General description	Management of the prevention of risks and of security in works of Construction of buildings, as well as in processes of manufacture of materials and constructive systems, evaluating the risks and scheduling the preventive action. Editorial of Projects, Studies And Plans of Security and labour Health. Coordination of Security and Health in the Construction. Editorial of Projects of security in utilisation of buildings, as well as Plans of Emergency and Evacuation.			

Study programme competences / results	
Code	Study programme competences / results
A3	Coñecer os materiais, tecnoloxías, equipos, sistemas e procesos construtivos propios da edificación en xeral e en particular aqueles específicos de Galicia.
A4	Coñecer as técnicas e procesos de restauración, rehabilitación, acondicionamento, patoloxía, mantemento e conservación dos edificios en xeral e en particular aqueles específicos do patrimonio cultural constituído pola arquitectura popular e histórica galega.
A15	Redactar proxectos técnicos no ámbito da edificación.
A16	Coñecer e aplicar as técnicas de avaliación e prevención de riscos, deseño de estudos e planes, así como dos procesos de coordinación da seguridade e saúde laboral na edificación.
A23	Implementar os planes de seguridade e o seu control en obra.
A25	Deseñar e redactar estudos e planes de evacuación e seguridade dos edificios.
B2	Capacidade de organización e planificación.
B3	Capacidade para a procura, análise, selección, utilización e xestión da información.
B6	Capacidade para a toma de decisións.
B8	Capacidade para traballar nun equipo de carácter interdisciplinario.
B12	Razoamento crítico.
B13	Compromiso ético.
B16	Capacidade de aplicar os coñecementos na práctica.
B22	Sensibilidade cara a temas de seguridade laboral, accesibilidade, sustentabilidade e medioambiente.
B30	Sensibilidade cara a temas relacionados coa protección, conservación e posta en valor do patrimonio cultural e arquitectónico.
C1	Adequate oral and written expression in the official languages.
C2	Mastering oral and written expression in a foreign language.
C3	Using ICT in working contexts and lifelong learning.
C4	Acting as a respectful citizen according to democratic cultures and human rights and with a gender perspective.
C5	Understanding the importance of entrepreneurial culture and the useful means for enterprising people.
C6	Acquiring skills for healthy lifestyles, and healthy habits and routines.
C7	Developing the ability to work in interdisciplinary or transdisciplinary teams in order to offer proposals that can contribute to a sustainable environmental, economic, political and social development.
C8	Valuing the importance of research, innovation and technological development for the socioeconomic and cultural progress of society.

## Learning outcomes

Learning outcomes	Study programme competences / results		
Draft technical projects in the field of the construction of buildings.	A3 A4 A15 A16 A23 A25	B2 B3 B6 B8 B12 B13 B16 B30	
Know and apply the technicians of evaluation and prevention of risks, design of studies and plans, as well as of the processes of coordination of the security and labour health in the construction of buildings.	A15 A16 A23 A25		
Implement the plans of security and his control in works of construction.	A15 A16 A23 A25

Sensitivity to subjects of labour security, accessibility, sustainability and environment.	A3 A4 A15 A23 A25	B2 B3 B6 B8 B12 B13 B16 B22 B30	C1 C2 C3 C4 C5 C6 C7 C8
Value críticamente the knowledge, the technology and the available information to resolve the problems with which have to confront.			C1 C3 C4 C5 C6 C7 C8

Contents	
Topic	Sub-topic
1ª PART:	EXPOSITIVE Content.
Subject I:  FOUNDATIONS OF THE TECHNICIANS OF IMPROVEMENT OF THE LABOUR CONDITIONS	Lessons: 01. THE WORK And THE HEALTH. THE PREVENTION OF LABOUR RISKS. 02. FORECAST, PREVENTION And PROTECTION OF THE DERIVATIVE DAMAGES OF THE WORK. 03. LABOUR ACCIDENTS.

