Teaching Guide				
Identifying Data				2018/19
Subject (*)	Networks		Code	614G01017
Study programme	Grao en Enxeñaría Informática			
Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	2nd four-month period	Second	Obligatory	6
Language	SpanishGalician			
Teaching method	Face-to-face			
Prerequisites				
Department	Computación			
Coordinador	Cacheda Seijo, Fidel	E-mail	fidel.cacheda@udc.es	
Lecturers	Álvarez Díaz, Manuel	E-mail	manuel.alvarez@udc.es	
	Cacheda Seijo, Fidel		fidel.cacheda@udc.es	
	Fernández Iglesias, Diego		diego.fernandez@udc.es	
	Lopez Mato, Javier		javier.lopezm@udc.es	
	Losada Perez, Jose		jose.losada@udc.es	
	Montoto Castelao, Paula		paula.montoto@udc.es	
	Novoa De Manuel, Francisco Javier		francisco.javier.novoa@udc.es	
	Pan Bermudez, Carlos Alberto		alberto.pan@udc.es	
	Raposo Santiago, Juan		juan.raposo@udc.es	
Web				
General description	Transmission medium. Network technologies. Access networks. Routing protocols and network services.			

Study programme competences / results	
Code	Study programme competences / results
A17	Coñecemento e aplicación das características, funcionalidades e estrutura dos sistemas distribuídos, as redes de computadores e internet, e deseñar e implementar aplicacións baseadas nelas.
B1	Capacidade de resolución de problemas
B3	Capacidade de análise e síntese
C2	Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro.
C3	Utilizar as ferramentas básicas das tecnoloxías da información e as comunicacións (TIC) necesarias para o exercicio da súa profesión e para a aprendizaxe ao longo da súa vida.

Learning outcomes			
Learning outcomes	Study programme competences / results		
To understand the networks division on protocol layers.	A17	B3	C2 C3
To understand the operation of the main application layer protocols.	A17	B3	C2 C3
To understand the how the transport protocols UDP and TPC work.	A17	B1 B3	C2 C3
To understand the operation of routing and network services.	A17	B1 B3	C2 C3
To know the basic link layer technologies.	A17	B3	C3

Contents	
Topic	Sub-topic

Introduction	Computer networks and Internet Introduction to TCP/IP
Application layer	Application layer protocols I Application layer protocols II
Transport layer	UDP and TCP TCP connections Reliable data transfer TCP data transfer
Network layer	IP Subnetting Routing ICMP IPv6
Link layer	TCP/IP and the link layer Link layer technologies Summary

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Laboratory practice	A17 B1 C3	20	40	60
Seminar	A17 B3 C2	10	15	25
Objective test	A17 B1 B3	2.5	7.5	10
Guest lecture / keynote speech	A17 B3	30	20	50
Personalized attention		5	0	5
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description
Laboratory practice	The university virtual platform will be used as a basis to publish all the required material to do the laboratory practices. In the laboratory the students must deepen certain theoretical issues of the subject. In order to achieve this objective, there will be Java programming laboratories and laboratories based on network emulation/simulation tools.
Seminar	Through the seminars (TGRs) we will deepen certain issues of the subject, both theoretical and practical, in a more personalized way, with a more specific treatment and solving student's doubts and matters individually.
Objective test	At the end of the four-month period there will be an exam where the student must prove his knowledge of the subject.
Guest lecture / keynote speech	The university virtual platform will be used as a basis to publish all the required material to follow the lectures. During the lectures the theoretical concepts of the subject will be presented, encouraging the student participation.

Personalized attention	
Methodologies	Description
Laboratory practice Seminar	The personalized attention for laboratory practices and seminars is essential for an adequate subject development for the student. Moreover, the students are recommended to attend tutorials as a support method. From the teacher perspective, the personalized attention will allow to detect possible imbalances in the subject methodology and improve the quality in continuously.

Assessment

Methodologies	Competencies / Results	Description	Qualification
Laboratory practice	A17 B1 C3	The laboratory practices done by the students throughout the course will be evaluated. The laboratory practices grade can not be recovered in the second opportunity nor in the December call.	25
Seminar	A17 B3 C2	Related with the seminars, a series of works will be proposed to the student, that will be evaluated. The seminars grade can not be recovered in the second opportunity nor in the December call.	5
Objective test	A17 B1 B3	At the end of the four-month period there will be an exam where the student must prove his knowledge of the subject. In case of obtaining less than a 4 (out of 10) in the exam, the subject will receive a failing grade and the final qualification will be the obtained in the exam.	70

Assessment comments
The laboratory practices and the seminars are part of the subject continuous evaluation as therefore can not be recovered in the second opportunity nor in the December call.The part-time students will be helped in the timetable election for laboratories and seminars.
