| General description | This course presents an overview of automatic learning. The syllabus explains the different techniques and methods, including supervised, unsupervised and reinforcement learning. In the practical part, a real case will be solved. | | | | | |

| Study programme competences / results | |
|---------------------------------------|---|
| Code | Study programme competences / results |
| A45 | Capacidade para coñecer e desenvolver técnicas de aprendizaxe computacional e deseñar e implementar aplicacións e sistemas que as utilicen, incluídas as dedicadas á extracción automática de información e coñecemento a partir de grandes volumes de datos. |
| B1 | Capacidade de resolución de problemas |
| B9 | Capacidade para xerar novas ideas (creatividade) |
| C2 | Dominar a expresión e a comprensión de forma oral e escrita dun idioma estranxeiro. |
| C6 | Valorar criticamente o coñecemento, a tecnoloxía e a información dispoñible para resolver os problemas cos que deben enfrentarse. |
| C7 | Asumir como profesional e cidadán a importancia da aprendizaxe ao longo da vida. |
| C8 | Valorar a importancia que ten a investigación, a innovación e o desenvolvemento tecnolóxico no avance socioeconómico e cultural da sociedade. |

| Learning outcomes | | | |
|---|--|-----|---------------------------------------|
| Learning outcomes | | | Study programme competences / results |
| Know the different machine learning techniques and apply them correctly. | | A45 | B1 B9 C2 C6 C7 C8 |
| To be able to combine the results of different techniques. | | A45 | B1 B9 |
| To be able to correctly compare the results obtained with different techniques. | | A45 | B1 C2 |
| Learn and apply the methodology of using these techniques in the resolution of real problems. | | A45 | B1 B9 C2 C6 C7 C8 |

| Contents | |
|----------|-----------|
| Topic | Sub-topic |

| | |
|--------------------------------|---|
| Unit 1: Introducción | 1.1. Introduction to Machine Learning 1.2. Introduction to Inductive Learning |
| Unit 2: Supervised Learning | 2.1. Introduction 2.2. Support-Vector Machines 2.3. Decision Trees and Rules 2.4. Regression. Regression Trees 2.5. Bayesian Learning 2.6. Instant-Based Learning 2.7. Artificial Neural Networks |
| Unit 3: Unsupervised Learning | 3.1. Unsupervised learning: clustering 3.2. Unsupervised neural networks |
| Unit 4: Reinforcement Learning | 4.1. Markov Decision Processes 4.2. Reinforcement Learning |
| Unit 5: Other concepts | 5.1. Deep Learning 5.2. Evaluation and hypotheses contrast 5.3. Metaclassifiers |

Planning

| Methodologies / tests | Competencies / Results | Teaching hours (in-person & virtual) | Student's personal work hours | Total hours |
|--------------------------------|------------------------|---|-------------------------------|-------------|
| Guest lecture / keynote speech | A45 C7 C8 | 21 | 42 | 63 |
| Laboratory practice | A45 B1 B9 | 12 | 24 | 36 |
| Supervised projects | A45 C2 C6 | 7 | 19 | 26 |
| Objective test | A45 C8 C7 | 2 | 20 | 22 |
| Personalized attention | | 3 | 0 | 3 |

(*)The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

| Methodologies | Description |
|--------------------------------|---|
| Guest lecture / keynote speech | Theoretical teaching of the subject matter of the course |
| Laboratory practice | Solve a practical problem by using the different techniques that will be explained in the theory classes. |
| Supervised projects | Writing, under the supervision of the teacher, of the report explaining the resolution of the problem carried out in the laboratory practices and the results obtained. This work must be presented in class. |
| Objective test | This is a written assessment test in which the student must demonstrate the knowledge acquired from the subject. |

Personalized attention

| Methodologies | Description |
|---------------------|--|
| Supervised projects | Practical work carried out with the advice of the teacher. |
| Laboratory practice | Writing of the explanatory report under the teacher's supervision. |

Assessment

| Methodologies | Competencies / Results | Description | Qualification |
|----------------|------------------------|--|---------------|
| Objective test | A45 C8 C7 | Preguntas de tipo test sobre os contenidos da asignatura, baseada nas distintas técnicas de aprendizaxe computacional e as súas sus aplicacións. | 60 |

| | | | |
|---------------------|-----------|--|----|
| Supervised projects | A45 C2 C6 | Redacción da memoria relativa á resolución do problema real realizado nas prácticas de laboratorio. A redacción da memoria incluirá a realización dunha revisión bibliográfica dos traballos más importantes relacionados, escritos na súa inmensa maioría en inglés, documentación sobre o problema a resolver, metodoloxía utilizada, e comparación dos resultados atopados na aplicación das distintas técnicas, así como unha valoración crítica tanto dos resultados obtidos como da información utilizada. | 20 |
| Laboratory practice | A45 B1 B9 | Resolución dun problema do mundo real utilizando a metodoloxía, para o cal se utilizarán varias técnicas explicadas en teoría, e estimularase ao alumno a xerar novas ideas para a resolución deste problema. | 20 |

Assessment comments

In order to pass the subject, the student must obtain a minimum score of 5 out of 10 in the result of combining the grades of the objective test, the laboratory practices and the supervised works. In addition, the student must obtain a minimum score of 2.4 out of 6 points in the objective test. If the student does not obtain this minimum grade, the grade of the subject will be that corresponding to the grade of the objective test.

In the second opportunity, the grade obtained in the laboratory practices and supervised works will be maintained, not being able to obtain again a grade since it results from the continuous evaluation of the work during the credits of practice of the subject. The student can retake the examination of the objective test, the criteria for obtaining the total score being those indicated at the beginning of this section.

Part-time students must turn in their papers on the same date as full-time students, and attend the GRTs in which they will be corrected. Similarly, it is recommended that you attend the practice classes.