<p>Subject II:</p> <p>SECURITY IN THE WORK</p>	<p>Lessons:</p> <p>04. CONCEPT And DEFINITION OF SECURITY: TECHNICIANS And INSPECTIONS. PREVENTIVE MEASURES OF ELIMINATION And REDUCTION OF RISKS.</p> <p>05. ACCIDENTS OF WORK. INVESTIGATION, ANALYSIS And GENERAL EVALUATION OF THE RISK OF ACCIDENT.</p> <p>06. THE SIGNALING IN SECURITY.</p> <p>07. ORGANISATION And PLANNING OF INDUSTRIAL ACTIVITIES OF CONSTRUCTION.</p> <p>08. COLLECTIVE PROTECTIONS And TEAMS OF INDIVIDUAL PROTECTION.</p> <p>09. TEAMS OF WORK, INSTALLATIONS, MANUAL TOOLS And MACHINES-TOOL.</p> <p>10. MACHINES: SECURITY IN THE DESIGN.</p> <p>11. MACHINES: RISKS IN OPERATION, STORAGE And TRANSPORT.</p> <p>12. PLACES And SPACES OF WORK.</p> <p>13. GENERAL RISKS UNDER CONSTRUCTION. FALLS OF HEIGHT. .</p> <p>14. SPECIFIC RISKS OF CONSTRUCTION: DEMOLISH And MOVEMENT OF EARTHS, STRUCTURES, FINISHES AND FACILITIES. MINIMUM DISPOSALS OF SECURITY And HEALTH OF THE GENERAL COLLECTIVE AGREEMENT OF THE SECTOR OF THE CONSTRUCTION.</p> <p>15. ELECTRICAL RISKS.</p> <p>16. CHEMICAL PRODUCTS And TOXIC WASTE.</p> <p>17. BOILERS, INSTALLATIONS OF AIR COMPRESSED And SPACES CONFINED.</p> <p>18. THE FIRE And THE FIRES. SECURITY AGAINST FIRES IN BUILDINGS And WORKS.</p>
<p>Subject III</p> <p>INDUSTRIAL HYGIENE</p>	<p>Lessons:</p> <p>19. THE INDUSTRIAL HYGIENE. CONCEPTS And AIMS.</p> <p>20. CHEMICAL AGENTS. LABOUR TOXICOLOGY And EVALUATION OF THE EXHIBITION.</p> <p>21. SPECIFIC LEGAL RULE WITH REGARD TO WORKS WITH ASBESTOS..</p> <p>22. PHYSICAL AGENTS. CHARACTERISTICS, EFFECTS, EVALUATION And CONTROL.</p> <p>23. HYGIENIC RISKS. ELECTRICAL WELDING And ACETYLENE AND OXYGEN WELDING.</p> <p>24. BIOLOGICAL AGENTS. EFFECTS, EVALUATION And CONTROL.</p>
<p>Subject IV</p> <p>ERGONOMICS And PSYCHOLOGY AND SOCIOLOGY APPLIED. MEDICINE OF THE WORK</p>	<p>Lessons:</p> <p>25. ERGONOMICS And PSYCHOLOGY AND SOCIOLOGY APPLIEDAPPLIED. ENVIRONMENTAL CONDITIONS.</p> <p>26. PHYSICAL And MENTAL LOAD OF WORK.</p> <p>27. MEDICINE OF THE WORK. PATHOLOGIES OF LABOUR ORIGIN And SURVEILLANCE OF THE HEALTH.</p>
<p>2ª PART:</p>	<p>INTERACTIVE Content.</p>
<p>Subject V</p> <p>JURIDICAL FIELD OF THE PREVENTION</p>	<p>Lessons:</p> <p>28. NOTIONS OF RIGHT OF THE WORK. BASIC LEGISLATION OF LABOUR RELATIONS.</p> <p>29. NOTIONS ON THE SPANISH SYSTEM OF THE SOCIAL SECURITY.</p> <p>30. RULE ON PREVENTION OF LABOUR RISKS. BUSINESS OBLIGATIONS.</p> <p>31. ORGANS OF REPRESENTATION And PARTICIPATION IN PREVENTIVE MATTER.</p> <p>32.ORGANISATION OF THE PREVENTION IN SPAIN.</p>

Subject VI  MANAGEMENT OF THE PREVENTION	Lessons: 33. GENERAL APPEARANCES ON ADMINISTRATION And BUSINESS MANAGEMENT. BASIC PRINCIPLES. ORGANISATIONAL MODEL. 34. ANALYSIS, IDENTIFICATION And EVALUATION OF RISKS. 35. PLANNING OF THE PREVENTION. 36. ORGANISATION OF THE PREVENTION. 37. APPLICATION OF THE MANAGEMENT IN A SPECIAL SECTOR: THE CONSTRUCTION.

