| General description | This course aims to provide the student with a frame of reference which let him locate and understand the knowledge in the | | | | |
| | subjects of construction of further co | urses. In other words, at | the end of the course, the s | student should be able of: | |
| | - Locate correctly the contents of sub | ojects in the area of archi | itectural constructions which | n will be taught throughout their | |
| | studies in the University. | | | | |
| | -Recognize the materials, elements and construction systems, as well as its characteristics, grasp and general | | | | |
| | requirements -represent accurately the elements and building systems | | | | |
| | -Rating accuracy and clarity in the discipline of the construction | | | | |
| | -Mastering the vocabulary of the Construction. | | | | |
| | All of this inside the frame of the Spanish regulations. | | | | |

| | Study programme competences / results |
|------|--|
| Code | Study programme competences / results |
| A12 | Ability to conceive, calculate, design, integrate in buildings and urban units and execute building structures (T) |
| A13 | Ability to conceive, calculate, design, integrate in buildings and urban units and execute interior partition walls, carpentry, stairs and other |
| | finished work (T) |
| A14 | Ability to conceive, calculate, design, integrate in buildings and urban units and execute exterior walls and cladding, roofing and other |
| | structural work (T) |
| A15 | Ability to conceive, calculate, design, integrate in buildings and urban units and execute foundation solutions (T) |
| A17 | Ability to apply technical and construction standards and regulations |
| A25 | Adequate knowledge of conventional construction systems and pathology |
| A26 | Adequate knowledge of the physical and chemical characteristics, production procedures, pathology and use of building materials |
| A27 | Adequate knowledge of industrialized building systems |
| A39 | Ability to remove architectural barriers (T) |
| A41 | Ability to solve the passive environmental conditioning, including thermal and acoustic insulation, climate control, energy efficiency and |
| | natural lighting (T) |
| A63 | Development, presentation and public review before a university jury of an original academic work individually elaborated and linked to any |
| | of the subjects previously studied |
| B1 | Students have demonstrated knowledge and understanding in a field of study that is based on the general secondary education, and is |
| | usually at a level which, although it is supported by advanced textbooks, includes some aspects that imply knowledge of the forefront of |
| | their field of study |
| B2 | Students can apply their knowledge to their work or vocation in a professional way and have competences that can be displayed by means |
| | of elaborating and sustaining arguments and solving problems in their field of study |
| | <u>, </u> |

| В3 | Students have the ability to gather and interpret relevant data (usually within their field of study) to inform judgements that include |
|-----|---|
| | reflection on relevant social, scientific or ethical issues |
| B4 | Students can communicate information, ideas, problems and solutions to both specialist and non-specialist public |
| B5 | Students have developed those learning skills necessary to undertake further studies with a high level of autonomy |
| В6 | Knowing the history and theories of architecture and the arts, technologies and human sciences related to architecture |
| В7 | Knowing the role of the fine arts as a factor that influences the quality of architectural design |
| В9 | Understanding the problems of the structural design, construction and engineering associated with building design and technical solutions |
| B10 | Knowing the physical problems, various technologies and function of buildings so as to provide them with internal conditions of comfort |
| | and protection against the climate factors in the context of sustainable development |
| B11 | "Knowing the industries, organizations, regulations and procedures involved in translating design concepts into buildings and |
| | integrating plans into planning " |
| B12 | Understanding the relationship between people and buildings and between these and their environment, and the need to relate buildings |
| | and the spaces between them according to the needs and human scale |
| C1 | Expressing themselves correctly, both orally and in writing, in the official languages of the autonomous region |
| C2 | Mastering the expression and comprehension of a foreign language both orally and in writing |
| C3 | Using basic tools of information technology and communications (ICT) necessary for the exercise of the profession and for lifelong |
| | learning |
| C4 | Exercising an open, educated, critical, committed, democratic and caring citizenship, being able to analyse facts, diagnose problems, |
| | formulate and implement solutions based on knowledge and solutions for the common good |
| C5 | Understanding the importance of entrepreneurship and knowing the means available to the enterpreneur |
| C6 | Critically evaluate the knowledge, technology and information available to solve the problems they must face |
| C7 | Assuming as professionals and citizens the importance of learning throughout life |
| C8 | Assessing the importance of research, innovation and technological development in the socio-economic advance of society and culture |
| | |

| Learning outcomes | |
|-------------------|-----------------|
| Learning outcomes | Study programme |
| | competences / |
| | results |

