Assessment comments

- It is understood by participation in the activities carried out in the master sessions, the development in time and form of the tasks that arise related to the contents of the agenda. In the case of the face-to-face option, the non-fulfillment of 70% of the attendance may imply the non-passing of the subject, the student being considered "Not Submitted" in the final grade. This lack of participation may also disable the student to pass the subject on the second opportunity or subsequent calls until it is completed.

- On-line students will have equivalent documentation, references and task to the work carried out by the presential students, so that the participation section is equally computable for the purpose of evaluating the test lecture/keynote speech sessions. In practical sections through ICT and supervised work, the development will be the same between two groups.

- The preparation of the supervised works that attend to the design and / or development of a sports tourism project, will have as a reference the guidelines developed in the course of the subject itself, and you also add the following rules in the cases in which it is relevant:

UNE-ESO 21500

UNE-ESO 21101

UNE-ESO / TR 21102 IN

UNE-ESO 21103

The regulations referring to the corresponding active tourism companies will also be considered, taking care of the autonomous community or the administrative environment in which it is carried out.

The qualification of the works will be distributed in a general way, and without prejudice to greater precision depending on the work, in relation to the following elements and criteria:

Contextualization and foundation: 30%

Planning and development (Inclusion and application of the different elements and tools acquired in the field): 60%

Aspects you form (APA Standards, 6th) and you structure: 10%

Also in accordance with the regulations of the UDC, calquer work that in whole or in part contains contents copied from other published or unpublished works, from the Internet, etc. It will be considered as No Passed.

In accordance with the sustainability proposals that the University of A Coruña is promoting, the following guidelines will be followed as far as possible:

1.- The delivery of the documentary works that are carried out in this matter:

1.1. It will be requested in virtual format and / or computer support

1.2. It will be done through Moodle, in digital format without printing

1.3. To be done on paper:

- Plastics will not be used.

- Double-sided prints will be made.

- Recycled paper will be used.

- Printing of drafts will be avoided.

2.- Sustainable use of resources and the prevention of negative impacts on the natural environment must be made

3.- The importance of ethical principles related to the values ??of sustainability in personal and professional behaviors must be taken into account
