comments

It is assumed that students know how to program and understand data structures (Programming II subject) but have never used an object-oriented language. At the beginning of the subject, as the students are introduced to the concepts of object orientation, they will become familiar with the basics of Java programming language.