(\*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Case study	Methodology where the subject confronts in front of the description of a specific situation that arouses a problem that has to be comprised, valued and resolved by a group of people, through a process of discussion. The student situa in front of a concrete problem (case), that describes him a real situation of the professional life, and has to be able to analyse a series of facts, referents to a particular area of the knowledge or of the action, to arrive to a decision reasoned through a process of discussion in small groups of work.
Collaborative learning	Group of procedures of education-learning guided of face-to-face form and/or supported with technologies of the information and the communications, that base in the organisation of the class in small groups in what the alumnado works jointly in the resolution of tasks assigned by the profesorado to optimise his own learning and the one of the others members of the group.
Oral presentation	Presentation of oral form with brief explanation of the aims of the course, in relation with each one of the subjects and lessons that will treat in class.
Objective test	It treats of the final examination of the asignatura. It will propose a series of exercises, similar to the developed in class during the course. Also they will be able to propose short questions of índole theoretical to evaluate the understanding of the different concepts treated in the asignatura. It is an individual proof and by writing, that will be able to consist in the integration of open questions of development type fear (program of contents), so much of theory as of solution of problems and/or practical cases.
Guest lecture / keynote speech	The profesorado will realise the oral exhibition of each subject or lesson, complemented with the use of audiovisual means and the introduction of some questions headed to the students, with the purpose to transmit knowledges and facilitate the learning. In the lessons magistrales the professor will present the theoretical and practical contents of the asignatura, helping of illustrative examples with the end to motivate to the students and to help to the understanding and assimilation of the contents. The professor will support in dynamic presentations.

Personalized attention
------------------------

Methodologies	Description
Guest lecture / keynote speech Case study Collaborative learning Oral presentation Objective test	<p>It treats of the time that the professor reserves to attend and resolve doubts to the alumnado in relation with the matter.</p> <p>Academic activity developed by the profesorado, individual or in small group, that has like purpose attend to the needs and queries of the alumnado related with the study and/or subjects linked with the matter, providing him orientation, support and motivation in the process of learning. This activity can develop of face-to-face form (directly in the classroom or in the moments that the professor has assigned to tutorías of dispatch) or of form no face-to-face (through email, of moodle or of the virtual campus).</p> <p>During the development of the practical classes (interactive) the professor will go resolving the doubts that the students pose in relation with the materia and with the realisation of the problemas and/or practical cases that are developing .</p> <p>During the ,schedule of tutorías will attend all those doubts that the alumnado, of personal form and individualizada, go consulting.</p>

Assessment			
Methodologies	Competencies / Results	Description	Qualification
Guest lecture / keynote speech	A16 B22 C6	<p>The professor will realise the oral exhibition of each subject or lesson, complemented with the use of audiovisual means and the introduction of some questions headed to the students, with the purpose to transmit knowledges and facilitate the learning.</p> <p>The mere face-to-face assistance to the classes (basic duty of the student), that is to say, without a participación proactiva in the same, will not suppose any note in the final qualification of the asignatura.</p>	1
Case study	A3 A4 A16 B2 B3 B6 B8 B12 B13 B16 B22 B30 C1 C2 C3 C4 C5 C6 C7 C8	Resolution of cases that describe a real situation of the professional life, contributing solutions reasoned through a process of discussion in small groups of work.	10
Collaborative learning	A15 A23 A25	Resolution of tasks assigned by the professor, for the study of concrete problems, with the end to optimise the learning of the matter presented in masterclasses.	10
Oral presentation	A15 A23 A25	Exhibition of oral form and participation proactiva, with brief explanation of the aims of the course, in relación with each one of the subjects and lessons that treat in class.	9

Objective test	A15 A16 A23 A25 B22 C6	<p>The note obtained by the works realised in the interactive classes, as well as the participation proactiva of the student to the asignatura, will be able to suppose 30% of the final note.</p> <p>The note obtained in the final examination (objective proof) will suppose 70% of the final qualification.</p> <p>The mere face-to-face assistance to the classes (basic duty of the student), that is to say, without a parcitipación proactiva in the same, will not suppose any note in the final qualification of the asignatura.</p> <p>THE FINAL QUALIFICATION OF THE ASIGNATURA will CALCULATE OF THE FOLLOWING WAY:</p> <ul style="list-style-type: none"><li>- In the case that the note of the final examination (objective proof, that supposes 70%) was equal or elder that 4 (on 10) him añadirá the note obtained in the interactive classes (30%), for the calculation of the total qualification of the asignatura (100%).</li><li>- In the case that the student obtain a lower note that 4 (on 10) in the final examination (objective proof) the final qualification of the asignatura will be equal to this note obtained in the examination.</li></ul>	70
Others			

Assessment comments

The exposed norms will apply along all the course.

