Teaching Guide			
Identifying Data			2018/19
Subject (*)	Administration of Infrastructures and Information Systems	Code	614G01113
Study programme	Grao en Enxeñaría Informática		

Descriptors				
Cycle	Period	Year	Type	Credits
Graduate	2nd four-month period	Fourth	Obligatory	6

Language	Galician		
Teaching method	Face-to-face		
Prerequisites			
Department	Enxeñaría de Computadores		
Coordinador	López Taboada, Guillermo	E-mail	guillermo.lopez.taboada@udc.es
Lecturers	López Taboada, Guillermo	E-mail	guillermo.lopez.taboada@udc.es
Web	moodle.udc.es		
General description	Administración de infraestructuras servidor, clúster e cloud, facendo uso de tecnoloxías de rede e virtualización para o acceso a servizos de almacenamento e cómputo.		

Study programme competences / results	
Code	Study programme competences / results
A52	Capacidade para comprender o contorno dunha organización e as súas necesidades no ámbito das tecnoloxías da información e as comunicacións.
A53	Capacidade para seleccionar, deseñar, despregar, integrar, avaliar, construír, xestionar, explotar e manter as tecnoloxías de hárdware, sóftware e redes dentro dos parámetros de custo e calidade adecuados.
A55	Capacidade para seleccionar, deseñar, despregar, integrar e xestionar redes e infraestruturas de comunicacións nunha organización.
B1	Capacidade de resolución de problemas
B3	Capacidade de análise e síntese
C6	Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrontarse.
C8	Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade.

Learning outcomes			
Learning outcomes	Study programme competences / results		
Capacity to understand the environment of an organization and its needs in the Information and Communication Technologies.	A52	B1 B3	C6 C8
Capacity to select, design, deploy, integrate, evaluate, build, manage, exploit and maintain the hardware, software and network technologies within appropriate cost and quality parameters.	A53	B1 B3	C6 C8
Capacity for selecting, designing, deploying, integrating and managing infrastructure and network communication infrastructures in an organization.	A55	B1 B3	C6 C8

Contents	
Topic	Sub-topic
1. Cloud Computing	Introduction Service Models Deployment Example of a public cloud provider: Amazon Web Services

2. Virtualization	Virtualization Technologies Server Virtualization Container technologies Seminar and exercises on Docker
3. Clusters	Cluster Elements Administration Monitorization Seminar on container clustering Seminar on distributed Big Data infrastructures

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Laboratory practice	A52 A53 A55 B1 B3 C6 C8	15	37.5	52.5
Seminar	A52 B1 B3 C6 C8	6	24	30
Mixed objective/subjective test	A52 A53 A55 B1 B3 C6 C8	3	0	3
Guest lecture / keynote speech	A52 A53 A55 B1 B3 C6 C8	21	42	63
Personalized attention		1.5	0	1.5
(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.				

Methodologies	
Methodologies	Description
Laboratory practice	Practical exercises on selection, design, deployment, evaluation and management of storage infrastructure, both on premises and on the cloud, to work on the concepts discussed in the classroom.
Seminar	Seminars on interesting topics: - Discussion on the needs and interests of organizations such as AMTEGA (public administration) - Experiences on selection, design, deployment, evaluation and management of Data Centers, - Presentation of methodologies on rolling new systems and platforms, and for the long data system cycle.
Mixed objective/subjective test	Test made up of evaluation questions to validate that the students have understandood the theoretical concepts and they know how to put it into practice.
Guest lecture / keynote speech	Classroom presentation on the topics of the subject to transmit knowledge and ease the learning and assimilation process of the discussed concepts.

Personalized attention	
Methodologies	Description
Laboratory practice	Solving doubts of the students on the lab exercises. Personalized attention to those students with part-time enrollment or with difficulties to attend lectures due to special circumstances.

Assessment			
Methodologies	Competencies / Results	Description	**Qualification**

Guest lecture / keynote speech	A52 A53 A55 B1 B3 C6 C8	Proba escrita sobre os conceptos presentados na docencia expositiva.	50
Laboratory practice	A52 A53 A55 B1 B3 C6 C8	Avaliación da realización das prácticas de laboratorio	50

Assessment comments
It is required at least 40% of lab exercises and 40% of the written exam. If these conditions are not met but the final mark (applying the formula) is above 5 then the final mark will be 4 (Fail) out of 10. Thus, an 8 in labs and 3 in examn then the pondered mark is 5.5, but in the academic record of the student it will be specified a 4 (Fail). Failing in June means that there is an opportunity of retake the exam in July, maintaiining the lab qualification. In this case it will be required only a 40% in the written exam and a final note over 5. Part time students will be specially considered in order to support his/jer work. There will be some addtional flexibility and personalized treatment for them.