| Become aware of the correlation between architectural design and construction solutions, the constraints imposed by the | A12 | B1 | C1 |
|---|-----|-----|----|
| physical, chemical and mechanical properties of building materials and construction systems for the execution of works | A13 | B2 | C2 |
| features. | A14 | В3 | СЗ |
| | A15 | B4 | C4 |
| Acquiring the basic vocabulary of the construction which permits identification of members of the major building systems and | A17 | B5 | C5 |
| structural foundations, vertical walls, roofs, vertical communications, partitions and window and door joinery elements. | A25 | B6 | C6 |
| | A26 | В7 | C7 |
| Knowing the basics of building structural systems with load-bearing walls and arcaded factory with metal and concrete | A27 | В9 | C8 |
| elements in correspondence with constructive solutions to cover the vain systems: systems of wood and stone lintels, vaulted | A39 | B10 | |
| systems and horizontal slabs, floor slabs, plates. Industrialized slabs, nerves and joists. | A41 | B11 | |
| | A63 | B12 | |
| Know the elements of building systems of surface and deep foundations and retaining walls and understand the logic of its | | | |
| operation and implementation procedures. | | | |
| | | | |
| Know the basic building design conditions of vertical communications, stairs and ramps, the escape routes of the buildings and | | | |
| of the barriers to protect slopes. | | | |
| | | | |
| Knowing elementary level the construction and design of the vertical walls to fulfill thermal conditions, hygrothermal, acoustic, | | | |
| fire protection and stability and resistance to mechanical conditions. | | | |
| | | | |
| Knowing elementary constructive elements design conditions lighting and ventilation of buildings. | | | |
| | | | |
| Knowing elementary level the construction and design of slanted and flat for the fulfillment of the conditions of waterproof, | | | |
| thermal, hygrothermal, acoustic and fire protection overcast conditions. | | | |
| | | | |
| Knowing elementary level the construction and design of the elements of heavy or lightweight partitions. | | | |
| | 1 | | |

| Methodologies | | | | |
|-------------------|---|--|--|--|
| Methodologies | Description | | | |
| Workshop | Face non-performing individual exercises. | | | |
| | The exercises will be presented and supervised by teachers in the classroom. | | | |
| Student portfolio | Individual realization of a sketchbook to collect building systems studied in the course. | | | |
| | The sketchbook will be performed in the classroom. | | | |
| Objective test | Written exam in which the student must individually resolve issues related to topics covered in the course. | | | |
| Guest lecture / | Development and explanation of the topics of the course by the teacher. | | | |
| keynote speech | Realization of a booklet of notes taken by the students, in which they collect the explanations given by the teachers. | | | |
| | The notebook will be presented on the day of the exam. It will be valued the effort to add additional information to the provided | | | |
| | by professors. | | | |

| Personalized attention | | | |
|------------------------|--|--|--|
| Methodologies | Description | | |
| Student portfolio | Personal attention will be developed during the practical classes in which teachers advise students about their evolving work in | | |
| Workshop | progress. | | |
| | | | |

| Assessment | | | | |
|-------------------|----------------------------|--|---------------|--|
| Methodologies | Competencies / Description | | Qualification | |
| | Results | | | |
| Student portfolio | B1 B2 B3 B4 B5 B6 | Student portfolio assessment will be made only if presented bound, full and neat. | 15 | |
| | B7 B9 B10 B11 B12 | | | |
| | C1 C2 C3 C4 C5 C6 | | | |
| | C7 C8 | | | |
| Objective test | A12 A13 A14 A15 | The score for each of the theoretical and practical exercises will be indicated in the | 50 | |
| | A17 A25 A26 A27 | statement of the Objective test. | | |
| | A39 A41 A63 | | | |

| Guest lecture / | A12 A13 A14 A15 | Notes of the subject taken in the classroom will be evaluated. | 5 |
|-----------------|-------------------|--|----|

| | A39 A41 A63 C1 C2 | | |
| | C3 C4 C5 C6 C7 C8 | | |
| Workshop | B1 B2 B3 B4 B5 B6 | This calification could be distributed by the teacher in the form 25+5, 25% | 30 |
| | B7 B9 B10 B11 B12 | corresponding to the evaluation of current practices and 5% of the marks obtained in | |
| | C1 C2 C3 C4 C5 C6 | the follow-up checks carried out in the classroom. | |
| | C7 C8 | | |

Assessment comments

To make an overall assessment of the course in each of the two occasions -first and second-, the student will need:

- 1. Perform Objective test, obtaining at least 40% of the maximum possible score.
- 2. Present all practices at the Workshop, obtaining at least in each, 40% of the maximum possible score.
- 3. Attend in person, at least 80% of the Sessions lectures and the Workshop, except for duly justified reason.
- 4. Deliver full Portfolio.
- 5. Deliver notes of Sessions taken in the classroom.

If no comply with these

requirements, the student will appear in the minutes of the opportunity as 'Not submitted'.