They do not exist partial examinations.

Each one of the methodologies of evaluation will be independent regarding qualification.

So that the student can present to the objective proofs (official examinations of June and of Julio) has to have realised and presented the works of the interactive classes.

Both objective proofs, the one of June and the one of Julio, will have the same value and the same requirements for his qualification, constituting the two opportunities to surpass the \*asignatura in the course.

#### It DISPENSES ACADEMIC:

According to "NORMA QUE REGULA O RÉXIME DE DEDICACIÓN AO ESTUDO E A PERMANENCIA E A PROGRESIÓN DOS ESTUDANTES DE GRAO E MÁSTER UNIVERSITARIO NA UNIVERSIDADE DA CORUÑA aprobada no Consello de Goberno de 28 de xuño de 2016", And specifically in the article 7.5, says the following:

"Os estudantes a tempo parcial poderán solicitar aos Decanos e Directores dos centros responsables da súa titulación, ou aos Coordinadores dos Másters, no seu caso, a dispensa académica que lles exima da asistencia a clase daquelas materias, ou partes de materias, nas que se admita a citada dispensa na súa guía docente; porén en todo caso serán avaliados polo sistema de avaliación continua. A solicitude de dispensa poderá realizarse no momento de remitir a documentación xustificativa mencionada no apartado 1 deste artigo"

Therefore, although the Centre concede Dispenses it Academician to the students that fulfil the necessary requirements for this, of the agreement of the group of professors of the \*asignatura, with the one of the Coordinator in command, gives off the admit or no that a student have it in the \*asignatura concrete. And like this it will have to be recorded in the educational guide.

In the present "Seguridad and Prevention" admits Dispenses it Academic but the practices that do in interactive classes (that the students of dispenses will not do of face-to-face form) will be substituted by works proposed by the \*profesorado to the effect, that the student affected will realise for being fundamental for the complete understanding of the matter and the just evaluation of all the \*alumnado according to a system of continuous evaluation (since the note of practices contributes in 30% to the final qualification).

In consequence, those students to which the Centre concede Dispenses it Academic, to principle of the course will put in contact with the professors of the \*asignatura, those who will communicate him the works to realise substitutive of the practices of interactive classes.

#### IMPORTANT NOTE:

How norm of "honestidad académica exigible", the professors of this matter, in what you approve of evaluation refers will not admit fraudulent behaviour some neither neither the presentation of fraudulent works, understanding by such thing the following:

«Considerarase fraudulenta, entre outras, a realización de traballos plaxiados ou obtidos de fontes accesibles ao público sen reelaboración ou reinterpretación e sen citas aos autores das fontes».

And, besides, they establish the consequences to try realise proofs of evaluation of fraudulent form in this matter:

«A realización fraudulenta dalgún exercicio ou proba exixida na avaliación dunha materia implicará a cualificación de suspenso na convocatoria correspondente, con independencia do proceso disciplinario que se poida seguir contra o alumno infractor».

That is to say, that in the case that a present student a work copied:

«Na realización de traballos, o plaxio e a utilización de material non orixinal, incluído aquel obtido a través da Internet, sen indicación expresa da súa procedencia e, se é o caso, o permiso do seu autor/a, poderá ser considerada causa de cualificación de suspenso», siempre sin perjuicio de las responsabilidades disciplinarias que se pudiesen derivar».

## Recommendations

### Subjects that it is recommended to have taken before

Construction I/670G01009  
 Construction II/670G01011  
 Facilities I/670G01014  
 Auxiliary and Security Equipment/670G01026  
 Construction III/670G01017  
 Technical Projects I/670G01023  
 Facilities II/670G01024  
 Technical Projects II/670G01027

### Subjects that are recommended to be taken simultaneously

Organisation, Programming and Control/670G01021  
 Construction IV/670G01022  
 Administration, Leadership and Management of Construction/670G01028

### Subjects that continue the syllabus

Final Dissertation/670G01036

### Other comments

Recommendations for the study of the matter:

- it treats of a matter with an estructura theoretical basic and a big quantity of legal rule, needing a big practical development that involves a continuous follow-up along all the academic course by part of the student.
- It is indispensable the continuous query of the virtual platform Moodle, where will publish contents, practical, exercises, norms, examinations, etc.
- previous Knowledges: the contents of the asignaturas indicated.
