

Teaching Guide

Identifying Data					2018/19
Subject (*)	Methodology of the Scientific Research		Code	770523006	
Study programme	Mestrado Universitario en Eficiencia e Aproveitamento Enerxético				
Descriptors					
Cycle	Period	Year	Type	Credits	
Official Master's Degree	1st four-month period	First	Optional	3	
Language	SpanishGalicianEnglish				
Teaching method	Face-to-face				
Prerequisites					
Department	ComputaciónEnxeñaría Industrial				
Coordinador	Sanchez Maroño, Noelia		E-mail	noelia.sanchez@udc.es	
Lecturers	Calvo Rolle, Jose Luis Sanchez Maroño, Noelia		E-mail	jose.rolle@udc.es noelia.sanchez@udc.es	
Web	moodle.udc.es/				
General description	The aim of this course is to provide an overview of the world of research. The knowledge taught allow students to know the context related theoretical and applied research work and acquire some basic skills to find quality information, writing and presenting research results.				

Study programme competences / results

Code	Study programme competences / results
B3	Poseer y comprender conocimientos que aporten una base u oportunidad de ser originales en el desarrollo y/o aplicación de ideas, a menudo en un contexto de investigación.
B7	Desarrollar las capacidades de análisis y síntesis; fomentar la discusión crítica, la defensa de argumentos y la toma de conclusiones.
B10	Potenciar la creatividad.
C1	Adquirir la terminología y nomenclatura científico-técnica para exponer argumentos y fundamentar conclusiones.
C4	Desarrollar el pensamiento crítico

Learning outcomes

Learning outcomes	Study programme competences / results	
An overview of research at the university level, deepening the main lines in the field of engineering.	BC3	CC1
Knowing the work of management in research, especially in relation to applications for research projects in various fields.	BC7	
Know the main forum for scientific discussion and its normal operation regarding abstract submission, review, etc.	BC3	
Search for quality scientific and technical references in various sources.		CC1
Write articles with scientific and technical nature and present them properly.	BC10	CC4
Knowing what is expected of a doctoral dissertation, how is written and how it is presented.	BC10	CC1
		CC4

Contents

Topic	Sub-topic
1. Scientific and technological research	1.1. The research concept. 1.2. Taxonomy of research. 1.3. Characteristics of scientific research. 1.4. Ethical aspects of research.
2. The research methodology.	2.1. Steps of the research process. 2.2. Main research methods.
3. The dissemination of research.	3.1. Types of publications. 3.2. Patents.

4. Management and search of scientific and technical references.	4.1. Information sources. 4.2. How to literature searches. 4.3. Tools for finding references. 4.4. Tools for managing references. 4.5. Introduction to citation indexes.
5. Drafting and presentation of scientific papers in the field of engineering.	5.1. Basic resources for scientific work. 5.2. The structure of a scientific paper. 5.3. Techniques for writing scientific papers. 5.4. Preparation of presentations of scientific papers.
6. Research projects and innovation.	6.1. Conception and planning of a research project. 6.2. essential elements of a research project. 6.3. Types of calls for research projects and innovation.
7. Development of a doctoral thesis.	7.1. What is a doctoral thesis? 7.2. Selecting a new line or research problem.
8. Transfer of knowledge to industry and exploitation of results.	8.1. Patent licensing. 8.2. Creation of technology-based companies: spin-off. 8.3. Contract research and cooperative.

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	B3 C1	9	9	18
Case study	B7 C4	11	11	22
Supervised projects	B10 C4	0	25	25
Oral presentation	B7 C4	1	3	4
Student portfolio	B7 C4 C1	1	1	2
Objective test	B3 B7 C4	3	0	3
Personalized attention		1	0	1

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Oral presentation complemented with the use of audiovisual media and the introduction of some questions to students, in order to transmit knowledge and facilitate learning.
Case study	They are mandatory for all students. It involves the resolution of cases. The student's done individually.
Supervised projects	Development work on writing scientific articles, presentations at scientific-technical work and preparation of reports of research projects.
Oral presentation	For some supervised project, students should prepare an oral presentation where they present their work in the classroom, highlighting the main contributions and conclusions.
Student portfolio	For some topic, students should cover a brief questionnaire or make a summary highlighting the most relevant aspects.
Objective test	It will consist of theoretical and practical on any of the items included in the agenda of the current issues.

Personalized attention	
Methodologies	Description
Supervised projects Case study	Student advice and assistance in tasks that require personal attention and resolution of doubts in their development will take place.

Assessment

Methodologies	Competencies / Results	Description	Qualification
Supervised projects	B10 C4	Realization of the tasks, in time and form, established in the matter within the framework of this methodology.	40
Oral presentation	B7 C4	It would be included in some supervised project and it would affect the final grade of the project, however it is not graded on its own.	0
Objective test	B3 B7 C4	Objective exam	50
Student portfolio	B7 C4 C1	Realization of the surveys/summaries in time and form, established in the matter within the framework of this methodology.	10

Assessment comments

To pass the subject is essential to have made and approved the Care JobsAs part of the "protected work" issues such as school attendance, personal work, proposed personal work, attitude, etc., to help obtaining approved will be included. It is necessary to exceed 50% of the score in the objective test to pass the subject. To help achieve a sustainable immediate environment and meet the objective of action number 5: "Teaching and research healthy and sustainable environmental and social" of the "Plan of Action Green Campus Ferrol": 1.- The delivery of the documentary works that are carried out in this subject: 1.1. It will be requested in virtual format and / or computer support 1.2. It will be done through Moodle, in digital format without needing to print them 1.3. To be made on paper:- Plastics will not be used.- Two-sided prints will be made.- Recycled paper will be used.- Drafts print will be avoided.
