

Teaching Guide

Identifying Data					2019/20
Subject (*)	Corpus Linguistics and Computer Science in English	Code	613505109		
Study programme	Mestrado Universitario en Estudos Ingleses Avanzados e as súas Aplicacións (2019)				
Descriptors					
Cycle	Period	Year	Type	Credits	
Official Master's Degree	2nd four-month period	First	Optional	3	
Language	English				
Teaching method	Face-to-face				
Prerequisites					
Department	Letras				
Coordinador	Crespo Garcia, Maria Begoña	E-mail	begona.crespo.garcia@udc.es		
Lecturers	Crespo Garcia, Maria Begoña	E-mail	begona.crespo.garcia@udc.es		
Web	https://www.udc.es/grupos/muste/				
General description	<p>The aim of this course is to introduce the field of corpus linguistics and corpus-based methodology for the linguistic study of English. General issues about the design, collection and analysis of corpus material will be discussed. In practical sessions students will learn how to search and analyse text corpora using software tools. Students will develop the ability to describe and discuss the extent to which language usage varies and can be tracked with reference to genuine examples attested in corpora.</p> <p>With this course students will acquire skills in:</p> <ul style="list-style-type: none"> ? the principles and methodology of English corpus linguistics; ? the practical use of linguistic corpora and related software; ? the discussion of specialized literature on corpus linguistics; ? the presentation of research results. 				

Study programme competences / results

Code	Study programme competences / results
A1	E01 ? Familiarity with the main research models in linguistic research.
A2	E02 ? Familiarity with the main resources, tools and methodologies in linguistic research.
A14	E14 ? Familiarity with and application of techniques and methods of quantitative linguistic analysis
B1	CB6 ? Students should have the knowledge and understanding necessary to provide a basis or opportunity for originality in the development and/or application of ideas, often in a research context.
B3	CB8 - Students must be able to integrate knowledge and to deal with the complexity of judgement formulation starting with information, which might be incomplete or limited, and which includes reflections on social and ethical responsibilities linked to the application of their knowledge and judgement.
B6	G01 ?The capacity to delve into those concepts, principles, theories or models related with the different fields of English Studies is a necessary skill, as is the ability to solve specific problems in a particular field of study via appropriate methodology.
B8	G03 ? An efficient use of new information technology and communication in English Studies is a necessary skill.
B10	G05 ? Skills related to research and the handling of new knowledge and information in the context of English Studies are to be acquired by students
B11	G06 ? Students should be able to develop a critical sense in order to assess the relevance of both existing research in the fields of English Studies, and their own research.
B12	G07 ?Linguistic competence (C2 level) in oral and written English must be developed and consolidated.
B14	G09 ? Students are expected to be able to carry out research projects of an academic nature in the different fields of English Studies
B15	G10 ? The ability to present and defend a research project using adequate terminology and resources appropriate to the field of study is a skill which should be acquired.

Contents	
Topic	Sub-topic
1. Introduction (description vs. theory; corpus vs. computational linguistics; brief history of corpus linguistics).	
2. What is a corpus? (defining a corpus, types of corpora, corpus resources).	
3. Corpus design and compilation (size, representativeness, etc.).	
4. Corpus annotation (tagging, parsing, other types of annotation).	
5. Data retrieval (software tools, concordances, wildcards, keywords, word lists, etc.).	
6. Data analysis (quantitative and qualitative analyses, normalized frequencies, frequency distribution, statistical significance).	
7. Applications of corpora for the linguistic analysis of English.	
Practical demonstrations with a selection of different corpora.	

Planning				
Methodologies / tests	Competencies / Results	Teaching hours (in-person & virtual)	Student?s personal work hours	Total hours
Guest lecture / keynote speech	A14 B1 B3	10	5	15
ICT practicals	B8 B10 B11	10	18	28
Oral presentation	B6 B8 B10 B12	1	9	10
Practical test:	A2 B12 B14 B15	1	18	19
Introductory activities	A1	1	0	1
Personalized attention		2	0	2

(*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
Methodologies	Description
Guest lecture / keynote speech	Interactive lecturing on Corpus Linguistic Issues.
ICT practicals	Hands-on sessions with software tools and corpora for text analysis.
Oral presentation	Oral presentation of a case study. Students will have to provide a hand-out and a PowerPoint presentation.
Practical test:	on the role of corpus linguistics as a framework/methodology for linguistic investigation.

Introductory activities	Ice-breaking activities.
-------------------------	--------------------------

Personalized attention

Methodologies	Description
ICT practicals	Personal tutoring for specific support.

Assessment

Methodologies	Competencies / Results	Description	Qualification
ICT practicals	B8 B10 B11	Hands-on sessions with software tools and corpora for text analysis.	30
Oral presentation	B6 B8 B10 B12	Oral presentation of a case study. Students will have to provide a hand-out and a PowerPoint presentation.	30
Practical test:	A2 B12 B14 B15	A test on the role of corpus linguistics as a framework/methodology for linguistic investigation.	40

Assessment comments

Second opportunity:

Students will have to repeat only those parts (exercises and case study) in which they did not reach a pass in the first opportunity. In the second opportunity the case study will be submitted as a written essay (between 2,000-3,000 words, excluding references).

Students officially exempt from class attendance:

Students will have

to hand in all course exercises (60%) and submit an essay on a case study (between 2,000-3,000 words, excluding references) (40%).

All exercises and tests will be done in English. Overall correctness in language and in the use of formal conventions is indispensable. Therefore, grammatical and orthographic mistakes will be penalised.

Those who are officially registered as part-time students, and have been granted permission not to attend classes, as stipulated in the regulations of this University, will be assessed in either of the opportunities according to the same criteria specified for the second opportunity.

Part-time students who have been granted a "dispensa académica" must contact the teacher at the beginning of the semester in order to design the necessary changes and adjustments relating to the different activities to be carried out along the academic year.

LINGUISTIC ACCURACY

Both the theoretical and practical examination must meet the minimum requirements of linguistic correctness (spelling and grammar, punctuation, syntax concordance, lexical precision, or formal register). The level in English language expected of students is equivalent to a C1 level. Deficiencies in this area will be penalized in qualifying.

Essays and written work may be tested through Turnitin in order to detect wrong citations, plagiarism or any other type of fraud. Should this occur, the rules for plagiarism will be applied. (Normas de avaliación, revisión e reclamación das cualificacións dos estudos de grao emestrado universitario). Turnitin recognises papers previously turned in by other people (or the student him/herself) at this university or other universities, as well as other material found on Internet.
